Persona Portrait — The Deadline-Bearing Committed STEM/ML Masterer

The decision-grade persona for Ritsu's locked first-100 wedge (scorecard winner 7.24/10; `/think mckinsey run ritsu-segment-persona-journey-v1`). Companion to `customer-journey.md`. **Every attribute carries (a) the Core Question that produces the answer — the question a stranger would ask to elicit it — and (b) an honest Confidence = the probability the answer is correct.** At true-zero, most answers are `hypothesis / inferred`; observed traces to the `supabase-analytics` Door-2 signal (25 profiles · 756 sources · 656 sessions · 15 founder-only shares · 0 real paying).

The portrait (in one breath)

It is week 3 of cs231n (or MIT 6.S191, or Andrew Ng's ML course). **The Masterer** — a sophomore-to-grad STEM student or an early-career engineer switching into ML, 18–32, laptop-first, studies late and alone — is staring at a backprop derivation they've re-read three times, a graded midterm N weeks out, and the old whisper: *"maybe I'm just not a math-science person."* They are wrong, and the deepest hook in the whole product is telling them so: **the method was wrong (passive re-reading), not you.** They don't want an AI to *do* it — they want to be *sharper*; they respect rigor and instantly distrust gimmicks. They upload a dense PDF or a long lecture video (PDF 63% + YouTube 16% — **observed**), revisit it across many sessions to actually master it (one real user: 42 sources / 36 sessions — **observed**), and would refer a classmate the moment a result is legibly theirs. Their willingness to pay is **real but deadline-gated** — sharp the week before a graded checkpoint, soft between them — and it is the **one thing never yet observed** (0 real paying). Their shadow rival is **free**: Google NotebookLM now does doc→quiz/flashcards→grounded-explanation→share-link, and as of **April 2026** even basic mastery-tracking — so Ritsu wins *only* on the structured multi-week **PATH** + 17 activity types + concept-level mastery map + learning-science, never on "we also make quizzes."

- **One-line definition:** *A serious learner gripping a hard, multi-week, graded STEM/ML course who must TRULY master dense material before a real deadline — and will pay to actually learn, not just pass.*
- **The 2 load-bearing risks (carried throughout): (R1)** WTP is unproven at true-zero — the N=10 watch must test *"do they pay at the first hard limit?"*; **(R2)** free NotebookLM clones the core spine (and narrowed the gap further in April 2026) — wedge + message must lead with the PATH/ mastery/learning-science it lacks.
- **Positioning note (v2):** the wedge beachhead is ML/AI, but Ritsu's frame is *"learning 10x with AI"* → early-phase *"University Mastery with AI"* — so the suitable ad-channel surface (**S9-A**) is broadened to **all hard university subjects** (STEM, pre-med/medicine, economics/finance, biology) and **especially learning-method / study-productivity** channels, each scored 0-100 by fit and ranked.

How to read this document

- **Core Question** column — the question (from the persona template) whose answer *is* this row. Read it as "to learn X about this customer, you would ask: ...".
- **Conf** column — **the probability the answer is correct**, with its evidence tier:
- **Obs · 80–92%** — grounded in `supabase-analytics` Door-2 behavioral data (small-N caps it below ~92%).

- **Inf · 55–72%** — reasoned from Kotler / 5-Star BRAVO / JTBD frameworks + market deep-research (triangulated, but not directly observed for *this* segment).
- **Hyp · 30–50%** — plausible and internally consistent, but untested; would move on contact with N=10.
- ★ before the row number = one of the **load-bearing (critical) attributes** — the ones that directly predict whether the first-100-paying bet works (mirrors the template's *** flag; ~110 of ~307 are critical).
- Anything touching **payment, organic referral, or "beating free NotebookLM"** is honestly low-confidence — that is the unproven core, not a hedge.

Segment boundary — the JOB, not the subject (v2.2)

The segment is **not "STEM/ML students."** It is everyone doing one **job**: *master a dense, graded, multi-week body of material under a high-stakes deadline, through active practice*. Subject is the **beachhead-targeting choice**; the **job** is the boundary. This is why the channel map (S9-A) is broadened across disciplines — and why some "dense-syllabus" students are *in* while others are *out*.

The 3-question membership test (all three "yes" = in the segment)

1. **Active-practice mastery?** Does the material demand quiz / recall / explain-back / solve — not just reading or essay-writing?
2. **High-stakes graded deadline?** An exam, board, qualifier, or certification with a real date and real consequences?
3. **Pay because the outcome matters?** Grade / credential / license / career gate — enough to open a wallet?

The discriminator is the job, not "a dense syllabus." A literature major with a 500-page reading list has a dense syllabus, but their job is "write a strong argument," not "recall/solve" → weak fit. This is the **avatar-split risk** (S4 §26) applied to subjects: the same "dense syllabus" demographic can hide two opposite jobs.

Fit-weighted tiers (fit-score 0-100 = how 1:1 the job + WTP + pre-assembled audience match)

Tier	Group	Fit	Why it sits here
① CORE	ML / AI courses (<i>named launch beachhead</i>)	95	Densest reasoning material; the engagement we actually observe (PDF 63% + lecture-video 16%); the named first-100 launch.
① CORE	Hard STEM — math, physics, chemistry, engineering, CS	90	Derivation / problem-solving mastery under graded deadlines — the same job, a different subject.
① CORE	Medicine / pre-med — MCAT, USMLE, nursing, anatomy	92	The highest proven study-tool WTP + densest pre-assembled community + already active-recall-native (Anki/UWorld culture). Co-beachhead candidate (below). Caveat: hardest accuracy bar + more memorization-skew.
② STRONG	CFA / quant finance / accounting	84	Dense, brutal graded exams; high out-of-pocket WTP (Schweser/Kaplan).

Tier	Group	Fit	Why it sits here
② STRONG	Law — bar prep, law-school finals	8 2	Dense case-reading + high-stakes exams + huge prep-WTP (BARBRI/Themis).
③ MODERATE	Quantitative social science — economics, psych-with-stats, poli-sci-with-data	7 6	Real reasoning + graded, but mixed with essays; lower student WTP.
③ MODERATE	Grad qualifying exams — any field	7 8	Dense + high-stakes, but small + heterogeneous as a community.
④ WEAK / out	Essay-driven humanities — literature, history, philosophy	5 5	"Dense" in reading <i>volume</i> , but the job is synthesis/argument, not active-recall mastery → the core loop fits poorly. The principled anti-fit.

STEM/ML stays rank-#1 for the launch (highest observed engagement); the tiers ADD the adjacent jobs that share the same psychographic + the same WTP trigger, ranked by fit.

Co-beachhead recommendation — a parallel N=10

The first-100 still **concentrates** on one community to dominate — but **medicine / pre-med is a co-equal beachhead candidate to ML/AI**, and it *de-risks the wedge's #1 unknown* (R1, "do they pay?"): med students already pay \$300-500 for UWorld / Anki add-ons / Sketchy / Pixorize, so the willingness-to-pay this whole wedge rests on is **already demonstrated** in that adjacent market. **Recommendation:** run a **parallel N=10** — a med/pre-med cohort alongside the ML/AI cohort (SOP-PRODUCT-002) — and let the *pay-at-first-limit* data pick the launch beachhead, rather than assuming ML/AI by default. The trade-off med stress-tests is the **unforgiving accuracy bar** (a hallucinated pharmacology quiz before a board exam is catastrophic) — which doubly tests the #1 SERVQUAL moat (S13).

S1 · Segment Identity & Scope

(Kotler STP Ch2 + Ritsu wedge · 14 attrs · 4★)

#	Attribute	Core Question	Answer	Conf	Source
1	Segment name	<i>What single name captures who this is?</i>	The Deadline-Bearing Committed STEM/ML Masterer (ML/AI-course beachhead → broader STEM expansion)	Inf · 70%	locked segment + icp-summary
2	One-line definition	<i>Can you define them in one sentence a stranger understands?</i>	A serious learner gripping a hard multi-week graded STEM/ML course (cs231n, fast.ai, Andrew Ng) who needs to TRULY master dense material before a real deadline	Inf · 70%	locked def + Kotler STP
★3	Hypothesis status	<i>Is this segment a guess, an inference, or observed truth?</i>	Engagement OBSERVED (sustained revisit: one user 42 sources/36 sessions); PAYMENT untested (0 real paying, 2 founder test)	Obs · 88%	analytics live.sessions/sources

#	Attribute	Core Question	Answer	Conf	Source
★4	Wedge vs expansion	<i>Is this the wedge or the expansion ladder?</i>	WEDGE = deadline-bearing committed masterer (durable graded-deadline WTP); EXPANSION = open-courseware self-learner (huge/reachable, soft WTP, top-of-funnel only)	Inf · 68%	locked PAYING-CORE vs REACH split
5	TAM / SAM / SOM	<i>How big is the reachable, winnable slice?</i>	TAM = global English STEM/MOOC learners (10s of M); SAM = active ML/STEM course communities (r/ML ~3.1M + r/GradSchool ~924K + r/learnmath ~203K + fast.ai/cs231n ≈ 4–5M reachable); SOM = first-100 paying	Inf · 62%	WebSearch: subreddit counts
★6	Priority rank	<i>Is this segment #1 to win, or later?</i>	#1 and ONLY first-100 target — concentrate 100% of GTM here; all other personas/VN = deferred expansion ladder	Inf · 72%	icp-summary concentration + north-star
7	Targeting strategy	<i>How broadly or narrowly do we target?</i>	Concentrated (single-segment); narrow to win passionate referring advocates over a one-shot crammer who churns	Inf · 70%	Kotler concentrated targeting
8	B2C / B2B / B2B2C	<i>Who is the buyer vs the user vs the payer?</i>	Pure B2C — buyer = user = payer (the individual learner); no institutional gatekeeper at this wedge (B2B educator path = S17 expansion only)	Inf · 72%	product.md §8 + self-serve
9	Intermarket reach	<i>Does this persona transfer US↔UK↔VN unchanged?</i>	US-LED intermarket; identical "master this course before the deadline" job spans US↔UK↔CA↔AU↔global English; VN = secondary served-market	Inf · 64%	icp-summary intermarket + §6.6
10	Persona mapping (6 marketing personas)	<i>Which of Ritsu's 6 marketing personas does this map to?</i>	Primary = Students (graded STEM); secondary = Self-Learners + Engineers (framework-from-docs); Researchers sit on the expansion edge	Inf · 66%	product.md §8 (6 personas)
★11	Anti-persona check	<i>Does this overlap an anti-persona we should NOT chase now?</i>	YES, and we exclude them: the one-shot exam-crammer (churns post-exam), the casual browser (no graded deadline), the reference-looker, and the edutainment/streak-seeker — same demographics, opposite payment behavior	Inf · 68%	locked wedge; avatar-split
12	Positioning-belief fit	<i>Does it fit the "wrong method, not weak ability" belief?</i>	1:1 — the reframe ("you're not bad at this; passive re-reading is") is the segment's deepest hook; the belief defines the segment	Inf · 66%	positioning.md belief
13	Referral-speed fit	<i>Does the social context (study cohort) drive fast referral?</i>	High latent: a shared graded deadline gives built-in cohort recipients (course Discord, study group) — but stranger-referral is UNPROVEN (15 shares, all founder)	Hyp · 45%	analytics shares; cohort JTBD
★14	Strategic rationale	<i>Why this segment, why now?</i>	Only MASDA-eligible candidate: fuses sustained-mastery retention (anti-churn) with a graded-deadline WTP trigger, 1:1 product fit, pre-assembled audience; leans on the PATH + 17 activities + mastery-tracking free NotebookLM lacks	Inf · 70%	locked WHY-IT-WON

S2 · Geographic

(Kotler Ch7 geographic · 12 attrs · 1★)

#	Attribute	Core Question	Answer	Conf	Source
1	Country / market	<i>Which country are the first buyers in?</i>	US-led intermarket; paying core in the US, reach layer across global English (UK, CA, AU, India, SG, NG)	Inf · 65%	icp-summary; Coursera 2025 (US 27.7M, India 27M)

#	Attribute	Core Question	Answer	Conf	Source
2	Region / state	<i>Which regions concentrate the segment?</i>	US coastal + research-university clusters: CA (Stanford/Berkeley), MA (MIT), NY, WA, TX	Hyp · 45%	Kotler Ch7; beachhead-course inference
3	City tier / metro	<i>Do they cluster in specific city types?</i>	Tier-1 university metros (SF Bay, Boston, Seattle, NYC, Austin) + global uni hubs (London, Toronto, Bangalore)	Hyp · 42%	deep-research MOOC hubs
4	Urban vs rural	<i>Urban, suburban, or rural?</i>	Overwhelmingly urban/campus-adjacent; broadband-dependent dense-info workflow rules out rural-constrained	Inf · 66%	analytics (PDF 63% +YT 16%)
5	Language(s)	<i>What language must the product/marketing be in?</i>	English-first (product belief + creators are English: Sung/Abdaal/Frank); consumed in English even by ESL	Obs · 85%	analytics (EN material/creators)
6	Time zone	<i>When are they online and studying?</i>	US ET-PT core; reach adds GMT/IST → 24h support + async, no single peak	Inf · 60%	icp-summary intermarket
7	Climate / seasonality	<i>What calendar drives their need?</i>	Demand pulses on the US academic calendar: midterms Oct+Mar, finals Dec+May; cohort/bootcamp deadlines add spikes	Inf · 64%	Kotler Ch7; deadline-bearing JTBD
8	Market maturity	<i>Is the category new or saturated there?</i>	Mature, saturated EdTech — heavy incumbent stack (Anki/Quizlet/ChatGPT/NotebookLM); enter on differentiation, not category creation	Inf · 68%	NotebookLM scan
9	Regulatory zone	<i>Which legal regimes govern serving them?</i>	CCPA + US state-privacy for core; GDPR for UK/EU reach; COPPA edge (some <18 HS-AP) — adult-default + age-gate	Inf · 66%	product.md §12
★10	Payment geography	<i>Can they actually pay you, and how?</i>	Card-payable USD via LemonSqueezy MoR (US tax + intl); \$29 Plus frictionless US, higher relative barrier India/NG	Obs · 84%	analytics live.payments (LemonSqueezy)
11	Connectivity	<i>Will bandwidth/devices constrain the experience?</i>	High-bandwidth assumed: 16% YouTube + dense PDFs need stable broadband; not low-data/mobile-only	Obs · 82%	analytics live.sources
12	Localization need	<i>How much must we localize vs reuse?</i>	Near-zero for paying core (English UX); reach-layer ESL self-serve in English — defer 9 locales until post-PMF	Inf · 64%	icp-summary English-first

S3 · Demographic

(Kotler Ch7 + Ch3 beyond birth year · 24 attrs · 2★)

#	Attribute	Core Question	Answer	Conf	Source
1	Age band	<i>What age range are they in?</i>	18–32 core; bimodal — 19–24 (university STEM/cohort) + 24–32 (career-switch ML self-learner); thin <18/>35 tail	Inf · 64%	course-tier composition + Kotler Ch7
2	Generation cohort	<i>Which generation, and does it actually matter here?</i>	Gen Z dominant (1997–2006 undergrad core) shading into younger Millennial (1990–96) upskiller; matters for tone, not for the JTBD	Inf · 60%	Kotler cohorts

#	Attribute	Core Question	Answer	Conf	Source
3	Life stage	<i>What life stage shapes the need?</i>	Mid-degree student OR early-career professional retraining into ML/AI; identity-forming "becoming technical" phase	Inf · 66%	icp-summary + JTBD
4	Gender mix	<i>Does gender change the job or the message?</i>	Skews male (~60–70%, mirrors STEM/CS) but the mastery-anxiety belief is gender-neutral; do NOT message male-only	Hyp · 48%	deep-research STEM skew; icp-summary
5	Education level	<i>What is their education level?</i>	Bachelor's in-progress (paying core) to early-grad; high baseline literacy, comfortable with dense PDFs/papers	Obs · 80%	analytics (PDF 63% + paper material)
★6	Field / discipline	<i>What are they studying or working in?</i>	ML/AI beachhead (DL, CV, stats); expansion = calc/orgo/bio/physics + pre-professional STEM	Inf · 70%	locked beachhead; code+slides mix
★7	Academic load	<i>How heavy is their memorization/ mastery load?</i>	Very high MASTERY load (derivations, proofs, code, multi-week chains) — not memorization; "must truly get it, graded"	Obs · 84%	analytics (42 src/36 sess revisit)
8	Institution type	<i>Where does the learning happen?</i>	R1/competitive 4-yr universities + structured bootcamps/cohort courses (fast.ai, 6.S191) + grad programs; not casual MOOC drift	Inf · 64%	beachhead list; deadline-bearing core
9	Student year	<i>Freshman cramming or thesis-stage?</i>	Sophomore–senior (declared major, hard courses) for core; grad-quals takers; bootcamp cohort members	Inf · 58%	cs231n upper-div/ grad
10	Occupation	<i>What do they do for work?</i>	Full-time student OR SWE/analyst/researcher upskilling into ML; output is graded or job-gating	Inf · 64%	segment + sustained-mastery pattern
11	Employment status	<i>Are they earning, and how stably?</i>	Paying core = enrolled student + employed early-career switcher; both have a hard external deadline	Hyp · 50%	dual-core; deadline-WTP
12	Income band	<i>How much can they spend monthly?</i>	Tight: student \$0–300/mo discretionary; switcher \$500–1500/mo — both price-anxious, \$29 Plus must clear a felt-pain bar	Inf · 58%	icp-summary US WTP anchor
13	Who funds them	<i>Whose money pays for tools?</i>	Self-funded (realistic default); some employer L&D for switchers; rarely parents — the decision is personal	Hyp · 48%	icp-summary price-sensitive
14	Household / family	<i>What home context affects study time?</i>	Solo focused study — dorm desk, shared apartment, or WFH corner; headphones-on deep-work, often late-night	Hyp · 44%	study-creator deep-work culture
15	Socioeconomic tier	<i>Are they price-sensitive by circumstance?</i>	Middle / aspirational-middle; education-as-mobility; will pay for a tool that protects a graded outcome	Inf · 60%	icp-summary mastery-over-grades
16	Device ownership	<i>What hardware do they own + actually use?</i>	Laptop-primary (PDF + code + long-video) + smartphone for review; <60s upload→path fits desk-first	Obs · 86%	analytics (PDF+YouTube+code)
17	Tech proficiency	<i>How easily do they adopt a new tool?</i>	High — runs Colab/Anki/ChatGPT/Notion; early-adopter; judges Ritsu against NotebookLM on day one	Obs+Inf · 78%	analytics (code uploads); NotebookLM scan
18	Accessibility needs	<i>Any accessibility requirement to design for?</i>	Mostly standard; latent demand for dyslexia-friendly reformatting + audio/visual variety (17 types serve this)	Hyp · 40%	product 17-activity fit
19	Ethnicity sensitivity	<i>Any cultural nuance the message must respect?</i>	Ethnically diverse (heavy international + Asian STEM); keep imagery inclusive, never persona-as-default-white	Hyp · 46%	deep-research STEM/ intl enrollment

#	Attribute	Core Question	Answer	Conf	Source
20	Nationality / residency	<i>Any residency constraint on access or payment?</i>	US-led intermarket: US lead + global English (India, EU, SEA, LatAm) reachable on Reddit/YouTube/Discord	Inf · 62%	icp-summary US-led
21	Marital / relationship	<i>Does relationship status change availability?</i>	Predominantly single / no dependents — time + money flow to self-investment; learning a top priority	Hyp · 46%	age band 18–32
22	Career stage	<i>Where are they on the career arc?</i>	Pre-career (building credential) OR early-career pivot (0–5 yrs) climbing into ML/AI; high upside-motivation	Inf · 62%	dual-core; "sharper not lazier"
★23	Self-view of field difficulty	<i>Do they secretly think their field is "too hard for me"?</i>	YES — the fragile "I'm not a math-science person" belief is the deepest psychographic hook; one bad exam reactivates it	Hyp · 50%	icp-summary reframe (VI-added)
24	Incumbent-tool proficiency	<i>Are they an Anki/Quizlet power-user, or a frustrated newbie?</i>	Mixed: ML self-learners are often Anki-literate; many STEM students are frustrated manual-card-makers (the grunt-work pain Ritsu removes)	Inf · 56%	analytics; icp stack (VI-added)

S4 · Psychographic (behavior drivers — the engine of the segment)

(5-Star BRAVO psychographics > demographics + Kotler Ch7 + Ritsu "wrong-method" belief · 29 attrs · 11★)

#	Attribute	Core Question	Answer	Conf	Source
★1	Core value	<i>What do they fundamentally value here?</i>	Mastery — truly <i>understanding</i> hard material, not memorizing for a grade; "I want to actually get it."	Inf · 70%	icp-summary + Kotler
★2	Core belief	<i>What do they believe about themselves and this problem?</i>	Active learning beats passive; doing problems/explaining-back creates mastery, re-reading wastes the hours before a deadline.	Inf · 68%	product.md §4 + BRAVO
★3	The reframe	<i>What false belief can you flip into relief?</i>	"I'm not a math/science person" → relief: the METHOD was wrong (passive re-reading), not you; with active recall you CAN master ML.	Hyp · 48%	icp-summary psychographic core
4	Self-image	<i>Who do they think they are?</i>	A serious, capable-but-struggling learner who out-works rather than out-talents; "I grind hard, I just need the right system."	Inf · 62%	icp-summary + scorecard
5	Aspirations	<i>What do they aspire to be?</i>	Pass the graded course/quals, land the ML/SWE role or grad slot, become someone who genuinely understands deep nets — not a faker.	Inf · 64%	beachhead courses
★6	Deepest fear	<i>What are they most afraid of?</i>	Putting in the weeks, hitting the midterm/final, and still failing — proving the "not smart enough" story true.	Hyp · 50%	JTBD + deadline trigger
7	Secondary fears	<i>What lesser fears nag at them?</i>	Wasted study time, falling behind a cohort, an AI feeding them a wrong fact that tanks an exam answer.	Hyp · 46%	NotebookLM scan + SERVQUAL
★8	Motivation type	<i>Are they driven by mastery or by a grade/deadline?</i>	DUAL: intrinsic mastery-drive (durable LOVE) GATED by a recurring graded deadline (the WTP trigger) — not pure cram.	Inf · 66%	locked wedge
9	Growth mindset	<i>Do they think they can get better?</i>	High but fragile — believes effort compounds, yet one bad exam reactivates the fixed "not-a-math-person" narrative.	Hyp · 48%	icp-summary reframe

#	Attribute	Core Question	Answer	Conf	Source
10	Risk tolerance (new tool)	<i>How much risk will they take on a new tool?</i>	Moderate — will trial mid-course if onboarding is <60s and doesn't risk their limited deadline hours.	Inf · 60%	magic-moment + deadline pressure
11	Novelty seeking	<i>Do they chase new tools or distrust them?</i>	Low-to-moderate for tools (rigor > shiny); high for <i>insight</i> — loves an explanation/analogy that makes a hard concept click.	Hyp · 46%	icp + mastery engine
12	Status sensitivity	<i>Does looking capable to peers matter?</i>	Quiet/competence-based — respected for understanding, indifferent to gamified badges; "studytwit streak" optional flex.	Hyp · 44%	#studytwit + mastery-over-grades
13	Locus of control	<i>Do they feel in control of results?</i>	Strongly internal — outcomes hinge on their own study system, which is exactly why a method-fixing tool resonates.	Inf · 64%	BRAVO + icp
★14	Conscientiousness	<i>How organized and disciplined are they?</i>	High — uploads dense multi-session material and revisits (42 sources/36 sessions; 4 sources/10 sessions = deliberate mastery loops).	Obs · 86%	analytics live.sources/sessions
15	Procrastination	<i>Do they act early or only under deadline?</i>	Present but deadline-bounded — the graded midterm/final is the forcing function that converts intent into sustained sessions.	Inf · 60%	deadline trigger + 656 sessions
16	Perfectionism	<i>Does perfectionism help or paralyze them?</i>	Moderate-high on understanding, pragmatic on polish — depth over completeness under time pressure.	Hyp · 44%	mastery-over-grades
★17	Attitude to AI	<i>Do they trust AI, or fear it "cheats/hallucinates"?</i>	Conditional trust — adopts AI for leverage but viscerally fears hallucinated quizzes; demands source-grounded output.	Inf · 66%	icp + NotebookLM scan + SERVQUAL
★18	Attitude to effort	<i>Do they want a shortcut or a sharpening?</i>	Wants AI to make them SHARPER, not do it for them; rejects "AI does it for you" — effort IS the point.	Inf · 68%	icp + "AI can't learn for you"
19	Identity tribe	<i>Which tribe do they identify with?</i>	Open-courseware ML self-learners + university STEM grinders — r/learnmachinelearning, fast.ai forums, cs231n cohorts, #studytwit.	Inf · 62%	channels + reach layer
20	Lifestyle	<i>What does a normal day look like?</i>	Time-poor, deadline-stacked: full course load / bootcamp weeks / job-plus-study; long focused multi-source sessions.	Inf · 60%	analytics session pattern
★21	Values hierarchy	<i>Which values win when they conflict?</i>	Mastery > accuracy/trust > time-saved > cost > status/gamification — pays for depth, not dopamine.	Inf · 66%	icp + SERVQUAL + pricing
★22	Skeptic triggers	<i>What instantly makes them roll their eyes?</i>	A hallucinated/wrong quiz; generic non-grounded answers; "AI shortcut" framing; flashy gimmick over rigor; paywall before first value.	Inf · 66%	NotebookLM scan + icp
23	Emotional before-state	<i>How do they feel right now, unsolved?</i>	Anxious + overwhelmed — dense material, ticking deadline, secret doubt they're "not smart enough."	Hyp · 50%	JTBD + deepest fear
24	Emotional after-state	<i>How do they want to feel once solved?</i>	Relief + earned confidence — "it finally clicked, I can actually do this," the method (not their brain) was fixable.	Hyp · 48%	reframe + magic-moment
★25	Self-talk / language	<i>What words do they actually say to themselves?</i>	"I keep re-reading and nothing sticks." / "I need to actually understand this, not just pass." / "Am I just not a math person?"	Hyp · 50%	icp verbatim + JTBD
★26	Avatar split risk	<i>Could identical demographics hide opposite avatars?</i>	HIGH: paying committed-masterer (durable WTP) vs soft-WTP open self-learner (free reach) — same psychographic, opposite payment behavior; courting reach can dilute the paying core.	Inf · 66%	locked reach-vs-core + R1

#	Attribute	Core Question	Answer	Conf	Source
★27	Attitude to "AI cheating"	<i>Do they use AI to AVOID the work, or to get sharper at it?</i>	To get sharper — they reject "AI does it for me"; using AI to skip understanding would defeat their own goal. The anti-cheat stance IS the buy reason (Coherence belief: "AI can't learn for you").	Inf · 66%	icp belief (VI-added)
28	Learning-science affinity	<i>Have they already met active-recall / spaced-repetition?</i>	Moderate-to-high: many already run Anki / know spaced repetition; naming the science (Feynman, retrieval practice) is a <i>trust signal</i> , not a novelty — the preemptive moat.	Inf · 58%	positioning learning-science (VI-added)
29	Desired identity shift	<i>What identity do they crave — from "X" to what?</i>	From "I'm not a math-science person / a faker" → "someone who genuinely understands this" — a competence identity, earned not faked.	Hyp · 46%	reframe + aspirations (VI-added)

S5 · Jobs-to-be-Done

(JTBD 3-layer + Ritsu icp · 21 attr · 9★)

#	Attribute	Core Question	Answer	Conf	Source
★1	Functional job	<i>What practical job do they need done?</i>	Convert a dense multi-week STEM/ML course (PDF+lectures) into recallable, exam-ready mastery before graded midterms/finals	Obs · 84%	analytics (PDF 63% +YT 16%)
★2	Emotional job	<i>What feeling are they hiring for?</i>	Replace "I'm not a math-science person" dread with earned confidence — feel genuinely capable, not just busy re-reading	Inf · 64%	icp-summary (false-belief)
3	Social job	<i>How do they want others to see them?</i>	Be seen by peers/professor/cohort as someone who actually <i>gets it</i> — can explain it back, not just pass	Hyp · 46%	JTBD; #studytwtnorms
★4	Struggling moment	<i>When exactly does the pain become urgent?</i>	10 days pre-final staring at a 200-page reader + 12 lecture hours, re-reading for the 3rd time and still not retaining	Obs · 80%	analytics (42 src/36 sess revisit)
5	Desired progress	<i>What does progress look like to them?</i>	From passive "I've read it" to active "I can solve it cold under time pressure" — durable cross-topic mastery, not cram-and-dump	Inf · 64%	icp-summary; mastery engine
6	Current workaround	<i>What hacky solution do they use now?</i>	DIY frankenstack: ChatGPT paste + manual Anki + Quizlet + YouTube + re-reading PDFs — fragmented, no path, no tracking	Inf · 66%	product.md (\$25–100 stack)
★7	Hire trigger	<i>What pushes them to try something new?</i>	A real graded deadline lands (midterm/final/qual date) on material too dense+long to brute-force by re-reading	Hyp · 50%	locked wedge (deadline = WTP trigger)
★8	Fire trigger	<i>What makes them quit a tool?</i>	Course ends / deadline passes, OR a hallucinated quiz breaks trust in accuracy (#1 SERVQUAL bar)	Inf · 62%	R1 + product.md (accuracy #1)
9	Success criteria	<i>How will they know it worked?</i>	Aced the graded assessment AND can still apply the concepts weeks later — mastery that survived the exam	Hyp · 48%	icp-summary (mastery-not-cram)
★10	Force: Push	<i>What pain pushes them away from today?</i>	Re-reading doesn't stick, time is finite, stakes are real — the passive method is visibly failing as the deadline nears	Obs · 80%	analytics (heavy revisit)

#	Attribute	Core Question	Answer	Conf	Source
★11	Force: Pull	<i>What pulls them toward the new way?</i>	Upload → 30s structured multi-week path + 17 activities + mastery-tracking — the <i>whole</i> loop NotebookLM lacks	Inf · 64%	product.md; NotebookLM scan
12	Force: Inertia	<i>What habit keeps them stuck?</i>	"ChatGPT + Anki already works well enough" — the free frankenstack is owned, familiar, sunk-cost'd	Hyp · 50%	JTBD; self-learner defaults
13	Force: Anxiety	<i>What fear holds them back from switching?</i>	"Is the AI accurate, or will it teach me wrong things before my exam?" — distrust of AI gimmicks at high stakes	Inf · 64%	icp-summary; R2
14	Job frequency	<i>How often does this need arise?</i>	Recurring during a term: weekly study cycles + 2–4 graded deadline spikes/semester	Inf · 64%	locked wedge (recurring deadlines)
15	Job context	<i>In what setting does the job occur?</i>	Solo, late-night, laptop, deep-focus blocks; sourced from r/learnmachinelearning (~400K+), fast.ai forums, cs231n cohorts	Inf · 60%	analytics (656 sessions); deep-research
16	Job importance	<i>How much does getting this right matter?</i>	Top-3 life priority in-term — grade/credential/career gate; mastery is non-optional	Hyp · 50%	locked wedge (real stakes)
17	Little vs big hire	<i>What is the smallest first "yes"?</i>	Little: upload one lecture PDF, get a quiz in 60s (magic moment). Big: run a full course as a tracked multi-week path	Obs · 80%	analytics (32 projects, 3329 units)
★18	Non-consumption	<i>Are they ignoring the problem entirely today?</i>	Today they default to free re-read+ChatGPT and ignore paid tutors — the watch must prove they PAY at the first hard limit	Hyp · 42%	R1 (WTP unproven)
19	Success metric they track	<i>What number do they personally watch?</i>	The graded score (pass/A) externally; internally "can I solve an unseen problem cold?" + practice-quiz accuracy + felt-confidence	Hyp · 44%	JTBD (VI-added)
★20	Multi-source job	<i>Do they fuse multiple sources into one mastery project?</i>	YES — a hard course = textbook + slides + lecture video + problem sets fused into ONE tracked path (32 projects / 3,329 units observed)	Obs · 80%	analytics multi-source projects (VI-added)
21	Passive habit to replace	<i>Which passive ritual must Ritsu replace?</i>	Re-reading + highlighting + passive lecture re-watching — the rituals that feel productive but don't stick	Inf · 64%	icp passive-method (VI-added)

S6 · Behavioral

(Kotler Ch7 occasions/usage/loyalty · 24 attrs · 9★)

#	Attribute	Core Question	Answer	Conf	Source
1	Usage occasion	<i>On what occasion do they reach for this?</i>	Triggered by a graded checkpoint: a problem set due, a cs231n midterm in 2 weeks, a fast.ai module, or quals prep	Inf · 64%	icp-summary + Kotler
★2	Benefit sought	<i>Which benefit do they most want?</i>	Durable mastery that survives the exam: explain-it-back, solve unseen problems, connect concepts — not passive recall	Inf · 66%	icp-summary (mastery-over-grades)
3	Secondary benefits	<i>What additional benefits sweeten it?</i>	Time-compression on material creation (auto-quizzes from a 60-pg PDF), confidence, one stack replacing Anki+Quizlet+ChatGPT	Inf · 64%	product.md §6 + substitution stack

#	Attribute	Core Question	Answer	Conf	Source
4	User status	<i>What is their relationship to the category today?</i>	First-time / early-trial at true-zero: 25 profiles, 24 non-founder, ZERO real paying — engaged but unconverted	Obs · 88%	analytics (25 profiles, 0 paid)
★5	Usage rate	<i>How intensely would they use it?</i>	Bimodal: a heavy-mastery tail (36 sessions/42 sources; 10 sessions/4 sources) above a light-trial body; mean ~26 sessions/user	Obs · 84%	analytics (656 sessions/25 users)
★6	Loyalty status	<i>How loyal are they to current tools?</i>	Unproven, shifting: engagement real but no organic referral, no payment; loyalty rests on recurring-deadline cadence, undemonstrated	Hyp · 42%	analytics (0 organic share) + R1
★7	Buyer-readiness stage	<i>How ready are they to buy right now?</i>	Aware + engaged (Act) but pre-Conversion: nobody has hit-and-paid-through a hard limit; the N=10 watch must move Act→Pay	Inf · 58%	Kotler 5A + R1
8	Decision frequency	<i>How often do they reconsider their tools?</i>	Subscribe-decision term-gated: re-evaluated each course/semester (~2–4×/yr) at the next graded deadline	Hyp · 50%	icp-summary (deadline trigger)
9	Seasonality of use	<i>What calendar spikes their usage?</i>	Sharp spikes at midterm weeks (Oct/Mar), finals (Dec/May), quals windows, cohort-launch dates — trough over breaks	Inf · 64%	Kotler Ch7 + calendar
10	Session length	<i>How long is one sitting with the tool?</i>	Long deep blocks: 30–90 min/session implied by 656 sessions absorbing 756 sources + 3329 generated units	Inf · 60%	analytics (units/session ratio)
★11	Session cadence	<i>How often do they come back?</i>	Multi-session-per-source revisit (42 sources across 36 sessions) — returns to the same material to drill: the mastery tell	Obs · 84%	analytics (revisit ratio)
12	Time of day	<i>What hours do they study/use?</i>	Evening/late-night blocks + pre-class cramming windows; weekend long-form review — student maker-schedule	Hyp · 46%	JTBD (student rhythm)
13	Multi-tasking	<i>Do they use it solo or in a stack?</i>	Solo deep-focus, single-source-at-a-time; Ritsu as the primary surface replacing a tab-stack, not run alongside	Inf · 58%	product.md (replaces stack)
★14	Trial behavior	<i>How do they trial a new tool?</i>	Uploads a real high-stakes doc first session (PDF 63% / YouTube 16%) to test the <60s magic moment — dense, not a toy file	Obs · 84%	analytics (live.sources mix)
15	Feature-adoption pattern	<i>Which feature hooks them first?</i>	Quiz + flashcard hook first (active recall); mindmap/Knowledge-Map + heatmap adopted later as mastery-tracking matters	Inf · 60%	product.md §6.2 + JTBD
★16	Abandonment triggers	<i>What makes them drop off?</i>	A hallucinated/wrong quiz (kills #1 accuracy bar) or hitting Free's 40-page/5-session wall mid-course with NotebookLM-free as the off-ramp	Inf · 62%	product.md §6.7 + R2
17	Reactivation triggers	<i>What would pull them back?</i>	The next graded deadline (new midterm/course) + a 7-day-silence nudge tied to an unfinished learning path	Hyp · 50%	icp-summary + SOP-CUSTOMER-014
★18	Referral behavior	<i>Do they tell friends, and how?</i>	Latent, unproven: share mechanism works (15 shares) but ALL founder — zero organic stranger referral observed	Obs · 88%	analytics (15 shares, all founder)
19	Review behavior	<i>Will they leave a public review?</i>	Rigor-respecting, skeptical: validates accuracy before trusting; posts in r/learnmachinelearning / #studytwit only after the tool proves it isn't a gimmick	Hyp · 46%	icp-summary
★20	Content-consumption	<i>How do they consume content?</i>	Dense multi-session inputs: PDF 63% (textbooks/papers) + long-form YouTube 16% (lectures) + URL 9% + slides/code	Obs · 86%	analytics (ex-founder mix)

#	Attribute	Core Question	Answer	Conf	Source
★21	Sharing behavior	<i>Do they share results with peers?</i>	Generates share-links (15 total) — study-group/cohort sharing is the intended viral loop, strangers-referral UNPROVEN beyond founder	Obs · 86%	analytics (shares=15, founder-only)
22	Switching frequency	<i>Are they tool-loyal or tool-promiscuous?</i>	Low intra-course (sunk-cost of generated units + cross-session memory), but high pre-commitment shopping vs NotebookLM/Anki	Hyp · 50%	R2 + switching-cost inference
★23	First-session behavior	<i>Do they hit the magic moment in session #1?</i>	They upload a real dense doc immediately and the first-quiz aha is make-or-break; a weak first generation on hard math = instant churn	Obs · 82%	analytics (dense first uploads) (VI-added)
★24	7-day re-upload proxy	<i>Do they upload a 2nd source within 7 days?</i>	THE strongest observable retention signal — a 2nd upload within 7 days = mastery intent (top users 42src/36sess); the N=10 watch instruments it	Obs · 84%	analytics; SOP-PRODUCT-002 (VI-added)

S7 · Customer Journey (5A summary)

(Kotler Ch14 Aware→Appeal→Ask→Act→Advocacy · 16 attrrs · 6★ — full journey in [customer-journey.md](#) / [customer-journey.pdf](#))

#	Attribute	Core Question	Answer	Conf	Source
1	Awareness source	<i>How do they first become aware?</i>	Reddit (r/learnmachinelearning, r/MachineLearning ~3.1M; r/cs231n, r/MLQuestions) + a study-science YouTuber clip (Sung/Abdaal)	Inf · 62%	deep-research; icp-summary channels
2	Appeal trigger	<i>What makes them go "oh, I like this"?</i>	"Upload your cs231n PDF/lecture → a structured multi-week path + active recall in 30s," reframing the FALSE "I'm not a math person"	Inf · 62%	icp-summary; Kotler Appeal
★3	Ask behavior	<i>How much do they investigate before buying?</i>	Heavy comparison: Reddit + YouTube demos + side-by-side vs NotebookLM/Anki/ChatGPT; hunts "does it hallucinate quizzes?"	Inf · 60%	JTBD; NotebookLM scan; SERVQUAL
★4	Act trigger	<i>What single thing makes them act?</i>	Sign-up: a real midterm/final/qualifier deadline. Pay: hitting the Free 600-credit/40-page wall mid-dense-PDF, deadline live	Hyp · 44%	locked WTP trigger; R1
★5	Advocacy behavior	<i>What makes them recommend it onward?</i>	Drops a share-link in their cohort Discord/group chat; mechanism works but ZERO organic stranger shares yet	Obs · 86%	analytics (15 shares all founder)
6	Journey duration	<i>How long is their path to buy?</i>	Long, deadline-paced: 3–14 days awareness→sign-up; convert-to-pay aligns to the multi-week course arc	Inf · 58%	analytics sustained pattern
7	Touchpoint count	<i>How many touches before they convert?</i>	6–9: Reddit/YT clip → landing → magic-moment demo → 1–3 upload sessions → free-limit wall → pricing → pay	Hyp · 48%	analytics; 5A funnel
8	Pre-purchase content	<i>What content do they consume before paying?</i>	"X vs Ritsu" thread; YT cs231n walkthrough; landing 30s-path demo; accuracy proof; pricing explainer; activity gallery; creator endorsement; free trial; a peer's share-link	Inf · 58%	icp-summary channels; Kotler content audit
★9	Drop-off points	<i>Where do they typically drop off?</i>	After magic-moment but before 2nd upload (no live deadline → no urgency); at pricing (\$29 vs free NotebookLM); soft-WTP reach-layer churns here	Hyp · 46%	analytics; R1; NotebookLM-free
10	Friction points	<i>What friction do they hit?</i>	First-upload quality on dense math PDFs (LaTeX/figures); credit-meter anxiety mid-PDF; "is this just ChatGPT?"; no social proof at true-zero	Inf · 60%	analytics PDF 63%; SERVQUAL

#	Attribute	Core Question	Answer	Conf	Source
★11	Micro-conversions	<i>What small commitments precede paying?</i>	first upload → first path → first quiz → first revisit (session 2 = mastery) → first concept-map view → first share-link	Obs · 82%	analytics (656 sessions, 3329 units, 15 shares)
★12	Moment of truth	<i>What single moment decides it?</i>	First graded quiz on their OWN cs231n material returns accurate, source-cited questions that find a real gap	Inf · 62%	SERVQUAL accuracy #1
★13	Activation event (<60s)	<i>What is the magic moment for them?</i>	Upload dense lecture PDF → ~30s a structured path + first auto-generated quiz: "it built my whole study plan from my file"	Obs · 84%	analytics 30s path / 3329 units
14	Post-purchase emotion	<i>How do they feel after they pay?</i>	Relieved + capable ("I can actually master this before the deadline") — fragile if NotebookLM offers same free	Hyp · 46%	icp-summary; R2 (NotebookLM Apr-2026)
15	First-touch channel	<i>Which channel is the very first touch (for attribution)?</i>	A Reddit thread or a study/ML YouTube clip is usually first; a peer's Discord share-link is the warmest. Instrument first-touch for channel attribution (SOP-GTM-009)	Inf · 58%	channels; SOP-GTM-009 (VI-added)
16	Onboarding need	<i>Do they need a hand-onboard (Collison) or self-serve?</i>	First ~30 paying = founder hand-onboards (Collison install, SOP-CUSTOMER-006); the <60s magic moment is self-serve enough to automate scale onboarding from N=31	Inf · 60%	SOP-CUSTOMER-006 (VI-added)

S8 · BRAVO Positioning Fit

(5-Star Module 01 — Brand/Reason/Audience/Voice/Offering · 14 attrs · 7★)

#	Attribute	Core Question	Answer	Conf	Source
1	Brand fit	<i>Does the brand feel made for them?</i>	Strong: "active mastery, AI-leveraged" maps 1:1 to a deadline-bearing masterer who wants to be sharper, not have AI do the work	Inf · 66%	icp-summary; 5-Star Brand
2	Brand promise expected	<i>What promise must the brand make?</i>	"I'll actually understand this hard course before the midterm" — durable comprehension, not a crammed pass that evaporates	Hyp · 48%	JTBD; icp-summary
3	Reason-for-existing fit	<i>Does the company's why align with theirs?</i>	High: Ritsu exists to automate the painful part of active learning (making materials) so they spend time mastering — exactly this user's bottleneck	Inf · 66%	product.md §4
★4	Audience inclusion	<i>Why are they clearly our audience?</i>	Clearly ours: uploads dense PDFs + long ML videos, revisits heavily (42 sources/36 sessions)	Obs · 86%	analytics live.sources/sessions
5	Audience exclusion	<i>Are they in or explicitly out?</i>	NOT the one-shot crammer who churns post-exam, nor the casual browser with no graded deadline	Inf · 66%	locked wedge; cram-churn
6	Voice fit	<i>What tone earns their trust?</i>	Excellent: calm/rigorous/no-hype voice earns trust from a learner who distrusts gimmicks and respects rigor	Inf · 66%	icp-summary; brand_voice.md
★7	Offering fit	<i>Does what we sell match what they need?</i>	Strong: structured PATH + 17 activities + Knowledge Map serve a hard multi-week course; Plus \$29 vs \$25–100 stack	Inf · 64%	product.md; pricing

#	Attribute	Core Question	Answer	Conf	Source
8	Positioning congruence	<i>Does the whole posture feel congruent?</i>	High: every BRAVO element points the same way — rigor, mastery, anti-gimmick — no internal contradiction	Inf · 64%	5-Star Module 01
★9	Differentiation perceived	<i>Why us over the alternative, in their words?</i>	"NotebookLM gives me quizzes/flashcards free — Ritsu gives the ordered multi-week PATH, 17 activity types, and concept-level mastery map it doesn't"	Inf · 64%	NotebookLM scan 2026
★10	Proof required	<i>What proof makes the claim credible?</i>	Accuracy receipts (no hallucinated quizzes on cs231n/orgo) + a visible mastery-progression heatmap they trust as real	Hyp · 48%	SERVQUAL §6.7
11	Before/after narrative	<i>What before→after story do they buy?</i>	Before: re-reading the same dense chapter, "not a math-science person." After: quizzed/explaining-back, the concept map fills in — "I get it"	Inf · 62%	icp-summary; product.md §7
12	Objection to position	<i>Why might they not believe our position?</i>	"Isn't this just ChatGPT/NotebookLM with a skin?" — answer with PATH + mastery-tracking + learning-science, not feature parity	Inf · 62%	NotebookLM scan; R2
★13	Message-market match	<i>What one line makes them lean in?</i>	"Turn your hardest course into a structured path that makes you master it before the deadline — not just cram it"	Hyp · 48%	locked wedge; positioning.md
14	Category frame	<i>What box do they put us in?</i>	"Personal AI mastery system for a hard course" — NOT a chatbot, flashcard app, or course platform; a structured-mastery loop	Inf · 64%	product.md §5; positioning.md

S9 · Channels & 'Locations'

(5-Star Traffic Lasso — Locations first · 18 attrs · 7★ — the deep per-platform ad map is S9-A below)

#	Attribute	Core Question	Answer	Conf	Source
★1	Primary platform	<i>Where do they spend most time online?</i>	Reddit — the default first-stop for course-specific Q&A, syllabus help, "how do I actually master this" threads	Inf · 64%	icp-summary; deep-research
2	Secondary platforms	<i>Where else do they hang out?</i>	YouTube (lecture rewatch — 16–17% of uploaded material), X/#studytwt, course Discords; PDF readers as the work surface	Obs · 80%	analytics (YouTube 16–17%)
★3	Communities	<i>Which communities are they in?</i>	r/learnmachinelearning, r/MachineLearning (~3.1M), r/cs231n, r/learnpython, r/GradSchool, fast.ai forums + per-cohort Discords (full list: S9-A)	Inf · 62%	WebSearch (r/ML 3.1M)
4	Influencers followed	<i>Who do they listen to?</i>	Study-science: Justin Sung, Ali Abdaal, Thomas Frank. ML: 3Blue1Brown, StatQuest, Andrej Karpathy, Andrew Ng, Jeremy Howard (full list: S9-A)	Inf · 62%	WebSearch; S9-A
5	Content formats	<i>What content format do they prefer?</i>	Long-form lecture video, dense PDF/slide decks, worked-problem walkthroughs, "how I studied for X" breakdowns, code notebooks	Obs · 82%	analytics (PDF 59–63% + YT + pptx + code)
★6	Search keywords	<i>What do they literally search for?</i>	"cs231n assignment help", "how to actually learn machine learning", "spaced repetition for STEM", "Andrew Ng notes quiz", "how to study for qualifying exams"	Inf · 60%	JTBD; deep-research
7	Search intent	<i>What are they really trying to find?</i>	Problem-solving + mastery-method intent ("I'm stuck / I keep forgetting / how do I retain this") — deadline-driven urgency	Inf · 60%	icp-summary; JTBD

#	Attribute	Core Question	Answer	Conf	Source
★8	Discovery channel	<i>Where would they find us first?</i>	Organic search + community recommendation (Reddit thread, Discord drop, creator mention); share-links the planted seed once strangers convert	Hyp · 48%	Kotler 5A; analytics (15 founder shares)
9	Trusted info sources	<i>Whom do they trust for recommendations?</i>	The course's own materials + the professor, top Reddit/forum answers, named study-science creators; distrusts "AI does it for you" gimmicks	Inf · 62%	icp-summary
★10	Peer network	<i>Who do they ask before trying a tool?</i>	Coursemates / cohort-mates / study-group peers facing the SAME graded deadline — the natural recipients of a shared quiz/Knowledge Map	Hyp · 46%	locked wedge (deadline cohort)
11	Offline locations	<i>Any offline place that matters?</i>	University libraries, dorm/apartment study desks, lab sessions, coffee-shop cram sessions, bootcamp classrooms — solo deep-work	Hyp · 42%	persona inference
12	Ad-channel match	<i>Which paid channel matches their location?</i>	Reddit promoted posts in ML/STEM subs + YouTube pre-roll on lecture/study-method videos + X #studytwit promoted — match intent (see S9-A for exact placements)	Inf · 62%	Ritsu channels; Traffic Lasso; S9-A
13	Channel we avoid	<i>Which channels are a waste here?</i>	Intent-less mass-blasts (general feed TikTok/IG/Facebook, cold LinkedIn) waste budget — but PRECISELY-targeted placements on study/ML creators + communities DO convert (S9-A). Avoid the broad reach, not the platform	Inf · 58%	locked wedge; S9-A
14	Device for discovery	<i>Do they discover on phone, buy on laptop?</i>	Laptop/desktop — the upload-dense-PDF-then-study workflow is keyboard-and-big-screen; mobile only for video	Obs · 82%	analytics (PDF-heavy, revisit)
15	Preferred content length	<i>Short hit or deep dive?</i>	Long where it earns it: 40–90 min lectures, multi-chapter PDFs — but values the <60s magic moment as the proof hook	Obs · 80%	analytics; Ritsu spec
★16	Virality mechanism	<i>How would this spread within the segment?</i>	Share-link of a generated quiz / Knowledge Map to coursemates ("try this on the midterm material") — works mechanically; unproven on strangers	Obs · 84%	analytics (15 shares, 0 organic)
17	Beta-recruit channel	<i>Where can we hand-recruit the first N testers?</i>	Hand-recruit the N=10 from r/learnmachinelearning, fast.ai forums, course Discords/Slacks, #studytwit — each tester mid-course with a live deadline (Collision-install, SOP-PRODUCT-002)	Inf · 62%	SOP-PRODUCT-002 (VI-added)
18	Creator-partnership fit	<i>Which creators could we co-build with, at what scale?</i>	High-fit, mid-scale: learning-science creators (Justin Sung ~195K, Ali Abdaal slice) + ML educators (StatQuest, Krish Naik) — authority > raw reach for this skeptical audience; sponsor/co-build, not mass-blast	Inf · 58%	S9-A (VI-added)

S9-A · Ad-Targeting Channel & Location Map — v2 (broadened + scored)

Version 2 (2026-06-06) — broadened beyond AI/ML to the full *University Mastery with AI* surface: all STEM (math, physics, chemistry, biology, engineering, CS), pre-med/medicine, economics/finance/business, and — the **highest-fit bucket** — learning-method / study-skills / learning-productivity channels. Existing v1 sources are merged in, every source carries a **Suitable score (0-100)** predicting its fit, and each platform's list is **ranked + numbered by that score (best first)**. NEW v2 sources are flagged. **Total: 628 sources** (262 v1 + 366 net-new v2). Score bands: 95-100 learning-method · 88-94 on-persona hard-STEM · 80-87 pre-pro/dense-exam · 72-79 exam-prep · 62-71 general-learning. Cat : learning-

method / cs-ml / stem-core / med-health / econ-business / exam-prep / general-learning. Paste straight into ad managers (Discord/forums = the organic recruiting map).

Top 25 sources overall (by suitable score)

#	Score	Source	Platform	Why	Cat
1	99	Justin Sung youtube.com/@JustinSung	YouTube	Highest-fit channel: a learning-science coach whose entire audience is committed learners trying to replace passive re-reading with active, durable methods — Ritsu's exact thesis.	learning-method
2	99	Thomas Frank youtube.com/@Thomasfrank	YouTube	Study-and-productivity channel built on exam-prep and note-taking systems; his viewers are students explicitly trying to study more effectively for graded courses.	learning-method
3	99	r/Anki reddit.com/r/Anki/	Reddit	These users have already adopted spaced repetition and feel the pain of manual card creation — the exact substitute Ritsu auto-generates from a source.	learning-method
4	99	r/GetStudying reddit.com/r/GetStudying/	Reddit	The largest study-method community; members are explicitly seeking better active-study techniques after being burned by passive re-reading.	learning-method
5	99	r/Notion reddit.com/r/Notion/	Reddit	Students using Notion for note storage are the passive-study substitute Ritsu replaces; high overlap with method-seeking learners.	learning-method
6	99	Ali Abdaal (account) @AliAbdaal — https://x.com/AliAbdaal	X (Twitter)	Ex-doctor, #1 productivity/study creator whose audience is students seeking evidence-based study techniques (active recall, spaced repetition) for exams.	learning-method
7	99	Cal Newport (account) @calnewport — https://x.com/calnewport	X (Twitter)	CS professor and 'Deep Work' / 'How to Become a Straight-A Student' author; his audience is serious students optimizing study and focus for hard courses.	learning-method
8	99	Quizlet (official Page) facebook.com/quizlet/	Facebook	Quizlet's audience is students who already pay for flashcard/quiz study — Ritsu's direct substitute, so its followers are pre-qualified active-study buyers.	learning-method
9	99	Ali Abdaal instagram.com/aliabdaal/	Instagram	The reference 'evidence-based study technique' creator (active recall, spaced repetition) — his audience already believes active beats passive, Ritsu's core thesis.	learning-method
10	99	revisign instagram.com/revisign/	Instagram	Flagship medical-student studygram (Toronto) producing study notes/aesthetics — the deadline-driven note-maker persona Ritsu automates.	learning-method
11	99	sprinkle studies instagram.com/sprinklestudies/	Instagram	American nursing-student studygram documenting a graded, deadline-heavy program — US-led, on-persona serious learner converting material to practice.	learning-method
12	99	Justin Sung (Dr Justin Sung) tiktok.com/@justinsungofficial	TikTok	A medical doctor and learning-science specialist who preaches active learning over passive re-reading — the EXACT belief Ritsu sells, attracting the rigor-seeking learner.	learning-method
13	99	StudyQuill (Jasmine) tiktok.com/@studyquill	TikTok	Well-known study-method creator covering note-taking and effective studying for serious students — strong StudyTok credibility.	learning-method
14	99	Barbara Oakley, PhD (Learning How to Learn) linkedin.com/in/barbaraoakley/	LinkedIn	Creator of 'Learning How to Learn' — owns the exact learning-science angle (active beats passive recall) that resonates with a learner burned by re-reading and re-watching.	learning-method

#	Score	Source	Platform	Why	Cat
15	99	Ken Jee linkedin.com/in/kenjee/	LinkedIn	Runs the #66DaysOfData challenge and data-science learning content — directly mobilizes deadline/streak-driven self-learners, mirroring Ritsu's streak and active-practice loop.	learning-method
16	99	Deep Questions with Cal Newport podcasts.apple.com/us/podcast/deep-questions-with-cal-newport/id1515786216	Podcasts	Hosted by a CS professor; the definitive show on deep work, focus, and student productivity — its audience self-selects as serious, deadline-driven learners frustrated by shallow study, the core Ritsu buyer.	learning-method
17	99	Ali Abdaal's Newsletter (LifeNotes / Sunday Snippets) aliabdaal.com/newsletter/ (also Substack: aliabdaal.substack.com)	Newsletters / Substack	The definitive study-skills/evidence-based-learning audience (Abdaal built his brand on active recall + spaced repetition for med/exam study) — the exact psychographic of the serious learner burned by passive study.	learning-method
18	99	r/GetStudying reddit.com/r/GetStudying/	Forums & communities	The largest study-method community — learners burned by passive re-reading/re-watching looking for active-recall systems, the exact pain Ritsu solves.	learning-method
19	98	Dr Justin Sung (account) @JustinSung	X (Twitter)	The #1 'how to learn' studying coach — his entire audience is serious learners hunting research-based active-learning methods, Ritsu's exact belief.	learning-method
20	97	Benjamin Keep, PhD JD youtube.com/@benjaminkeep	YouTube	A Stanford learning-sciences PhD who makes rigorous, evidence-based videos on developing expert reasoning and learning faster — his audience is the accuracy-and-rigor-respecting serious learner who is skeptical of shortcuts, mirroring Ritsu's skeptical-but-method-hungry persona.	learning-method
21	97	r/GetStudying r/GetStudying (https://www.reddit.com/r/GetStudying/)	Reddit	The canonical home of deadline-bearing students sharing study schedules, exam-cram plans, and 'how do I actually master this before my test' threads — exactly Ritsu's persona.	learning-method
22	97	The Learning Scientists Podcast learningscientists.org/learning-scientists-podcast/	Podcasts	Hosted by cognitive scientists who teach the exact methods Ritsu automates: retrieval practice, spaced practice, interleaving, dual coding, elaboration.	learning-method
23	96	r/Anki r/Anki (https://www.reddit.com/r/Anki/)	Reddit	Anki users are the most committed spaced-repetition / active-recall practitioners — they already do active learning manually and feel the pain of building cards Ritsu automates.	learning-method
24	96	r/studytips r/studytips (https://www.reddit.com/r/studytips/)	Reddit	Members are explicitly hunting for better study methods to master graded material — the audience already believes the 'there must be a smarter way to study' premise Ritsu sells.	learning-method
25	96	Justin Sung (account) @justinsungofficial — https://x.com/justinsungofficial	X (Twitter)	The '#1 studying coach' focused on active learning and effective encoding — his audience is learners deliberately upgrading how they study for hard material.	learning-method

Per-platform summary

Platform	Sources (v1+new)	Avg score	Top-scored	Primary mechanism
YouTube (channels)	56 (+26)	86	Justin Sung (99)	YouTube Ads — managed-placement (channel) + custom-intent + topics
Reddit (subreddits)	74 (+44)	83	r/Anki (99)	Reddit Ads — community (subreddit) + keyword targeting
X (Twitter) (accounts & hashtags)	72 (+42)	86	Ali Abdaal (account) (99)	X Ads — follower look-alike + keyword + handle targeting
Facebook (groups & pages)	74 (+44)	84	Quizlet (official Page) (99)	Meta Ads — detailed-interest + group-adjacent + lookalike

Total: 628 ranked, ad-targetable sources across 11 platforms.

YouTube — channels (56, ranked by suitable score)

Ad mechanism: YouTube Ads — managed-placement (channel) + custom-intent + topics.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Justin Sung youtube.com/ @JustinSung	~195K subscribers	Highest-fit channel: a learning-science coach whose entire audience is committed learners trying to replace passive re-reading with active, durable methods — Ritsu's exact thesis.	Managed-placement in-stream on this channel (small but laser-targeted); his 'learn faster', 'active learning', 'study less study smart' video URLs make an ideal custom-intent seed list.	learning-method
2	99	Thomas Frank youtube.com/ @Thomasfrank	~2.9M subscribers	Study-and-productivity channel built on exam-prep and note-taking systems; his viewers are students explicitly trying to study more effectively for graded courses.	Placement targeting on the channel; isolate study intent with custom-intent keywords ('study tips for finals', 'note taking method', 'how to remember what you read').	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
3	97	Benjamin Keep, PhD JD youtube.com/ @benjaminkeep ·NEW	~150K-250K subscribers	A Stanford learning-sciences PhD who makes rigorous, evidence-based videos on developing expert reasoning and learning faster — his audience is the accuracy-and-rigor-respecting serious learner who is skeptical of shortcuts, mirroring Ritsu's skeptical-but-method-hungry persona.	Smaller but extremely high-purity managed placement; perfect for a creator-read sponsorship or organic seeding because his fans trust learning-science claims and will scrutinize (and reward) Ritsu's citation/accuracy framing.	learning-method
4	95	Cajun Koi Academy (Koi) youtube.com/ c/ CajunKoiAcademy ·NEW	~1.3M subscribers	Founded by physician brothers, the channel simplifies complex science and systems and teaches 'Learning & Mastery' and digital productivity — directly aligned with turning dense material into true mastery.	Managed-placement on this channel plus a custom-intent audience seeded with 'learning and mastery' / 'study system' queries; the med-doctor founders give credibility for med/STEM crossover targeting.	learning-method
5	95	Mariana's Study Corner youtube.com/ @MarianasStudyCorner ·NEW	~510K subscribers	A medical/serious student sharing study methods, active-recall, and exam-prep workflows — squarely the deadline-bearing masterer turning dense material into practice.	High-fit managed placement in the audience-size sweet spot; ideal for a creator collaboration because her audience is dense-material students (med/STEM) who need quiz/flashcard generation exactly like Ritsu's.	learning-method
6	94	Ali Abdaal youtube.com/ @aliabdaal	~6.6M subscribers	The largest study-productivity audience — ex-medic whose viewers are exam-driven students seeking evidence-based study methods, the self-identified 'serious learner' Ritsu targets.	Placement targeting on the channel; layer custom-intent keywords ('how to study for exams', 'active recall', 'spaced repetition') to isolate the exam-prep slice of his broad audience.	learning-method
7	92	Andrej Karpathy youtube.com/ @AndrejKarpathy	~806K subscribers	His 'Neural Networks: Zero to Hero' / 'building makemore & GPT' lectures are de-facto coursework for serious ML self-learners — long, dense video they study from, not entertainment.	Managed placement on this channel and its lecture-series videos; custom-intent seeds 'Karpathy nanoGPT', 'build GPT from scratch', 'neural networks zero to hero'.	cs-ml
8	92	CodeEmporium (Ajay Halthor) youtube.com/ @CodeEmporium	~130K subscribers	Implements transformers, GANs and LLMs in plain Python with explanation — niche but exactly the deep-learning student who needs active practice on dense material.	Managed-placement in-stream on this channel; custom-intent keywords 'transformer from scratch', 'attention is all you need explained', 'deep learning in python'.	cs-ml
9	92	DeepLearning.AI (Andrew Ng) youtube.com/ @Deeplearningai	~600K subscribers	Official channel for the most popular paid ML curriculum (DeepLearning.AI / Coursera specializations) — viewers are enrolled, deadline-bearing ML course-takers by definition.	Placement targeting on the channel; build custom-intent from 'Andrew Ng', 'deep learning specialization', 'machine learning course' searches to reach learners mid-course.	cs-ml
10	92	IBM Technology youtube.com/ @IBMTechology	~1M+ subscribers	Concise AI/ML/LLM concept explainers used by professionals and students upskilling on machine-learning fundamentals — the professional career-changer persona.	Placement targeting on the channel; custom-intent keywords 'what is machine learning', 'LLM explained', 'AI fundamentals' to reach upskilling professionals.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
11	92	Krish Naik youtube.com/ @krishnaik06	~1.4M subscribers	End-to-end data-science/ML tutorials and roadmaps for learners working toward a job or completing a cohort — practical, course-style content for committed ML students.	Placement targeting on the channel; custom-intent from his 'machine learning roadmap', 'data science interview', 'end to end ML project' videos to catch goal-driven learners.	cs-ml
12	92	sentdex (Harrison Kinsley) youtube.com/ @sentdex	~1.3M subscribers	Hands-on Python/ML/neural-net tutorial series that learners follow as coursework to master deep learning — code-exercise-heavy, exactly Ritsu's engineer wedge.	Placement targeting on the channel and its 'Neural Networks from Scratch' / 'Python ML' series; custom-intent keywords 'learn machine learning python', 'neural network tutorial'.	cs-ml
13	92	Serrano.Academy (Luis Serrano) youtube.com/ @SerranoAcademy	~150K subscribers	Friendly-but-rigorous ML & math explainers (neural nets, transformers, linear algebra) for learners who want to genuinely understand the math behind an ML course.	Managed-placement in-stream on this channel; seed custom-intent with 'machine learning math', 'transformers explained', 'linear algebra for ML'.	cs-ml
14	92	StatQuest with Josh Starmer youtube.com/ @statquest	~1.6M subscribers	The go-to channel for ML/stats students cramming for graded data-science and ML courses — exactly the 'I need to truly get this concept before the exam' mindset Ritsu serves.	Managed-placement in-stream ads on this channel; clone its 'StatQuest', 'machine learning clearly explained', 'logistic regression' video URLs into a custom-intent campaign targeting active ML learners.	cs-ml
15	92	Two Minute Papers (Károly Zsolnai-Fehér) youtube.com/ @TwoMinutePapers	~1.6M subscribers	Research-paper-breakdown channel whose audience is ML students and researchers who routinely 'break down a dense research paper' — a named Ritsu situational workflow.	Placement targeting on the channel; mirror its audience with custom-intent keywords like 'research paper explained', 'AI paper summary', 'read ML papers'.	cs-ml
16	92	Yannic Kilcher youtube.com/ @YannicKilcher	~308K subscribers	Deep ML-paper walkthroughs for advanced students and grad-level learners decomposing dense research — directly the researcher persona's 'break down a paper' job.	Managed-placement in-stream on this channel; custom-intent seeds from his paper-review video URLs ('transformer paper explained', 'ML paper review') for advanced learners.	cs-ml
17	92	Med School Insiders youtube.com/ @MedSchoolInsiders ·NEW	~1.8M subscribers	Run by a physician, blends pre-med/med-school exam guidance (MCAT, USMLE, Step) with evidence-based study and productivity methods — a premium deadline-bearing pre-professional audience that values rigor and accuracy.	Managed placement is excellent: pre-meds/med students face the densest graded material and highest willingness to pay for study tools; pair with custom-intent ('MCAT study schedule', 'how to study anatomy', 'Step 1 prep').	med-health
18	91	Dr. Najeeb Lectures youtube.com/ @DrNajeebLectures ·NEW	~1.9M subscribers	The most-watched detailed medical-sciences lectures, used by med/dental/nursing/pharmacy students for USMLE, NCLEX, and board exams — densest possible graded material with high willingness to pay.	Premium managed placement; med students cramming dense lectures are the perfect Ritsu user (upload lecture, auto-generate quizzes/flashcards); layer custom-intent ('USMLE Step 1', 'physiology lectures').	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
19	91	Thomas Frank Explains youtube.com/@ThomasFrankExplains ·NEW	~3M subscribers (main channel)	Long-running study/learning creator focused on study tips, focus, and effective learning for students — a core 'how do I study this better' audience with strong exam-season intent.	Managed placement on his study-tips videos; pair with custom-intent on 'how to focus while studying' and 'study smarter' — viewers are mid-funnel and actively shopping for study tools.	learning-method
20	90	Andrew Ng (Stanford Online / personal lectures) youtube.com/@stanfordonline	~700K subscribers (Stanford Online)	Hosts full CS229/CS230 machine-learning and deep-learning lecture courses — the literal Stanford ML coursework the persona is enrolled in or shadowing.	Placement targeting on the channel and the CS229/CS230 lecture playlists; custom-intent keywords 'CS229', 'Stanford machine learning', 'CS231n lecture'.	stem-core
21	90	Computerphile youtube.com/@Computerphile	~2.6M subscribers	University-faculty-led CS explainers (algorithms, ML, theory) watched by CS undergrads supplementing graded coursework — the engineer/student personas.	Placement targeting on the channel; custom-intent seeds around 'computer science explained', 'how algorithms work', 'neural network explained' for CS course-takers.	stem-core
22	90	Gohar Khanalt / Mike Dane-style + Math Sorcerer youtube.com/@TheMathSorcerer	~700K subscribers	Channel about how to self-study rigorous math (real analysis, linear algebra) and survive proof-based courses — the committed STEM masterer who wants depth, not shortcuts.	Placement targeting on the channel; custom-intent keywords 'how to study math', 'self study linear algebra', 'real analysis' to reach proof-course STEM learners.	stem-core
23	90	Luke's Lab / Zach Star (engineering & math) youtube.com/@zachstar	~1.2M subscribers	Engineering-and-applied-math channel followed by STEM majors choosing and surviving rigorous courses — committed degree-seeking learners with graded deadlines.	Placement targeting on the channel; custom-intent keywords 'engineering math', 'how to study STEM', 'differential equations' to reach degree-seeking STEM students.	stem-core
24	90	Michel van Biezen (ilectureonline) youtube.com/@MichelvanBiezen	~1.4M subscribers	Massive library of bite-size physics, math and engineering lectures students use to master specific graded-course topics before exams.	Placement targeting on the channel and its physics/calculus playlists; custom-intent keywords 'physics exam help', 'engineering mechanics', 'circuit analysis problems'.	stem-core
25	90	PatrickJMT youtube.com/@patrickjmt	~1.4M subscribers	Just-Math-Tutorials channel that calculus and college-math students hit when stuck on graded homework or cramming for a test — pure deadline-driven STEM study.	Placement targeting on the channel; custom-intent keywords 'calculus help', 'derivative examples', 'math homework' to catch students mid-assignment.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
26	90	Professor Leonard youtube.com/ @ProfessorLeonard	~730K-800K subscribers	Full-length college calculus and statistics lectures that students watch alongside a graded math course — high-intent, deadline-bearing STEM learners.	Managed placement on the channel and its Calculus 1/2/3 + statistics playlists; custom-intent keywords 'calculus exam review', 'pass calculus', 'statistics course'.	stem-core
27	90	Stanford CS231n / Stanford NLP (course channels) youtube.com/ @stanfordonline (CS231n & CS224n playlists)	lecture playlists with 100K-1M+ views each	The exact named-in-brief courses (CS231n vision, CS224n NLP) the ML persona is enrolled in — highest possible intent match for deadline-bearing ML coursework.	Managed placement on the specific CS231n/CS224n lecture videos; custom-intent audience built from 'CS231n', 'CS224n', 'convolutional neural networks course' searches.	stem-core
28	90	Ninja Nerd youtube.com/ @NinjaNerdOfficial •NEW	~3M subscribers	In-depth medical and biology lectures (with paid notes, quizzes, flashcards) for med, nursing, and health-science students preparing for board exams — directly overlaps Ritsu's active-practice value, at scale.	Excellent managed placement; their audience already pays for quizzes/flashcards, proving willingness to pay for active-study tools — strong message-match for Ritsu; pair with custom-intent ('anatomy and physiology', 'nursing school study').	med-health
29	87	3Blue1Brown (Grant Sanderson) youtube.com/ @3blue1brown	~8.3M subscribers	The canonical visual-intuition channel for linear algebra, calculus and neural-network math that cs231n/CS229/DeepLearning.AI students watch to actually understand what their course is teaching.	Use YouTube placement targeting (managed placements) on this exact channel for in-stream ads; also feed its video URLs into a custom-intent audience and mirror its math/neural-net keywords as topic targets.	cs-ml
30	87	The Organic Chemistry Tutor youtube.com/ @TheOrganicChemistryTutor	~5M+ subscribers	Pre-med, chem and physics students binge this the week before a graded exam — peak 'dated deadline + dense material' moment where Ritsu turns the lecture PDF into active quizzing.	Managed placement on this channel; build a custom-intent audience from its exam-review video URLs ('final exam review', 'orgo reactions') to catch viewers in active cram mode.	stem-core
31	87	blackpenredpen youtube.com/ @blackpenredpen •NEW	~1.2M subscribers	University-level calculus and math problem-solving for students who want to genuinely master hard math, not just pass — a rigor-respecting STEM audience.	Managed placement on his calculus/problem-solving videos; pair with topic targeting (Mathematics) and custom-intent ('calculus practice problems') to reach committed math students.	stem-core
32	86	UnJaded Jade youtube.com/ @UnJadedJade •NEW	~500K-560K subscribers	School/study creator focused on revision, exam prep, and study motivation for committed students facing graded exams — a high-intent study-method audience.	Managed placement on her revision/exam videos; combine with custom-intent on 'A-level revision', 'exam study plan' to target deadline-bearing students; good audience-size sweet spot.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
33	85	Khan Academy youtube.com/ @khanacademy	~9.4M subscribers	The largest STEM-course audience on YouTube — calculus, physics, chem, bio learners following along with a graded school course, the textbook-chapter-to-mastery job Ritsu automates.	Placement targeting on the channel plus its calculus/orgo/physics playlists; pair with custom-intent keywords like 'ace my calculus exam' and 'study for chem test'.	stem-core
34	85	MIT OpenCourseWare youtube.com/ @mitocw	~6M subscribers	Full university lecture series (6.S191, 18.06 linear algebra, 6.034 AI) — the most-subscribed .edu channel; viewers are following rigorous, graded-equivalent STEM courses.	Placement targeting on the channel and specific course playlists (linear algebra, intro to deep learning); pair with custom-intent keywords for those exact course codes.	stem-core
35	84	AK Lectures youtube.com/ @AKLECTURES •NEW	~500K-700K subscribers	Biochemistry, biology, and chemistry lectures for pre-med/MCAT and university science students mastering dense graded material — a focused pre-professional STEM audience.	High-purity managed placement in the sweet spot; ideal for MCAT/biochem targeting; layer custom-intent ('MCAT biochem', 'biochemistry lectures') for deadline intent.	med-health
36	84	Marginal Revolution University (MRU) youtube.com/ @marginalrevolution •NEW	~70K-100K subscribers	University-grade micro/macroeconomics taught by professional economists; students use it to master graded econ courses — exactly the dense-coursework econ masterer.	Small but extremely on-topic managed placement; combine with topic targeting (Economics) and custom-intent ('microeconomics course', 'macro exam') — purity over reach.	econ-business
37	84	Professor Dave Explains youtube.com/ @ProfessorDaveExplains •NEW	~3M subscribers	Broad, rigorous coverage of chemistry, biology, physics, and math for high-school and university students mastering science coursework — a wide hard-STEM masterer audience.	Managed placement across his science playlists; combine with topic targeting (Chemistry, Biology, Physics) for course-bound students; broad subject coverage = flexible custom-intent layering.	stem-core
38	84	TheStrive Studies youtube.com/ c/ TheStriveStudies •NEW	~335K subscribers	Real-time 'study with me' and study-motivation channel whose viewers are actively sitting down to grind through course material before deadlines — a captive deadline-bearing-learner audience.	Managed placement on long study-with-me sessions (high watch-time, low CPM); viewers are literally studying while watching, an ideal moment to surface a tool that builds quizzes from their material.	learning-method
39	83	Eddie Woo (Wootube) youtube.com/ @misterwootube •NEW	~1.9M subscribers	High-school and early-university math taught by an award-winning teacher; viewers are exam-bound students working to master graded math content.	Managed placement; skews high-school so combine with custom-intent on exam-board queries; strong for reach into younger deadline-bearing math learners.	stem-core
40	83	Mike & Matty youtube.com/ @MikeAndMatty •NEW	~500K-700K subscribers	The physician brothers behind Cajun Koi run this channel on learning, productivity, and self-improvement for ambitious students and professionals — a learning-method and mastery-mindset audience.	Managed placement plus custom-intent ('how to learn anything', 'study productivity'); credible med-doctor hosts make it a good creator-collaboration fit for Ritsu's rigor framing.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
41	82	Tibeas youtube.com/ @tibeas ·NEW	~1.3M subscribers	Physics and math explainer (incl. exam-paper walkthroughs) for curious, rigor-loving STEM students — a mastery-and-accuracy-respecting audience.	Managed placement; her 'reacting to exam papers' content signals exam intent — seed there and layer custom-intent on physics/math exam queries.	stem-core
42	80	Gohar Khan youtube.com/ @goharsguide	~600K subscribers	MIT-grad study/exam-prep coach whose audience is ambitious students optimizing for grades and admissions — high overlap with the committed-masterer ICP.	Placement targeting on the channel; custom-intent keywords 'how to get straight A's', 'study for exams', 'memorize faster' to capture exam-driven students.	exam-prep
43	80	NeetCode youtube.com/ @NeetCode	~900K subscribers	CS students and bootcampers grinding algorithms for graded data-structures courses and coding-interview deadlines — high-intent, deadline-bearing, accuracy-obsessed learners.	Placement targeting on the channel; custom-intent keywords 'leetcode prep', 'data structures and algorithms', 'coding interview' to catch deadline-driven CS learners.	exam-prep
44	80	Accounting Stuff youtube.com/ @AccountingStuff ·NEW	~600K-700K subscribers	Clear accounting fundamentals for students mastering graded accounting/finance coursework and certification material (e.g., toward CPA/CFA foundations) — a focused dense-material business audience.	Managed placement in the sweet spot; pair with custom-intent ('accounting basics', 'debits and credits', 'CPA study') to reach exam-bound accounting/finance students.	econ-business
45	80	Flipping Physics youtube.com/ @FlippingPhysics ·NEW	~180K subscribers	AP/intro physics taught for genuine understanding and exam success; small but pure audience of physics students facing graded assessments.	Niche high-purity managed placement; ideal for a low-cost creator collaboration targeting AP/intro-physics students who would upload their physics notes into Ritsu.	stem-core
46	80	How to ADHD youtube.com/ @HowtoADHD ·NEW	~1.9M subscribers	Serves learners (many students) who struggle with focus and need better systems to get through study material — a focus/learning-productivity audience for whom Ritsu's structured active-practice loop is a concrete aid.	Managed placement, but narrow with custom-intent ('study with ADHD', 'focus while studying', 'can't finish reading') so spend hits study-struggling students rather than the general ADHD audience.	learning-method
47	79	Amoeba Sisters youtube.com/ @AmoebaSisters ·NEW	~1.5M+ subscribers	Clear biology explainers widely used by high-school and intro-college biology students to master graded bio units — a focused biology-coursework audience.	Managed placement; biology-course skew (good for pre-med/bio funnel); pair with custom-intent ('biology test review', 'AP bio') to hit exam-bound students.	stem-core
48	79	Jeff Su youtube.com/ @JeffSu ·NEW	~900K-1.1M subscribers	Practical productivity-and-learning workflows for ambitious students and early-career professionals, including note-taking and information-mastery systems that overlap with Ritsu's job of turning sources into usable knowledge.	Managed placement plus custom-intent on 'note-taking system', 'how to learn faster' — audience is tool-adopting and workflow-minded, receptive to a productivity-framed Ritsu ad; broader than pure exam-prep.	learning-method
49	78	Bozeman Science youtube.com/ @bozemanscience ·NEW	~600K-700K subscribers	AP-level biology, chemistry, physics, and environmental science for students mastering graded science courses — solid coursework-aligned STEM audience.	Managed placement on his AP science series; combine with topic + custom-intent ('AP bio review', 'AP chem') for high deadline intent in the audience-size sweet spot.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
50	78	Study To Success youtube.com/ @studytosuccess ·NEW	~2M subscribers	Large study-life and study-tips channel for students balancing school workload and exams — broad but high-intent committed-student reach.	Managed placement for reach; tighten with custom-intent on exam/revision queries to focus on deadline intent; large audience, moderate purity.	learning-method
51	75	Physics Wallah - Alakh Pandey youtube.com/ @PhysicsWallah ·NEW	~14M+ subscribers	Massive exam-prep channel for physics/chem/math aimed at students cramming for high-stakes graded entrance and board exams — the deadline-bearing masterer at enormous scale (India-heavy audience).	Huge managed-placement reach but geo-skewed; if targeting English-led markets, restrict by geo and layer custom-intent on physics/chem exam queries — best as a high-reach experiment, watch audience-fit.	exam-prep
52	72	Economics Explained youtube.com/ @EconomicsExplained ·NEW	~3M+ subscribers	Large econ audience including students seeking to understand economics for coursework; broad reach into econ-curious learners, though more general-interest than exam-cram.	High-reach managed placement; lower coursework purity, so gate with custom-intent ('economics class help', 'econ final') to filter to students with graded econ deadlines.	econ-business
53	68	NileRed youtube.com/ @NileRed ·NEW	~6M+ subscribers	Chemistry-experiment channel with a large audience of chemistry-curious students and enthusiasts; an entry point to chem majors and pre-meds, though more entertainment than coursework.	High-reach managed placement but lower study-intent purity; only use with tight custom-intent ('organic chemistry help', 'chem exam') so spend reaches actual coursework students rather than casual viewers.	stem-core
54	65	CrashCourse youtube.com/ @crashcourse	~16M subscribers	Course-aligned crash content (biology, chemistry, statistics, organic chem) that high-school and college students watch to review a graded subject under time pressure.	Placement targeting on the channel and its STEM playlists (Chemistry, Statistics, Organic Chemistry); custom-intent keywords 'crash course chemistry', 'study for biology exam'.	general-learning
55	65	freeCodeCamp.org youtube.com/ @freecodecamp	~10M+ subscribers	Engineers and bootcamp learners working through multi-hour course-length ML/CS lectures — the exact 'learn a new framework / pass the cohort' job, and they already use long-form video as study material.	Placement targeting on the channel and its full-course ML/Python/data-science uploads; complement with custom-intent keywords ('data science bootcamp', 'machine learning full course').	general-learning
56	65	Veritasium (Derek Muller) youtube.com/ @veritasium	~18M subscribers	Science-explainer giant whose founder's PhD is literally in physics-education research on why passive video alone doesn't teach — a values-aligned, science-curious learner audience.	Placement targeting on the channel (huge reach, broader fit); tighten with custom-intent keywords 'learn physics', 'understand science', 'why we forget what we learn' to skew to serious learners.	general-learning

Reddit — subreddits (74, ranked by suitable score)

Ad mechanism: Reddit Ads — community (subreddit) + keyword targeting.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	r/Anki reddit.com/r/Anki/	~250K members	These users have already adopted spaced repetition and feel the pain of manual card creation — the exact substitute Ritsu auto-generates from a source.	Highest-purity substitution target. Community-target + keyword 'card creation', 'deck', 'add-on'. Creative must be respectful (Anki-loyal audience): 'Love Anki, hate making cards? Auto-generate flashcards from your PDFs.' Seed organically too.	learning-method
2	99	r/GetStudying reddit.com/r/GetStudying/	~1.5M members	The largest study-method community; members are explicitly seeking better active-study techniques after being burned by passive re-reading.	Top-of-list for study-method targeting + high reach. Pair with keyword targeting 'active recall', 'spaced repetition', 'how to study'. Creative leads with the learning-science angle: 'Active recall beats re-reading — automated from any document.'	learning-method
3	99	r/Notion reddit.com/r/Notion/	~400K members	Students using Notion for note storage are the passive-study substitute Ritsu replaces; high overlap with method-seeking learners.	Substitution-angle community target. Keyword-pair 'student', 'study', 'notes', 'flashcards'. Creative: 'Notes aren't studying — turn your Notion notes into active quizzes.' Position as a complement-then-replacement, not an attack.	learning-method
4	97	r/GetStudying r/GetStudying (https://www.reddit.com/r/GetStudying/) NEW	~700K members	The canonical home of deadline-bearing students sharing study schedules, exam-cram plans, and 'how do I actually master this before my test' threads — exactly Ritsu's persona.	Reddit Ads community targeting on r/GetStudying; pair with keyword targeting on 'exam in', 'study plan', 'active recall'. Highest-intent learning-method community on Reddit.	learning-method
5	96	r/Anki r/Anki (https://www.reddit.com/r/Anki/) NEW	~194K members	Anki users are the most committed spaced-repetition / active-recall practitioners — they already do active learning manually and feel the pain of building cards Ritsu automates.	Community targeting on r/Anki; position Ritsu as 'auto-generate flashcards + quizzes from your source, then keep the active-recall loop'. Respects accuracy-first culture. Med/CS/language overlap is heavy.	learning-method
6	96	r/studytips r/studytips (https://www.reddit.com/r/studytips/) NEW	~150K members	Members are explicitly hunting for better study methods to master graded material — the audience already believes the 'there must be a smarter way to study' premise Ritsu sells.	Community targeting on r/studytips; creative should lead with 'turn your PDF/slides into active practice in 30s'. Strong fit for method-curious learners.	learning-method
7	94	r/studytips reddit.com/r/studytips/	~11K members	Small but exact study-method community where members are explicitly hunting better, more active ways to learn.	Low-volume, high-purity study-method target. Keyword-pair 'active recall', 'method', 'spaced repetition'. Creative is the learning-science manifesto: 'The active-study method that sticks — automated.' Good for organic seeding too.	learning-method
8	92	r/artificial reddit.com/r/artificial/	~1M+ members	Broad AI-interested audience that includes many self-learners actively studying ML; useful for top-of-funnel reach with keyword narrowing.	High-reach but low-purity community target — MUST narrow with keyword targeting 'learn', 'course', 'study', 'tutorial'. Creative: 'Actually learn AI (not just read about it) — quizzes from any source.'	cs-ml
9	92	r/datascience reddit.com/r/datascience/	~800K-1M members	Practitioners and bootcamp learners upskilling in ML/stats from courses and papers — overlaps heavily with the ML-mastery persona.	Community target for the self-learner/upskiller angle. Pair with keyword 'course', 'certification', 'learn', 'study'. Creative: 'Master a new DS course faster — quizzes auto-built from your material.'	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
10	92	r/learnmachinelearning reddit.com/r/learnmachinelearning/	~500K members	The single most on-persona community: people actively learning ML from courses (cs231n, Andrew Ng, fast.ai) who need to convert dense lecture material into practice.	Primary community-target on Reddit Ads. Pair with keyword targeting on 'cs231n', 'CS229', 'study plan', 'how to learn'. Lead creative: 'Turn your ML lecture PDFs into quizzes in 30 seconds.'	cs-ml
11	91	r/studying r/studying (https://www.reddit.com/r/studying/) •NEW	~60K members	General serious-study community for people grinding through coursework and exams seeking better methods and tools.	Community targeting on r/studying; high intent. Pair with 'finals/ midterm/exam prep' keywords. Strong learning-method bucket fit.	learning-method
12	90	r/AskStatistics reddit.com/r/AskStatistics/	~120K members	Help-seeking stats students mid-course who want conceptual mastery — high willingness to try a tool that explains and tests them.	Niche, high-intent community target. Keyword-pair 'concept', 'explain', 'course', 'exam'. Creative: 'Stuck on a stats concept? Get it explained, then quiz yourself on it.'	stem-core
13	90	r/calculus reddit.com/r/calculus/	~140K members	Single-subject community of students in dated calculus courses with frequent exams — precisely on the STEM-course wedge.	Highly precise STEM-course community target. Keyword-pair 'exam', 'final', 'practice', 'help'. Creative: 'Calc final this week? Turn your textbook into practice problems.' Great low-CPM, high-purity test buy.	stem-core
14	90	r/computerscience reddit.com/r/computerscience/	~2.4M members	CS students and learners working through theory-heavy courses (algorithms, ML) with exams — broad reach into the STEM-CS persona.	Large-reach STEM/CS community target; narrow with keyword 'exam', 'course', 'algorithms', 'study'. Creative: 'Turn your algorithms lecture notes into a quiz before the exam.'	stem-core
15	90	r/learnmath reddit.com/r/learnmath/	~203K members	Students grinding through calculus/linear algebra/stats coursework who need to convert dense material into practice problems.	STEM-course community target. Keyword-pair 'calculus', 'linear algebra', 'exam', 'practice problems'. Creative: 'Turn your math textbook chapter into practice problems and a concept map.'	stem-core
16	90	r/Mathematics reddit.com/r/mathematics/	~1M members	Math majors and serious learners in proof/analysis courses who must internalize dense material — broad reach into the STEM-math persona.	Large-reach community target; narrow with keyword 'course', 'exam', 'proof', 'study'. Creative: 'Master your analysis course — quizzes and concept maps from your textbook.'	stem-core
17	90	r/PhysicsStudents reddit.com/r/PhysicsStudents/	~180K members	Physics students in dated, problem-set-heavy courses who need active practice and concept mastery — squarely on the STEM-course wedge.	Precise STEM-course community target. Keyword-pair 'exam', 'problem set', 'midterm', 'help'. Creative: 'Physics midterm coming? Turn your notes into practice problems and a concept map.'	stem-core
18	90	r/statistics reddit.com/r/statistics/	~600K members	Stats coursework underpins ML and many STEM degrees; members face graded problem sets and exams in a notoriously dense subject.	Community target for the STEM-course angle. Keyword-pair 'exam', 'homework', 'course', 'understand'. Creative: 'Finally understand stats — quizzes and explanations from your own lecture notes.'	stem-core
19	90	r/learnmath r/learnmath (https://www.reddit.com/r/learnmath/) •NEW	~203K members	Learners working through calculus/algebra/stats coursework who need to genuinely understand (not just answer) — Ritsu turns math PDFs into practice + step-by-step Solve mode.	Community targeting on r/learnmath; creative: 'upload your problem set / textbook chapter → get worked practice + quizzes'. High graded-deadline intent.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
20	90	r/Notetaking r/Notetaking (https://www.reddit.com/r/Notetaking/) ·NEW	~57K members	Note-takers wrestling with converting passive notes into retained knowledge — Ritsu turns their notes/PDFs into active quizzes, the exact 'do something with my notes' gap.	Small but high-purity community targeting on r/Notetaking; creative: 'your notes are passive — turn them into quizzes that make it stick'. Heavy PKM-tool overlap.	learning-method
21	89	r/calculus r/calculus (https://www.reddit.com/r/calculus/) ·NEW	~140K members	Students in a hard, graded, deadline-driven course (calc I-III) constantly seeking to master concepts and problem types before exams.	Community targeting on r/calculus; very on-persona (course-specific + exam-driven). Lead with Solve/Exercise modes on their own textbook problems.	stem-core
22	89	r/EngineeringStudents r/EngineeringStudents (https://www.reddit.com/r/EngineeringStudents/) ·NEW	~386K members	Engineering undergrads juggling multiple hard, graded courses (statics, thermo, circuits) under constant deadline pressure — a dense, multi-week-mastery audience.	Community targeting on r/EngineeringStudents; very on-persona. Creative: 'turn your dense engineering PDFs + lecture slides into exam practice'. Strong learning-from-docs match.	stem-core
23	89	r/Zettelkasten r/Zettelkasten (https://www.reddit.com/r/Zettelkasten/) ·NEW	~75K members	Knowledge-management enthusiasts who deeply value connecting ideas (Ritsu's Knowledge Map / concept-linking) and durable understanding over rote memorization.	Community targeting on r/Zettelkasten; lead with the concept-map / linked-knowledge angle, not flashcards. Rigor-respecting, method-serious audience.	learning-method
24	88	r/learnmachinelearning r/learnmachinelearning (https://www.reddit.com/r/learnmachinelearning/) ·NEW	~500K members	Purer learner cut than r/MachineLearning — people explicitly learning ML from courses/docs/papers, needing to master math + concepts.	Community targeting on r/learnmachinelearning; very high learn-intent. Creative: 'turn the course/paper into quizzes + code exercises'. Strongest ML-learner fit.	cs-ml
25	88	r/OrganicChemistry r/OrganicChemistry (https://www.reddit.com/r/OrganicChemistry/) ·NEW	~110K members	Orgo is the archetypal weed-out course — students desperately need active practice on mechanisms/reactions before brutal graded exams.	Community targeting on r/OrganicChemistry; 'orgo before the exam' is the sharpest willingness-to-pay timer. Lead with diagram + mechanism practice generation.	stem-core
26	87	r/deeplearning reddit.com/r/deeplearning/	~180-200K members	Focused DL learners working through courses (cs231n, fast.ai) and papers who want to truly understand, not just skim.	Precise ml-ai community target. Keyword-pair 'cs231n', 'course', 'paper', 'study'. Creative leans into the Knowledge Map / concept-connection feature: 'See how DL concepts connect — from your own lecture notes.'	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
27	87	r/MachineLearning reddit.com/r/ MachineLearning/	~3.0-3.1M members	The largest ML hub; contains many grad students and self-learners breaking down research papers into testable knowledge.	High-reach community target but lower purity (research-heavy). Constrain with keyword targeting on 'paper', 'reproduce', 'study', 'exam' and lean creative toward the 'break down a research paper' workflow rather than beginner messaging.	cs-ml
28	87	r/MLQuestions reddit.com/r/ MLQuestions/	~70-90K members	A help-seeking ML-learner community — people stuck mid-course who want to genuinely understand, the exact mindset Ritsu serves.	Smaller but high-purity ml-ai community target. Keyword-pair 'understand', 'course', 'confused', 'explain'. Creative leans on tutoring modes: 'A tutor that quizzes you and explains concepts back — from your own material.'	cs-ml
29	87	r/Mcat r/Mcat (https:// www.reddit.com/r/ Mcat/) •NEW	~170K members	The single most deadline-and-mastery-obsessed pre-professional community on Reddit — months of grinding dense content toward one high-stakes graded exam.	Top-tier community targeting on r/Mcat; the MCAT date IS the deadline. Creative: 'turn your prep books into endless active-recall quizzes'. Heavy Anki overlap = warm to active learning.	med-health
30	87	r/PhysicsStudents r/PhysicsStudents (https:// www.reddit.com/r/ PhysicsStudents/) •NEW	~67K members	Purer cut of physics undergrads grappling with graded coursework, problem sets, and exam prep — exactly the deadline-bearing masterer.	Small, high-purity community targeting; creative: 'turn lecture notes + problem sets into active practice'. Better intent-per-impression than r/Physics.	stem-core
31	86	r/medschool r/medschool (https:// www.reddit.com/r/ medschool/) •NEW	~300K members	Med students master enormous volumes of dense material for shelf exams and Step — the most extreme deadline-bearing-masterer audience, already power-users of Anki/active recall.	Community targeting on r/medschool; creative must respect their accuracy bar (no hallucinated facts). Position auto-generated active recall from lecture/PDFs. Premium, rigor-first.	med-health
32	86	r/premed r/premed (https:// www.reddit.com/r/ premed/) •NEW	~500K members	Pre-meds carrying brutal GPA-critical STEM courseloads (bio, orgo, physics) plus MCAT — relentless graded-deadline mastery.	Community targeting on r/premed; overlay course-specific keywords (orgo/biochem/MCAT). High WTP, rigor-respecting. Strong persona fit across multiple hard courses.	med-health
33	86	r/step1 r/step1 (https:// www.reddit.com/r/ step1/) •NEW	~90K members	Laser-focused on one make-or-break exam with a hard date — pure mastery-before-deadline intent across dense medical content.	Community targeting on r/step1; the exam date is the urgency lever. Creative: 'convert First Aid / lecture notes into active-recall practice'. Extremely high purity.	exam-prep
34	86	r/USMLE r/USMLE (https:// www.reddit.com/r/ USMLE/) •NEW	~140K members	Aggregates Step 1/2/3 examinees mastering huge dense syllabi against fixed exam dates — peak deadline + accuracy-critical mastery.	Community targeting on r/USMLE; pair with 'Step 1/Step 2/exam date' keywords. Accuracy-first messaging mandatory. High WTP medical-exam audience.	exam-prep
35	85	r/chemhelp reddit.com/r/ chemhelp/	~23K members	Organic/general chemistry students (incl. pre-meds) in dated courses needing active practice on a famously hard subject.	Small but pure STEM-course (orgo) target. Keyword-pair 'orgo', 'mechanism', 'exam', 'practice'. Creative: 'Master orgo mechanisms — quizzes built from your own slides.' Best paired with r/premed for the chem-heavy audience.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
36	85	r/EngineeringStudents reddit.com/r/EngineeringStudents/	~450-800K members (sources vary; ~800K most recent)	'For those stuck doing math at 3am' — committed STEM students with graded multi-week courses (calc, physics, thermo) and looming exams.	Core STEM-course community target. Keyword-pair 'exam', 'final', 'study group', 'professor notes'. Creative: 'Ace your exam in 3 days — turn lecture slides into a study plan.' Strong fit for the 'exam in 3 days' wedge.	stem-core
37	85	r/CFA r/CFA (https://www.reddit.com/r/CFA/) •NEW	~212K members	CFA candidates grind an enormous dense curriculum toward fixed, brutal exam dates — textbook deadline-bearing mastery with high WTP.	Community targeting on r/CFA; the exam window is the urgency. Creative: 'turn CFA curriculum PDFs into active-recall quizzes'. Affluent, exam-serious audience.	exam-prep
38	85	r/socraticmethod r/socraticmethod (https://www.reddit.com/r/socraticmethod/) •NEW	~10K members	Niche community explicitly devoted to learning via questioning/dialogue — philosophically aligned with Ritsu's 'Ask Me / explain it back' tutoring modes.	Tiny but perfectly on-belief; better for organic seeding than paid scale. Lead with the 'tutor that quizzes you and makes you explain it back' (Feynman/Socratic) framing.	learning-method
39	84	r/chemhelp r/chemhelp (https://www.reddit.com/r/chemhelp/) •NEW	~23K members	Students actively stuck on chemistry coursework (gen chem / organic) and seeking to understand mechanisms before graded deadlines.	Small but extremely high-intent (people asking for help right now). Community targeting + keyword 'organic chemistry/exam'. Position Solve + Deep-Explain modes.	stem-core
40	83	r/AskStatistics r/AskStatistics (https://www.reddit.com/r/AskStatistics/) •NEW	~120K members	Higher-intent than r/statistics — people actively stuck on stats problems/coursework needing to understand before a deadline.	Community targeting on r/AskStatistics; very high help-seeking intent. Creative: 'understand the concept, not just the answer'. Strong fit for the masterer persona.	stem-core
41	83	r/MachineLearning r/MachineLearning (https://www.reddit.com/r/MachineLearning/) •NEW	~3.1M members	The beachhead — practitioners and students mastering ML papers, courses, and dense technical material; 'break down a research paper' + code exercises fit exactly.	Large + research-heavy; overlay 'learning/course/paper/study' for the learner slice. Already-covered core ML audience — include for completeness + paper-breakdown angle.	cs-ml
42	82	r/learnprogramming r/learnprogramming (https://www.reddit.com/r/learnprogramming/) •NEW	~4.2M members	Self-learners and CS students learning a language/framework from docs and courses — Ritsu's 'learn a new framework fast' + code-exercise generation use case.	Huge community targeting; creative: 'drop the docs in, get code exercises + quizzes'. Overlay 'course/bootcamp/exam' for student intent. Strong format match (code).	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
43	82	r/StudentNurse r/StudentNurse (https://www.reddit.com/r/StudentNurse/) ·NEW	~180K members	Purer student cut — nursing students grinding pharmacology, anatomy, and NCLEX prep under constant graded deadlines.	Community targeting on r/StudentNurse; high student purity + exam intent. Creative: 'turn your nursing PDFs into NCLEX-style practice'. Strong med-health fit.	med-health
44	81	r/lawschool r/lawschool (https://www.reddit.com/r/lawschool/) ·NEW	~250K members	Law students master enormous dense reading and outline for high-stakes graded finals/bar — extreme reading-to-mastery deadline pressure.	Community targeting on r/lawschool; creative: 'turn casebooks + outlines into active practice questions'. Dense-text format match; exam-driven. Rigor-respecting.	exam-prep
45	80	r/gradadmissions reddit.com/r/gradadmissions/	~250K members	Prospective grad students prepping for GRE/subject tests and brushing up on coursework — deadline-bearing exam-prep mindset.	Community target for the exam-prep/transition angle. Keyword-pair 'GRE', 'subject test', 'prep', 'study'. Creative: 'Prepping for the GRE subject test? Turn prep books into active recall.'	exam-prep
46	80	r/MCAT reddit.com/r/Mcat/	~170K+ members	A dated, high-stakes exam community where members live in Anki/UWorld and want genuine mastery of dense content under deadline.	Very high-intent exam-prep community target. Keyword-pair 'Anki', 'content review', 'practice questions'. Creative: 'Turn your content review into quizzes and flashcards instantly.' Keep accuracy/no-hallucination front and center for this skeptical, rigor-valuing crowd.	exam-prep
47	80	r/Mcat (study-tools crossover) / r/step1 reddit.com/r/step1/	~90K members	USMLE Step 1 examinees are peak deadline-driven masterers drowning in Anki and question banks Ritsu can auto-generate.	High-intent exam-prep community target. Keyword-pair 'Anki', 'question bank', 'First Aid', 'dedicated'. Creative: 'Auto-generate practice questions from your First Aid notes.' Accuracy-led claims essential.	exam-prep
48	80	r/MedicalSchool reddit.com/r/medicalschool/	~300K+ members	Med students face relentless dated exams (Step 1/2, shelf) with enormous reading loads — the deadline-bearing masterer at maximum intensity.	Strong exam-prep community target. Keyword-pair 'Step 1', 'shelf', 'Anki', 'First Aid'. Creative: 'Turn lecture slides into active recall before your next shelf.' Maintain accuracy-led messaging for this rigor-obsessed audience.	exam-prep
49	80	r/premed reddit.com/r/premed/	~902K members	Pre-meds are archetypal deadline-driven masterers (MCAT, hard science courses) who already pay for Anki and study tools Ritsu replaces.	High-intent community target. Pair with keyword targeting 'Anki', 'study schedule', 'orgo', 'biochem'. Creative: 'Stop hand-making Anki decks — auto-generate from your own notes.' Note Reddit ad-policy sensitivity around exam/medical content; keep claims accuracy-led.	exam-prep
50	80	r/Physics r/Physics (https://www.reddit.com/r/Physics/) ·NEW	~2.3M members	Large physics community including many undergrads mastering dense, graded coursework and problem sets.	Large but mixed (researchers + enthusiasts + students); overlay 'homework/exam/textbook/course' keywords to reach the student segment. Use r/PhysicsStudents for purer intent.	stem-core
51	80	r/statistics r/statistics (https://www.reddit.com/r/statistics/) ·NEW	~600K members	Students mastering stats coursework (the bridge subject for econ/ML/bio/psych) under graded deadlines and seeking conceptual understanding.	Community targeting on r/statistics; overlay 'course/exam/homework'. Position Deep-Explain + practice on their own stats material. Good cross-discipline reach.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
52	79	r/LSAT r/LSAT (https://www.reddit.com/r/LSAT/) •NEW	~150K members	LSAT test-takers in intense, dated exam prep seeking to master logical reasoning and reading comp before a hard deadline.	Community targeting on r/LSAT; the test date is the urgency lever. Active-practice + explanation framing. High exam-prep intent, broad-skills focus.	exam-prep
53	78	r/GetDisciplined r/GetDisciplined (https://www.reddit.com/r/GetDisciplined/) •NEW	~2.2M members	Self-improvers building study discipline to finish hard courses; many posts are literally 'help me study consistently for my exam'.	Large community; overlay study/exam/finals keywords to filter to learners. Streak + emotional-hook product angle fits the discipline framing.	learning-method
54	77	r/GradSchool r/GradSchool (https://www.reddit.com/r/GradSchool/) •NEW	~924K members	Grad students master dense papers, quals, and coursework — including the 'break down a research paper' use case Ritsu features on its homepage.	Community targeting on r/GradSchool; creative: 'turn dense research papers into testable knowledge'. Strong fit for the researcher + qual-exam persona.	general-learning
55	76	r/AskEconomics r/AskEconomics (https://www.reddit.com/r/AskEconomics/) •NEW	~1.4M members	Higher learning-intent econ community where students seek to genuinely understand econ concepts and coursework.	Community targeting on r/AskEconomics; overlay 'course/exam/homework'. Better intent-per-impression than r/Economics. Position Deep-Explain on their econ material.	econ-business
56	76	r/biology r/biology (https://www.reddit.com/r/biology/) •NEW	~4.5M members	Large biology community with many students mastering dense, fact-heavy coursework (the ideal flashcard/active-recall subject).	Large + mixed; overlay 'exam/course/study/textbook' to reach students. Bio is fact-dense → strong flashcard + concept-map message-match. Reach play.	stem-core
57	75	r/HomeworkHelp r/HomeworkHelp (https://www.reddit.com/r/HomeworkHelp/) •NEW	~666K members	Students actively stuck on graded assignments right now across every subject — pure, immediate help-seeking + deadline intent.	Community targeting on r/HomeworkHelp; extremely high real-time intent. Creative: 'understand it, don't just copy it' (active-learning, not cheating). Broad-subject reach.	general-learning
58	74	r/Accounting r/Accounting (https://www.reddit.com/r/Accounting/) •NEW	~1.3M members	Accounting students + CPA candidates mastering dense rules/standards for graded courses and the CPA exam.	Overlay 'CPA/exam/student/study' (community has many working professionals). CPA-exam intent is strong; position practice generation from study materials.	econ-business
59	74	r/ADHD r/ADHD (https://www.reddit.com/r/ADHD/) •NEW	~2.2M members	A large slice are students who struggle with passive study (reading/rewatching fails them) and need active, engaging, gamified learning — Ritsu's exact wedge.	Use keyword overlay 'studying/school/exam/focus' to reach the student segment; sensitivity in creative. Active-learning + dopamine/streak hook is a strong message-match.	learning-method
60	74	r/nursing r/nursing (https://www.reddit.com/r/nursing/) •NEW	~263K members	Nursing students + nurses studying for NCLEX and dense clinical coursework — fact-heavy, exam-driven, mastery-required.	Overlay 'student/NCLEX/exam/study' (community skews working nurses). Better to target r/StudentNurse for student purity; use this for broader reach + NCLEX intent.	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
61	74	r/productivity r/productivity (https:// www.reddit.com/r/ productivity/) ·NEW	~4.2M members	Productivity-obsessed users include many serious learners optimizing study workflows and tools — receptive to a tool that makes mastering material faster.	Community targeting on r/productivity with keyword overlay 'studying/learning/notes'; large reach, moderate intent. Lead with the time-saved-on-active-learning benefit.	learning-method
62	72	r/AskEngineers r/AskEngineers (https:// www.reddit.com/r/ AskEngineers/) ·NEW	~3M members	Large engineering community including students and professionals upskilling on technical material from docs/standards.	Large + mixed (working engineers dominate); lower student-purity than r/EngineeringStudents. Overlay 'student/exam/learning' keywords. Best as reach-extension.	stem-core
63	72	r/college r/college (https:// www.reddit.com/r/ college/) ·NEW	~2.9M members	Broadest pool of degree-seeking students facing constant graded coursework and exams across every subject — the umbrella of Ritsu's primary persona.	Large reach; overlay 'finals/midterm/exam/study/cramming' keywords to focus on deadline moments. Best for top-of-funnel + seasonal exam-period bursts.	general-learning
64	71	r/cscareerquestions r/cscareerquestions (https:// www.reddit.com/r/ cscareerquestions/) ·NEW	~900K members	CS students and early-career devs studying for courses, interviews, and certs who need to master technical material fast.	Career-focused, not pure-study; overlay 'study/learning/interview prep' keywords. Moderate fit — better for the upskilling-engineer persona than the graded-deadline student.	cs-ml
65	70	r/college reddit.com/r/college/	~221K members	General undergrad community full of students with graded multi-week courses and finals — broad reach into the student persona.	Mid-reach community target for the general student wedge. Keyword-pair 'finals', 'midterm', 'study', 'GPA'. Creative: 'Finals in 3 days? Turn your slides into a study plan.' Use as a volume complement to the precise STEM subs.	general-learning
66	70	r/GradSchool reddit.com/r/ GradSchool/	~924K members	Grad students facing qualifying exams and dense reading lists — exactly the deadline-bearing, mastery-motivated learner who must internalize papers and textbooks.	Strong community target for the 'qualifying exam' and 'research paper' angles. Keyword-pair with 'quals', 'comprehensive exam', 'paper'. Creative: 'Prepping for quals? Turn your reading list into active recall.'	general-learning
67	70	r/learnpython reddit.com/r/ learnpython/	~1.3M members	Massive cohort of course-driven Python learners (many doing ML/data-science tracks) who need to retain concepts under deadline.	High-reach community target with a learning intent baked into the name. Keyword-pair 'course', 'tutorial', 'exercises'. Creative emphasizes code-exercise generation: 'Drop in the docs, get code exercises to practice.'	general-learning
68	70	r/MLQuestions (peer) / r/AskAcademia reddit.com/r/ AskAcademia/	~250K members	Grad students and researchers discussing how to digest papers and prep for exams/teaching — overlaps the researcher and grad-learner personas.	Community target for the researcher/grad angle. Keyword-pair 'paper', 'reading', 'qualifying exam', 'teaching'. Creative: 'Break down a dense research paper into testable knowledge.'	general-learning
69	70	r/Professors reddit.com/r/ Professors/	~340K members	Educators are persona #5 (creating courses/materials for students); this is where instructors discuss teaching tools and content creation.	Community target for the educator angle. Keyword-pair 'course materials', 'quiz', 'assignment'. Creative: 'Build a course for your students from existing material.' Distinct messaging from the student-facing buys.	general-learning

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
70	70	r/FinancialCareers r/FinancialCareers (https://www.reddit.com/r/FinancialCareers/) ·NEW	~400K members	Finance students/early-career professionals studying for certs (CFA/FRM) and technicals — upskilling on dense material under deadlines.	Career-focused; overlay 'CFA/exam/study/learning'. Moderate fit — strongest for the cert-prep slice. Best paired with r/CFA targeting.	econ-business
71	68	r/AskAcademia r/AskAcademia (https://www.reddit.com/r/AskAcademia/) ·NEW	~2.1M members	Academics and grad students working through dense literature; receptive to tools that turn papers/material into understanding.	Large + mixed (faculty + students); overlay 'student/learning/study/paper'. Lower graded-deadline intent than r/GradSchool. Reach + research-paper angle.	general-learning
72	67	r/learnprogramming reddit.com/r/learnprogramming/	~4.3M members	Huge population of bootcamp/CS-course learners with graded deadlines who are the engineer/self-learner personas; learning a new framework from docs is a named Ritsu workflow.	Largest-reach community in this set. Pair with keyword targeting 'bootcamp', 'course', 'study', 'docs'. Creative angle: 'Learn a new framework fast — drop the docs in, get quizzed.' Expect broad audience, so narrow with keywords.	general-learning
73	66	r/GetMotivated r/GetMotivated (https://www.reddit.com/r/GetMotivated/) ·NEW	~19M members	Large pool of students/self-learners seeking the discipline to push through hard material before deadlines; the emotional-hook + streak angle of Ritsu resonates.	Very large reach but lower purity — use tight keyword overlays ('study', 'exam', 'finals', 'procrastinating') to filter to genuine learners. Best for top-of-funnel awareness.	learning-method
74	64	r/Economics r/Economics (https://www.reddit.com/r/Economics/) ·NEW	~5.7M members	Massive econ community; includes many students mastering micro/macro coursework, though it skews news/discussion.	Huge reach, low study-purity (news-dominated). Heavy keyword overlay required ('exam/course/textbook/study'). Use r/AskEconomics for higher learning intent.	econ-business

X (Twitter) — accounts & hashtags (72, ranked by suitable score)

Ad mechanism: X Ads — follower look-alike + keyword + handle targeting.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Ali Abdaal (account) @AliAbdaal — https://x.com/AliAbdaal	~250K+ followers	Ex-doctor, #1 productivity/study creator whose audience is students seeking evidence-based study techniques (active recall, spaced repetition) for exams.	Broad follower look-alike seed for the study-method audience; layer student/exam keywords to focus on the in-course subset.	learning-method
2	99	Cal Newport (account) @calnewport — https://x.com/calnewport	~180K+ followers	CS professor and 'Deep Work' / 'How to Become a Straight-A Student' author; his audience is serious students optimizing study and focus for hard courses.	Follower look-alike seed for the study-method/learning-science segment; ideal for the 'active learning beats passive re-reading' angle.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
3	98	Dr Justin Sung (account) @JustinSung ·NEW	~30K on X; 1.2M+ YouTube (iCanStudy)	The #1 'how to learn' studying coach — his entire audience is serious learners hunting research-based active-learning methods, Ritsu's exact belief.	Run X follower look-alike on @JustinSung; layer keyword targeting on 'active recall', 'how to learn', 'study smarter' for his audience.	learning-method
4	96	Justin Sung (account) @justinsungofficial — https://x.com/justinsungofficial	~30K+ followers (X); 1M+ across platforms	The '#1 studying coach' focused on active learning and effective encoding — his audience is learners deliberately upgrading how they study for hard material.	Follower look-alike seed precisely on the learning-science angle; perfect for creative tying Ritsu to active-recall/effective-learning science.	learning-method
5	95	Benjamin Keep — Learning Scientist (account) @benjaminkeeping ·NEW	~15K on X	Cognitive scientist who debunks passive-study myths and champions retrieval practice — small but ultra-high-fit, accuracy-respecting audience.	Engagement/keyword targeting around 'retrieval practice', 'learning science', 'spaced repetition'; ideal for rigor-first messaging that neutralizes AI skepticism.	learning-method
6	94	iCanStudy (account) @icanstudy ·NEW	~5-15K on X; large course base	Justin Sung's learning-method platform; audience is committed learners paying to learn research-based study systems.	Look-alike on @icanstudy; keyword 'learn how to learn'; near-perfect belief alignment for messaging.	learning-method
7	94	Thomas Frank (account) @TomFrankly ·NEW	~80K on X; 2.9M YouTube	#1 note-taking/study-systems creator; audience is students optimizing how they study and take notes before exams.	Follower look-alike on @TomFrankly + keyword 'note taking', 'study system', 'Notion for students'.	learning-method
8	93	Gohar Khan / Gohar's Guide (account) @goharsguide ·NEW	~100K on X; 10M+ across YouTube/TikTok	MIT-grad study-tips creator whose audience is ambitious students grinding hard courses and exams.	Look-alike on @goharsguide; layer 'study tips', 'exam prep', 'college' keywords; format match is short-form so use punchy demo creative.	learning-method
9	92	Andrej Karpathy (account) @karpathy — https://x.com/karpathy	~1.4M followers	His 'Zero to Hero' / nn lectures are the de-facto self-study ML curriculum; his followers are the deadline-driven masterers turning his videos into practice.	Follower look-alike seed (highest-intent ML-learner audience on X) plus handle-targeting; pair with keyword targeting on 'makemore', 'micrograd', 'nanoGPT'.	cs-ml
10	92	Andrew Ng (account) @AndrewYNg — https://x.com/AndrewYNg	~1.1M followers	The single most-followed figure for exactly this persona — DeepLearning.AI / Coursera / Stanford CS229 learners follow him while taking his courses with graded deadlines.	Use as a follower look-alike seed (his audience IS enrolled ML learners); also handle-target @AndrewYNg directly so ads serve to his engagers and replies.	cs-ml
11	92	Anton (abacaj) (account) @abacaj — https://x.com/abacaj	~110K+ followers	Hands-on LLM/ML engineer whose followers are practitioners learning to build and fine-tune models — active, deadline-agnostic but high-intent learners.	Follower look-alike seed for applied-LLM learners; keyword-target 'fine-tune', 'LLM' to catch the build-to-learn cohort.	cs-ml
12	92	Dan Kornas (account) @dankornas — https://x.com/dankornas	~87K followers	Bio 'Building the best AI learning resource' — his entire audience is people explicitly trying to learn/master AI, a clean persona match.	Follower look-alike seed of self-identified AI learners; strong fit for a head-to-head 'replace your study stack' creative.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
13	92	François Chollet (account) @fchollet — https://x.com/fchollet	~450K+ followers	Keras creator and ARC author; his audience is hands-on ML learners and engineers learning deep learning from his book/framework.	Follower look-alike seed; keyword-target 'Keras', 'deep learning with python' to catch learners working through his materials.	cs-ml
14	92	Google DeepMind (account) @GoogleDeepMind — https://x.com/GoogleDeepMind	~1M+ followers	Followed by aspiring and current ML grad students/researchers who want to master the field at a research level — the rigor end of the persona.	Broad follower look-alike seed for ML-research aspirants; filter with course/exam keywords to reach those actively studying vs. passive fans.	cs-ml
15	92	Jeremy Howard (account) @jeremyphoward — https://x.com/jeremyphoward	~250K+ followers	Co-founder of fast.ai — a named archetype course in the persona definition; his followers are mid-course practical-DL learners with concrete goals.	High-precision follower look-alike seed (fast.ai cohort); handle-target plus keyword 'fastai' to reach learners actively in the course.	cs-ml
16	92	Mark Tenenholz (account) @marktenenholz — https://x.com/marktenenholz	~250K+ followers	Kaggle Master and data-science educator whose audience is upskilling data-science/ML learners and bootcamp-style practitioners.	Follower look-alike seed for the data-science learner segment; pair with @svpino and @rasbt to build an ML-educator audience cluster.	cs-ml
17	92	Patrick Loeber (account) @patloeber — https://x.com/patloeber	~71K followers	Python/ML tutorial creator (DeepMind DevRel) whose audience is beginner-to-intermediate ML learners following structured lessons — high active-learning intent.	Follower look-alike seed for tutorial-following ML learners; pair with keyword 'pytorch', 'python machine learning'.	cs-ml
18	92	Rachel Thomas (account) @math_rachel — https://x.com/math_rachel	~80K+ followers	fast.ai co-founder focused on practical, accessible ML/math education; her audience is learners (esp. via courses) tackling deep learning rigorously.	Follower look-alike seed overlapping the fast.ai learner base; combine with @jeremyphoward for a course-cohort audience.	cs-ml
19	92	Santiago (svpino) (account) @svpino — https://x.com/svpino	~383K followers	Self-describes as teaching 'hard-core Machine Learning'; his audience is practitioners and students actively building ML skill against real goals.	Strong follower look-alike seed — tightly on-persona (ML learners, not just AI news). Handle-target his engagers for high relevance.	cs-ml
20	92	Sebastian Raschka (account) @rasbt — https://x.com/rasbt	~290K+ followers	Author of 'Build a Large Language Model (from Scratch)' and ML textbooks; his audience learns by implementing — the active-mastery mindset Ritsu sells.	Follower look-alike seed tightly aligned to learn-by-doing ML students; keyword-target 'from scratch', 'LLM' to reach implementers.	cs-ml
21	92	Sebastian Ruder / NLP-research-adjacent learners (account) @seb_ruder — https://x.com/seb_ruder	~120K+ followers	NLP researcher whose followers are grad students and self-learners mastering ML/NLP from papers — directly matches the 'break down a research paper' job.	Follower look-alike seed for the paper-reading ML learner; ideal for the 'turn a research paper into a quiz' ad angle.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
22	92	Tivadar Danka (account) @TivadarDanka — https://x.com/TivadarDanka	~150K followers	Author of 'Mathematics of Machine Learning'; his entire audience is people grinding linear algebra/calculus/probability to master ML — bullseye persona.	Very high-precision follower look-alike seed (math-for-ML learners); perfect for the 'master the math behind ML' creative.	cs-ml
23	92	Yann LeCun (account) @ylecun — https://x.com/ylecun	~900K+ followers	Foundational deep-learning figure followed by serious ML students and grad researchers who self-identify as wanting to master the field rigorously.	Follower look-alike seed for the rigor-minded ML grad/research audience; combine with @GoogleDeepMind for an ML-research interest cluster.	cs-ml
24	92	Ali Abdaal (account) @AliAbdaal ·NEW	~150K+ on X; 6M+ YouTube	#1 productivity/study creator (ex-doctor) whose audience is students and self-learners optimizing how they study.	Follower look-alike on @AliAbdaal; keyword 'productivity', 'study', 'evidence-based learning'; large reach so tighten with student keywords.	learning-method
25	92	The AnKing (account) @AnKingMed ·NEW	~3K on X; 300K+ deck users / large YouTube	The gold-standard Anki flashcard brand for USMLE/MCAT — its audience IS deadline-bearing med students doing active recall.	Follower look-alike on @AnKingMed; keyword 'USMLE', 'Anki', 'Step 1'; pitch Ritsu as 'auto-generate cards from your own lectures'.	med-health
26	91	3Blue1Brown / Grant Sanderson (account) @3blue1brown ·NEW	~300K+ on X; 6M+ YouTube	Beloved by university STEM students mastering calculus, linear algebra and probability — rigor-respecting, deep-understanding culture.	Follower look-alike on @3blue1brown; keyword 'linear algebra', 'calculus', 'understand math'; format match strong (deep visual explainers).	stem-core
27	90	3Blue1Brown / Grant Sanderson (account) @3blue1brown — https://x.com/3blue1brown	~418K followers	The canonical visual-math channel for linear algebra/calculus/neural-nets — exactly the STEM foundations this persona studies for ML and engineering courses.	Follower look-alike seed to reach math/STEM masterers; ideal for the 'turn a dense math lecture into active practice' ad angle.	stem-core
28	90	DeepLearning.AI (account) @DeepLearningAI — https://x.com/DeepLearningAI	~400K+ followers	Andrew Ng's education org; its followers are people enrolled in or shopping its ML/AI courses with assignments — the core paid-course wedge.	Strong follower look-alike seed of active ML-course students; handle-target for engagers; pair with @AndrewYNg to build a course-learner audience.	stem-core
29	90	fast.ai (account) @fastdotai — https://x.com/fastdotai	~80K+ followers	Official account of a named archetype course; followers are enrolled/active practical-deep-learning students working through a structured curriculum.	High-precision follower look-alike seed (a literal course cohort); handle-target @fastdotai engagers for in-course learners.	stem-core
30	90	Khan Academy (account) @khanacademy — https://x.com/khanacademy	~1M+ followers	Massive audience of students studying calculus, physics, chemistry and CS — the STEM-course foundations layer of the persona, broad top-of-funnel.	Broad follower look-alike seed for STEM students; narrow with course/exam keywords to reach those facing graded deadlines, not casual browsers.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
31	90	#activerecall (hashtag) #activerecall ·NEW	Niche, high-intent; thousands of posts	The exact technique Ritsu automates; users posting it are method-aware deadline learners.	Keyword 'active recall'; this is the single sharpest belief-match keyword for X ad copy.	learning-method
32	90	Toan Truong — Learning channel curator (account) @LearningToan ·NEW	~10K on X	Curates 'channels that made me a smarter student' (Sung, Abdaal, Frank); followers are method-seeking deadline learners.	Follower targeting + look-alike; high-intent learning-method niche, good for organic seeding via reply/quote-tweet.	learning-method
33	89	#100DaysOfMLCode (hashtag + hub account) #100DaysOfMLCode — hub: @100DaysOfMLCode https://x.com/100daysofmlcode	Tens of thousands of participants; active retweet hub account	A public daily-commitment ML-learning challenge — literally deadline-driven self-learners logging ML study, the persona in motion.	Keyword/hashtag-target #100DaysOfMLCode to serve ads to people actively tweeting their ML study logs; handle-target the @100DaysOfMLCode hub's engagers.	cs-ml
34	89	#datascience (hashtag) #datascience	Very high volume — millions of tweets; large practitioner+learner base	Captures bootcamp students and self-learners upskilling in data science/ML who turn courses and notebooks into practice.	Keyword-target #datascience with learner modifiers ('learning', 'bootcamp', 'studying'); combine with @marktenenholtz/@svpino look-alikes to focus on learners.	cs-ml
35	89	#MachineLearning (hashtag) #MachineLearning	Very high volume — millions of tweets; broad ML audience	Broadest ML topic tag capturing learners, students and practitioners discussing and studying ML across all levels.	Keyword-target #MachineLearning for reach, then narrow with 'learn', 'course', 'study' modifiers or layer an educator follower look-alike to filter to learners.	cs-ml
36	89	Lex Fridman (account) @lexfridman — https://x.com/lexfridman	~4.2M followers	Largest AI/ML-adjacent audience on X; heavily skews toward students and self-learners aspiring to master AI, a broad top-of-funnel pool for the wedge.	Use as a broad follower look-alike seed for reach; layer with ML-keyword targeting to filter his general audience down to active learners.	cs-ml
37	89	#spacedrepetition (hashtag) #spacedrepetition ·NEW	Niche but high-intent; thousands of posts	Used by learners deliberately optimizing memory for exams — directly aligned with Ritsu's auto-generated flashcards/quizzes.	Keyword targeting 'spaced repetition' + 'active recall'; lead creative with 'auto-build your spaced-repetition deck from any PDF'.	learning-method
38	88	AnkiHub (account) @AnkiHubOfficial ·NEW	~5-10K on X; large med-student user base	Collaborative Anki platform for med students — same high-intent active-recall medical audience.	Look-alike on @AnkiHubOfficial; keyword 'AnkiHub', 'med school flashcards'.	med-health
39	88	blackpenredpen (account) @blackpenredpen ·NEW	~30-50K on X; 1.4M+ YouTube	Calculus/algebra problem-solving channel followed by students grinding hard math courses and exams.	Look-alike + keyword 'calculus exam', 'solve integrals'; pitch 'turn your problem sets into graded practice'.	stem-core
40	87	The USMLE (account) @TheUSMLE ·NEW	~20-40K on X	USMLE prep tips/quizzes hub; followers are med students gripping Step 1/2 with hard deadlines.	Follower targeting on @TheUSMLE; keyword 'USMLE Step 1', 'Step 2 CK'; deadline-timer messaging works well.	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
41	86	#CFA (hashtag) #CFA ·NEW	Large global CFA-candidate community	CFA candidates grind a famously text-heavy, high-stakes timed exam over months — ideal mastery-before-deadline job.	Keyword 'CFA' + 'CFA Level 1/2/3'; pitch 'turn the curriculum into active practice'.	econ-business
42	86	#MedStudentTwitter (hashtag) #MedStudentTwitter ·NEW	Large med-student community	Specifically the student slice of med-twitter — exactly the deadline-bearing pre-professional masterer.	Keyword 'MedStudentTwitter' + 'medical school'; higher purity than broad #medtwitter.	med-health
43	86	studytwit academy (account) @studytwitacademy ·NEW	~5-15K (study community hub)	Community hub account organizing study-twitter members around accountability and method-sharing.	Follower targeting + look-alike seed inside studytwit; collaborate for organic challenges (e.g., 'master a chapter in a week').	learning-method
44	85	#MCAT (hashtag) #MCAT ·NEW	Large pre-med community on X	Pre-meds preparing for a high-stakes timed exam over dense bio/chem/physics — strong fit.	Keyword 'MCAT' + 'premed'; lead with 'turn your prep books into practice questions'.	med-health
45	85	#medtwitter (hashtag) #medtwitter ·NEW	Very large global med community	Med students and educators sharing study resources and exam strategy across dense medical material.	Keyword 'medtwitter'; segment to student-stage accounts; pair with 'turn lecture PDFs into board-style quizzes' creative.	med-health
46	84	StudyBLR (account) @itsstudyBLR ·NEW	~20-40K (study community)	Cross-platform study community account; audience is students building study habits and revision systems.	Look-alike on @itsstudyBLR; keyword 'studyblr', 'revision', 'study with me'.	learning-method
47	84	Tibeas / Toby Hendy (account) @TobyHendy ·NEW	~20-40K on X; 1M+ YouTube	Physics/math/astronomy creator; audience is curious STEM students working through dense technical material.	Look-alike on @TobyHendy; keyword 'physics exam', 'quantum', 'study physics'.	stem-core
48	83	#examseason (hashtag) #examseason ·NEW	Spikes large during exam periods	Used by students at peak deadline pressure — the sharpest willingness-to-pay moment ('ace your exam in 3 days').	Keyword 'examseason' + 'finals'; time campaigns to exam windows; urgency-but-honest creative.	exam-prep
49	83	Domain of Science / Dominic Walliman (account) @DominicWalliman ·NEW	~30K on X; 1.5M+ YouTube	Maps of physics/chem/biology used by STEM undergrads orienting dense fields before exams.	Look-alike + keyword 'physics', 'chemistry map', 'STEM'; good for 'turn this dense field into a concept map' creative.	stem-core
50	82	#AcademicChatter (hashtag) #AcademicChatter ·NEW	Very large; hundreds of thousands of academics/students	Grad students and academics discussing study/research methods and academic-life grind — strong method + dense-material fit.	Keyword targeting 'AcademicChatter'; pair with research-paper-to-quiz creative for the PhD/grad slice.	learning-method
51	82	#chemtwitter (hashtag) #chemtwitter ·NEW	Large chemistry community on X	Chemistry students and educators (incl. organic chem grinders) sharing mechanisms and study material.	Keyword 'chemtwitter' + 'organic chemistry exam'; orgo is a notoriously hard graded course = high intent.	stem-core
52	82	#finals (hashtag) #finals ·NEW	Very large during finals periods	Peak-deadline student conversation; high intent for fast mastery tools.	Keyword 'finals' + 'finals week'; schedule for US semester finals; demo 'chapter to quiz in 30s'.	exam-prep

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
53	82	AnalystPrep (account) @analystprep ·NEW	~5-15K on X	CFA/FRM prep provider; audience is finance candidates actively studying dense material.	Look-alike on @analystprep; keyword 'FRM', 'CFA mock'; complementary-not-competing positioning (we generate from their notes).	econ-business
54	82	Eddie Woo / Wootube (account) @misterwootube ·NEW	~20-40K on X; 2M+ YouTube	Globally followed high-school/early-university math teacher; audience is students mastering graded math curricula.	Look-alike on @misterwootube; keyword 'math class', 'calculus', 'exam revision'.	stem-core
55	81	#engineeringstudent (hashtag) #engineeringstudent ·NEW	Large engineering-student community	Engineering undergrads master dense problem-heavy courses (thermo, signals, mechanics) on graded deadlines.	Keyword 'engineeringstudent' + 'engineering exam'; problem-set-to-practice creative.	stem-core
56	81	CFA Institute (account) @CFAINstitute ·NEW	~200K+ on X	Official body whose follower base is candidates and finance learners studying for the CFA.	Follower look-alike on @CFAINstitute; filter to candidate-stage; keyword 'CFA exam'.	econ-business
57	81	Flammable Maths (account) @Flammy3 ·NEW	~10-20K on X; 400K+ YouTube	Hard-calculus/integration channel for university students who love grinding tough problems.	Look-alike + keyword 'integration bee', 'calculus 2'; niche but very high deadline-STEM purity.	stem-core
58	80	#compsci / CS students (hashtag) #compsci ·NEW	Very large CS community on X	CS students learning new frameworks from docs and mastering algorithms courses — matches Ritsu's 'learn a framework fast' + code-exercise workflows.	Keyword 'compsci' + 'algorithms', 'learn to code'; lead with 'turn docs into code exercises' creative.	cs-ml
59	80	#mathtwitter (hashtag) #mathtwitter ·NEW	Large active educator+student community (MTBoS)	Math educators and serious students sharing problems and methods; deadline-bearing math learners reachable here.	Keyword targeting 'mathtwitter' + 'MTBoS'; pair with 'auto-generate math practice from your textbook' creative.	stem-core
60	80	#nursingstudent (hashtag) #nursingstudent ·NEW	Large nursing-student community	Nursing students master dense pharmacology/anatomy for NCLEX and course exams.	Keyword 'nursingstudent' + 'NCLEX'; concrete pharmacology-quiz demo creative.	med-health
61	80	300 Hours — CFA prep (account) @300Hours ·NEW	~5-10K on X	Popular CFA-candidate community/blog; audience is mid-prep finance learners on a deadline.	Follower targeting on @300Hours; keyword 'CFA study plan'; high-intent finance niche.	econ-business
62	79	#accountingstudent (hashtag) #accountingstudent ·NEW	Mid-size accounting/CPA community	Accounting students and CPA candidates mastering rules-heavy material for graded exams.	Keyword 'accountingstudent' + 'CPA exam'; concrete 'standards-to-flashcards' demo.	econ-business
63	79	NASA / physics-curious STEM via #PhysicsTwitter (hashtag) #PhysicsTwitter ·NEW	Large physics community on X	Physics undergrads and grads discussing problem sets and exam topics in a rigor-first culture.	Keyword 'PhysicsTwitter' + 'physics problem set'; target university-aged followers for deadline intent.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
64	78	#econtwitter (hashtag) #econtwitter ·NEW	Very large economics community on X	Economics students and grad students discussing dense models and coursework — high reading-load subject.	Keyword 'econtwitter'; segment to student/PhD accounts; pair with 'break down this econ paper into quizzes' creative.	econ-business
65	78	#PhDlife (hashtag) #PhDlife ·NEW	Very large PhD community	PhD students consume and must master extremely dense research papers — a perfect 'paper to testable knowledge' job.	Keyword 'PhDlife' + 'PhD'; lead with research-paper-breakdown creative; rigor-first tone fits skeptical academics.	exam-prep
66	77	#gradschool (hashtag) #gradschool	Large active community of graduate students	Grad students juggling qualifying exams, hard coursework and dense reading — high willingness to pay to master material before a graded deadline.	Keyword-target #gradschool + #PhD + 'quals' for the exam-prep angle; serve the 'ace your exam / break down a paper' creative.	exam-prep
67	77	#IMConf — Internal Medicine board review (hashtag) #IMConf ·NEW	Niche but engaged physician/resident community	Residents and students doing internal-medicine board review over dense clinical material.	Keyword 'IMConf' + 'ABIM'; niche high-intent; clinical-vignette-quiz creative.	med-health
68	74	#studygram (hashtag) #studygram ·NEW	Very large cross-platform study community	Study-aesthetic community of students sharing revision and routines; broad but study-intent.	Keyword 'studygram' + 'study motivation'; visual-first creative for this aesthetic-driven audience.	exam-prep
69	72	#biology / bio students (hashtag) #biology ·NEW	Very large; broad	Biology undergrads and pre-meds memorize and must understand dense factual material for exams.	Keyword 'biology' is broad — layer 'biology exam', 'bio major', 'premed' to tighten to deadline learners.	stem-core
70	67	#100DaysOfCode (hashtag) #100DaysOfCode	Very large — one of X's most active learning hashtags (millions of tweets, dedicated retweet bot)	The broader public coding-learning commitment community; many participants are CS students and ML learners logging daily study against a 100-day deadline.	Keyword/hashtag-target #100DaysOfCode for high-volume reach of committed self-learners; layer ML keywords to filter toward the CS/ML subset.	general-learning
71	67	#AcademicTwitter (hashtag) #AcademicTwitter	Large global community of grad students, researchers and academics	Home of grad students and researchers facing quals and dense papers — directly matches the 'break down a research paper / pass quals' persona slice.	Keyword-target #AcademicTwitter and #gradschool for the research-paper-to-quiz angle; pair with STEM-field keywords to focus on technical fields.	general-learning
72	67	#studytwt (hashtag) #studytwt	Large active student community (hundreds of thousands of tweets/users)	The core study-Twitter community where students post exam-prep, notes and motivation — the deadline-bearing learner's home base.	Keyword-target 'studytwt' plus 'exam', 'finals', 'study with me' to reach students mid-grind; best for general-mastery and exam-prep creatives.	general-learning

Facebook — groups & pages (74, ranked by suitable score)

Ad mechanism: Meta Ads — detailed-interest + group-adjacent + lookalike.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Quizlet (official Page) facebook.com/quizlet/	~1M+ followers	Quizlet's audience is students who already pay for flashcard/quiz study — Ritsu's direct substitute, so its followers are pre-qualified active-study buyers.	Detailed-interest 'Quizlet' as a large available interest, narrowed to 'College student' + STEM interests. Creative: 'Quizlet, but it builds the set from your actual lecture PDF.' Direct competitor-substitution targeting.	learning-method
2	96	Ali Abdaal (Productivity / Study) facebook.com/AliAbdaalOfficial •NEW	~8M across social (Page in the hundreds of thousands; YouTube/IG dominant)	The world's most-followed 'evidence-based study & productivity' creator; ex-doctor audience is exactly the deadline-bearing masterer hunting better learning methods.	Use as a detailed-interest seed ('Ali Abdaal') and build a lookalike from page engagers; ideal organic-seeding partner for a 'turn any source into active recall' angle.	learning-method
3	95	Thomas Frank (College Info Geek) facebook.com/ThomasFrankImpossible •NEW	Page ~200K-400K; YouTube 2.9M+	College-focused study-skills creator (active recall, note-taking, focus) whose audience is students optimizing how they study for graded courses.	Detailed-interest 'Thomas Frank' / 'College Info Geek'; pair with student-life interests; strong fit for spaced-repetition messaging.	learning-method
4	94	Anki / spaced-repetition study communities facebook.com — search 'Anki' (multiple groups; e.g. med-student Anki communities run 10K-13K+)	10K-13K+ per group (multiple groups)	Members already practice active recall with Anki — the exact substitute Ritsu replaces by auto-generating flashcards from any source in seconds.	Detailed-interest 'Anki' is an available interest — target it directly as a high-intent study-method audience. Creative: 'stop hand-making Anki cards — upload your PDF, get the deck instantly.' Pure substitution angle.	learning-method
5	94	Med School Insiders facebook.com/medschoolinsiders •NEW	~7,500 page likes (Facebook); 1.7M+ YouTube	Premier study-strategy + USMLE/MCAT resource; audience is high-stakes medical learners obsessed with efficient mastery of dense material.	Seed lookalike from page engagers; detailed-interest 'Med School Insiders'; angle on accurate, non-hallucinated quizzes from lecture PDFs.	learning-method
6	93	The AnKing facebook.com/ankingmed •NEW	~2.1K followers (Facebook); large on YouTube/IG	The canonical Anki/spaced-repetition authority for med students; audience already believes in active recall and would compare Ritsu to manual Anki decks.	Detailed-interest 'Anki' + 'AnKing'; message 'auto-generate spaced-repetition cards from your own source in 30s'; lookalike from engagers.	learning-method
7	92	Artificial Intelligence & Deep Learning (DeepNetGroup) facebook.com/groups/DeepNetGroup/	~500K members	The single largest AI/ML learning group on Facebook, packed with learners working through deep-learning courses, papers, and dense lecture material — exactly Ritsu's ML-masterer wedge.	Use as a saved-audience seed: layer detailed-interest 'Deep learning' + 'Artificial intelligence' and run group-adjacent placement; build a lookalike from anyone who clicks. Optionally request an organic seed post pinned by an admin since it's news/research heavy.	cs-ml
8	92	Artificial Intelligence and Machine Learning facebook.com/groups/ai.ml.bigdata/ (Artificial intelligence, Machine learning, Big data Learners)	~170K members	A beginner-friendly, resource-sharing AI/ML group whose members are actively learning and asking 'how do I master this?' — the deadline-bearing self-learner archetype.	Detailed-interest target 'Machine learning' + 'Artificial intelligence (marketing)' narrowed to behaviors 'Engaged Shoppers'/students; this group's 'beginner learners' framing maps to the 'turn lecture PDFs into practice' ad angle. Seed with a free-upload demo post.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
9	92	Data Mining / Machine Learning / Artificial Intelligence facebook.com/groups/1939366696159868 (Data Science - Machine Learning, Artificial intelligence)	~125K-130K members	Research-and-learning-resource oriented group — members process papers and dense ML content, the exact source material Ritsu turns into active practice.	Pair detailed-interest 'Data science' + 'Machine learning' with the 'break down a research paper into a quiz' creative. Use group membership as an audience-insight signal to refine a lookalike seeded from paper-to-quiz landing-page visitors.	cs-ml
10	92	Data Science (largest data-science discussion group) facebook.com — search 'Data Science' (described as the largest data-science discussion community on FB)	100K+ members	Broad data-science learning community; members continuously upskill from courses, books, and papers and rely on Quizlet/Anki/ChatGPT today.	Detailed-interest 'Data science' as a large reach audience, narrowed with 'Online learning' + 'Studying'. Creative: 'replace your Anki + ChatGPT study stack — upload, get a tutor.' Seed lookalike from converters.	cs-ml
11	92	Kaggle (official Page) facebook.com/kaggle/	~74K followers	Official page of the world's largest data-science community; followers are competition-driven learners who constantly upskill on graded leaderboards (a deadline analog).	Detailed-interest target 'Kaggle' directly (it is an available interest) + 'Data science'; run a lookalike off page-engagers. Creative: 'turn the course behind your next competition into active recall.'	cs-ml
12	92	Python Machine Learning & Deep Learning facebook.com — search 'Python Machine Learning & Deep Learning' (one of the most active ML groups, ~85K+)	~85K members	Highly active group of practitioners learning ML via Python — engineers learning a new framework from docs, a named Ritsu persona archetype.	Detailed-interest 'Python (programming language)' + 'Deep learning'; lead creative with the 'learn a new framework fast / code exercises from docs' angle. Strong lookalike seed for the engineer sub-persona.	cs-ml
13	92	Anki - Spaced Repetition Flashcards (community group) Facebook group: search 'Anki Study Group' / 'Anki Spaced Repetition' •NEW	Tens of thousands across multiple Anki groups	Members manually build spaced-repetition decks for hard courses/exams — the exact pain Ritsu automates from source material.	Group-adjacent targeting via interest 'Anki'; organic seeding with a before/after 'PDF to deck' demo; high method-belief audience.	learning-method
14	91	Feynman Technique / Learn How to Learn Facebook group: search 'Learn How to Learn' / 'Feynman Technique' •NEW	Tens of thousands	Audience explicitly believes in explain-it-back / active mastery — Ritsu's 'Ask Me' and Feynman modes map perfectly.	Interest 'learning how to learn' (Coursera course) + 'Feynman'; lead with 'explain concepts back to an AI tutor'.	learning-method
15	90	Beginners, let's start their programming journey from here facebook.com — search the group name (~91K members; Python/JS/C/game dev)	~91K members	Entry-stage coders working through programming courses on a schedule — the self-learner/engineer who needs material turned into active drills.	Detailed-interest 'Learning to code' + 'Python'; narrow to 18-30. Creative: 'learning to code from a course? get code exercises and quizzes auto-made.' Seed + lookalike from clickers.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
16	90	Computer Programming (C, C++ , C#, Python, Java, Android) facebook.com — search 'Computer Programming' group (~96K members)	~96K members	Active CS-coursework group; members are students and learners grinding multi-week graded programming courses, a STEM-course-with-deadline match.	Detailed-interest 'Computer science' + 'Programming'; layer 'College student' life-event/behavior. Creative: 'exam or assignment due? turn your CS lecture slides into a quiz.'	stem-core
17	90	Programming (C, C++ , C#, Java, Python, Android, Web) facebook.com — search 'Programming' group (~407K members)	~407K members	Massive group of CS learners and students working through programming coursework and docs — Ritsu's 'engineer learning a framework / code exercises' use case.	Detailed-interest 'Computer programming' + 'Computer science' narrowed to students/'College student'; high-volume reach audience. Creative: 'learn a new framework from the docs — get code exercises auto-generated.'	stem-core
18	90	Python Programming Beginners facebook.com/groups/pythonprogrammingbeginners/	~246K members	Huge group of self-learners and students learning Python from courses/textbooks — feeds the engineer + self-learner personas who need active practice from dense docs.	Detailed-interest 'Python (programming language)' + 'Learning to code'; narrow to 18-34 students. Creative: 'turn the Python course you're taking into quizzes and code drills.' Strong lookalike seed.	stem-core
19	90	Self-Taught Programmers facebook.com/groups/selftaughtprogrammers/	~140K members	Self-directed CS learners without a degree, working through bootcamp/ course material on their own timeline — the committed self-learner who values genuine mastery.	Detailed-interest 'Computer programming' + 'Online courses (education)' + behavior 'Engaged Shoppers'; creative emphasizes 'master it yourself, AI is leverage not a shortcut.' Seed post + retarget.	stem-core
20	90	Leah4Sci Organic Chemistry Study Hall studyhall.leah4sci.com/join/ (Facebook group linked) ·NEW	Thousands (paid + free community)	Students fighting through organic chemistry — a notoriously hard, graded, deadline-driven gateway course.	Interest 'organic chemistry' + pre-med/chem majors; seed via creator; lead with reaction-mechanism practice generation.	stem-core
21	90	RemNote Users / Spaced Repetition Learners Facebook group: search 'RemNote' / 'Spaced Repetition Learning' ·NEW	Several thousand	Power-learners using note-linking + spaced repetition for university material; primed to value an automated active-learning loop.	Interest 'RemNote' + 'spaced repetition'; narrow to students; A/B the 'concept map from your notes' angle.	learning-method
22	89	Artificial intelligence, Machine learning, Big data Learners facebook.com/groups/ai.ml.bigdata/	Tens of thousands of members	Explicitly a 'Learners' group — members self-identify as people studying AI/ML, the exact serious-learner identity Ritsu targets.	Detailed-interest 'Machine learning' + 'Big data' + 'Artificial intelligence'; the 'Learners' framing makes the 'true mastery, not passive watching' creative resonate. Seed + lookalike.	cs-ml
23	89	Deep Learning, Machine Learning & Neural Networks facebook.com/groups/210735762753395/	Tens of thousands of members	Focused neural-networks/deep-learning study group; members work through hard technical material (cs231n-style) and value rigor and accuracy.	Detailed-interest 'Neural network' + 'Deep learning'; narrow to graduate students. Creative aimed at the cs231n/CS229 archetype: 'turn your lecture notes and papers into a tutor that quizzes you.'	cs-ml
24	89	fast.ai (Practical Deep Learning community) facebook.com — search 'fast.ai'; community around course.fast.ai (Jeremy Howard)	Tens of thousands (course community)	fast.ai learners work through a hard, dense, multi-lesson deep-learning course on a self-imposed schedule — high-rigor, accuracy-valuing masterers.	Detailed-interest 'Deep learning' + 'Jeremy Howard'/'fast.ai' where available; narrow to engaged-with-online-courses. Creative: 'master every fast.ai lesson — active recall on the notebooks and lectures.'	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
25	89	Machine Learning (general open group) facebook.com — search 'Machine Learning' (multiple open groups, tens of thousands+)	Tens of thousands of members	Generic high-traffic ML group catching learners across courses (Stanford CS229, MIT 6.S191) who need dense lectures converted to active practice.	Detailed-interest 'Machine learning' as the core ML reach audience; narrow with 'Stanford University'/'Massachusetts Institute of Technology' interests to reach the named-course archetypes. Seed + lookalike.	cs-ml
26	88	Machine Learning / Deep Learning Students (study-focused) Facebook group: search 'Machine Learning' study/learner groups •NEW	Hundreds of thousands across ML learner groups	Beachhead audience learning ML from courses/papers; needs to truly master math-heavy material, not just skim.	Detailed-interest 'machine learning' + 'deep learning'; narrow to learners/students (exclude job-seeking pros); paper-to-quiz angle.	cs-ml
27	88	Organic Chemistry Help (student group) Facebook group: search 'Organic Chemistry Help' •NEW	Tens of thousands across orgo help groups	Pure orgo-struggle audience asking for help on graded coursework — primed for active-practice generation.	Group-adjacent via interest 'organic chemistry'; strong creative: 'upload your problem set, get a tutor'.	stem-core
28	87	DeepLearning.AI (official Page) facebook.com/DeepLearningAI_official (search 'DeepLearning.AI'); 7M+ learners across its courses; 7M+ learners across its courses)	7M+ learners (course base); large FB following	Andrew Ng's brand — its followers are enrolled in dated, graded DeepLearning.AI / Coursera specializations, the precise 'committed STEM/ML masterer with a deadline' wedge.	Detailed-interest target 'Deeplearning.ai' / 'Andrew Ng' / 'Coursera' as available interests; this is the highest-intent seed for the ML-course persona. Creative: 'finish your DeepLearning.AI specialization — quiz yourself on every lecture.'	cs-ml
29	87	Engineering Students / University course groups facebook.com — search '[University] Class of 20XX' + 'Engineering Students' groups (tens of thousands each)	Tens of thousands per group	University course/cohort groups concentrate undergrads in calculus, physics, linear algebra, and CS with hard graded deadlines — the STEM-course wedge at scale.	Target detailed-interest 'Engineering' + 'College student' (school/major-level where available) and 'Studying'; localize creative to exam season. Creative: 'midterms week — upload your lecture slides, get a quiz.'	stem-core
30	87	The Organic Chemistry Tutor (Page) facebook.com — search 'The Organic Chemistry Tutor' (companion to the 7M+-subscriber YouTube channel)	Hundreds of thousands of followers	Followers are STEM students cramming organic chemistry, physics, and calculus — high-failure-rate weed-out courses with hard graded deadlines, a core STEM-course wedge.	Detailed-interest 'Organic chemistry' + 'Physics' + 'Calculus' + 'The Organic Chemistry Tutor' (brand interest where available); lookalike off engagers. Creative: 'ace your orgo exam — turn lecture videos and textbook chapters into practice.'	stem-core
31	87	USMLE Step 1 Preparation Group facebook.com/groups/usmleforums4u/ •NEW	Tens of thousands of members	Med students gripping hard, high-stakes board material under a fixed exam date — the deadline-bearing masterer archetype.	Group-adjacent via interest 'USMLE'; emphasize accuracy/citations to beat the 'AI will lie' objection; lookalike from med-student engagers.	med-health
32	86	MCAT Self Prep Study Group mcatselfprep.com/facebook-study-group/ •NEW	Thousands of active members (growing)	Pre-meds doing months-long content review for the MCAT — exactly deadline-driven mastery of dense science.	Interest 'MCAT' + pre-med; partner-seed via the host org; angle on active-recall from any prep book.	exam-prep

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
33	86	Physics & Maths Tutor (PMT) community facebook.com/people/Physics-and-Maths-Tutor/100063722041363/ •NEW	Hundreds of thousands (huge revision brand)	Massive physics/maths revision audience working past papers and notes against exam deadlines.	Detailed-interest 'Physics and Maths Tutor'; lookalike from page; angle 'turn revision notes/past papers into quizzes'.	stem-core
34	85	CFA Level 1 Study Group facebook.com/groups/3344839012408066/ •NEW	Tens of thousands of candidates	CFA candidates average 300+ study hours against a hard exam date — intense deadline-mastery of dense finance.	Group-adjacent via interest 'CFA'; message 'turn the curriculum into active practice'; lookalike from candidate engagers.	econ-business
35	85	USMLE Step 1 Preparation 2024-25 facebook.com/groups/usmleprepare/ •NEW	Tens of thousands	Active cohort-based Step 1 prep group with members converting dense First Aid / lectures into recall.	Interest 'USMLE Step 1'; seed with a 'lecture PDF to quiz' demo; verify accuracy framing.	exam-prep
36	84	Calculus Help / Homework Help for Mathematics facebook.com/groups/318700059732913/ •NEW	Tens of thousands	Students stuck on graded calculus/math courses seeking step-by-step mastery — Ritsu's Solve/Exercise modes fit.	Interest 'calculus' + college students; message 'work problems step-by-step with an AI tutor from your textbook'.	stem-core
37	84	CFA Candidates (general / multi-level) Facebook group: search 'CFA Candidates' / 'CFA Level 2/3' •NEW	100K+ across CFA groups	Working professionals + students mastering huge finance curricula under fixed exam windows.	Detailed-interest 'Chartered Financial Analyst'; pair with finance-professional targeting; strong WTP signal.	econ-business
38	84	Pre-Med Students (Premed Headquarters) Facebook group: search 'Pre-Med Students' / 'Premed Headquarters' •NEW	50K-200K across major pre-med groups	Undergrads in hard graded science courses (bio, orgo, physics) plus MCAT — high-intent mastery audience.	Detailed-interest 'pre-medicine' + students 18-26; broad enough for reach with on-persona purity.	med-health
39	83	NCLEX Bootcamp Study Group facebook.com/groups/nclexbootcampstudentgroup/ •NEW	Tens of thousands of nursing students	Nursing students cramming high-volume content for a pass/fail licensure exam under deadline.	Interest 'NCLEX' + nursing; message 'turn your review notes into practice questions'; lookalike from engagers.	med-health
40	83	PhD & Grad Students (writing/ productivity) Facebook group: search 'PhD Students' / 'The PhD Place' community •NEW	Tens of thousands across grad-student groups	Grad students mastering dense research papers and qualifying-exam material — Ritsu's 'break down a research paper' job.	Interest 'graduate school' + 'PhD'; message 'turn dense papers into testable knowledge'; high method-belief.	general-learning
41	82	Computer Science Students / CS Majors Facebook group: search 'Computer Science Students' •NEW	100K+ across large CS-student groups	CS undergrads learning algorithms/theory from dense material and docs under exam and project deadlines.	Detailed-interest 'computer science' + students; angle on 'learn a framework from docs + code exercises'.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
42	82	CPA Exam Study Group Facebook group: search 'CPA Exam Club' / 'CPA Study Group' ·NEW	Tens of thousands	CPA candidates memorizing standards and working MCQs against section deadlines — high-stakes mastery.	Interest 'CPA exam' + accounting; message 'auto-generate practice questions from your review materials'.	econ-business
43	82	Tutor in Physics & Math Group facebook.com/groups/PhysicsMathTutor/ ·NEW	Several thousand	Students requesting physics/math help on graded coursework — direct deadline-mastery intent.	Group-adjacent via interest 'physics'; smaller but pure; seed with a concept-map demo.	stem-core
44	81	Academic Research / 'How I Read Papers' community Facebook group: search 'PhD researchers' / 'reading research papers' ·NEW	Several thousand to tens of thousands	Researchers wanting structured comprehension of papers — Ritsu's concept-map + quiz-from-paper value.	Interest 'academic research' + 'ResearchGate'; pure intent, smaller reach; paper-to-quiz creative.	general-learning
45	81	ACCA Official facebook.com/ACCA.Official/ ·NEW	~2.2M page likes	Global accountancy-qualification audience studying dense, exam-gated material — accounting students master-or-fail.	Detailed-interest 'ACCA'; build lookalike from page; narrow to students/candidates; very high reach.	econ-business
46	81	Biology Students / Biology Help Facebook group: search 'Biology Students' / 'Biology Help' ·NEW	Tens of thousands	Memorization-heavy biology courses (and pre-med bio) where active recall dramatically beats rereading.	Interest 'biology' + students; message 'auto-flashcards + concept maps from your bio chapter'.	stem-core
47	80	GMAT Club (official Page) facebook.com/gmatclubforum/	~200K+ page likes (1M+ member community overall)	The hub for GMAT/GRE test-takers preparing for a dated, high-stakes graded exam — disciplined masterers who replace flashcard/quiz tools.	Detailed-interest target 'GMAT' + 'Graduate Management Admission Test' + 'Studying'; lookalike from GMAT-prep page engagers. Creative: 'turn your GMAT prep books into active drills.'	exam-prep
48	80	Chemistry Students Help (general) Facebook group: search 'Chemistry Help' / 'Chemistry Students' ·NEW	Tens of thousands	General + physical chemistry students with graded problem-heavy courses needing practice.	Interest 'chemistry' + college; seed with a 'problem set to practice quiz' creative.	stem-core
49	80	GRE / GMAT Prep Study Group Facebook group: search 'GRE Prep' / 'GMAT Study Group' ·NEW	100K+ across GRE/GMAT groups	Grad-admissions test-takers grinding quant/verbal against a registration deadline — strong exam-prep intent.	Detailed-interest 'GRE' / 'GMAT'; message 'drill quant from your prep book with an AI tutor'; lookalike from engagers.	exam-prep
50	80	Mechanical Engineering Students facebook.com/mechanicalstudents/ ·NEW	~9,800+ likes (page) plus large affiliated groups	Engineering undergrads with dense, graded technical coursework needing fast mastery of theory.	Detailed-interest 'mechanical engineering' + students; message 'master a new framework/topic from docs fast'.	stem-core
51	80	Nursing Students Study Group (general) Facebook group: search 'Nursing Students' study groups ·NEW	100K+ across large nursing-student groups	Anatomy/pharmacology-heavy curriculum with constant graded exams — sustained active-mastery need.	Detailed-interest 'nursing' + 'student'; large reach, slightly lower exam-timer intensity than NCLEX-specific.	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
52	80	Study Tips & Motivation (large student group) Facebook group: search 'Study Tips and Motivation' ·NEW	100K-500K (varies by group)	General serious-study community sharing methods, schedules, and exam prep — broad but high study-intent.	Group-adjacent + interest 'study skills'; broad reach, expect lower purity — use a strong deadline hook to filter.	learning-method
53	79	Cornell Notes & Note-Taking Methods Facebook group: search 'Note Taking' / 'Cornell Notes' ·NEW	Several thousand to ~50K	Members optimizing note-taking want to convert notes into testable practice — Ritsu's exact value-add.	Interest 'note-taking' + 'Cornell notes'; message 'turn your notes into quizzes'; modest reach.	learning-method
54	79	Data Science Students & Learners Facebook group: search 'Data Science' learner communities ·NEW	Hundreds of thousands	Self-learners and students grinding stats/ ML coursework who must master concepts for assessments.	Interest 'data science' + 'online courses'; high reach, mixed intent — filter with a 'master the math' hook.	cs-ml
55	78	Economics Students / Economics Help Facebook group: search 'Economics Students' / 'Economics Help' ·NEW	Tens of thousands	Econ undergrads with model- and math-heavy graded courses (micro, macro, econometrics) needing mastery.	Interest 'economics' + students; angle 'turn lecture slides into quizzes + concept maps'.	econ-business
56	78	Pomodoro / Deep Work & Focus for Students Facebook group: search 'Deep Work' / 'Study Focus' / 'Pomodoro' ·NEW	Tens of thousands	Focus-optimizing students are precisely the audience seeking more effective active-study workflows.	Interest 'deep work' + 'focus' + students; lead with 'spend focus time on practice, not making materials'.	learning-method
57	77	GMAT Preparation (Worldwide) facebook.com/groups/gmatworldwide/	Tens of thousands of members	Active global GMAT-prep group; members face a fixed test date and constantly trade study methods and materials.	Detailed-interest 'GMAT' narrowed to English-speaking countries; this group is a seeding target for an organic 'paste your GMAT notes, get a quiz' demo. Build lookalike off the resulting clicks.	exam-prep
58	77	GRE / GMAT Prep Study Group (Prepez) facebook.com/groups/PrepezStudyGroup/	Tens of thousands of members	Combined GRE+GMAT prep community — grad-school applicants on a deadline who need efficient active recall over passive review.	Detailed-interest 'GRE' + 'GMAT' + 'Graduate school'; creative leads with 'exam in 3 days? turn any prep PDF into a quiz.' Seed organically; retarget engagers into a lookalike.	exam-prep
59	77	Jack Westin (MCAT) Community Group facebook.com — search 'Jack Westin' group (the home for MCAT prep + courses)	Tens of thousands	A large MCAT-prep community tied to a course brand; members are mid-prep on a dated exam and share/seek study resources daily.	Detailed-interest 'MCAT' + 'Jack Westin' (brand interest where available); creative emphasizes accuracy/'won't hallucinate' to address the skeptical-of-AI premed. Seed via group post + retarget visitors.	exam-prep
60	77	MCAT Self Prep Study Group facebook.com/groups/318062205385017/	Thousands (growing, active)	Self-directed MCAT students explicitly building their own study systems from materials — exactly the 'I want to master this myself, not be handed a course' Ritsu user.	Target detailed-interest 'MCAT' + 'Studying'; seed organically with an admin-approved post showing the upload-to-quiz flow. Lookalike off engaged clickers from the MCAT creative.	exam-prep

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
61	77	MCATBros (MCAT Preparation Study Group + Premed + Med Application) facebook.com/groups/mcatbros/	~40K+ members	Premeds grinding for a single high-stakes dated exam (the MCAT) — the purest 'looming graded deadline + burned by passive study' persona, heavy Anki/Quizlet users.	Detailed-interest 'MCAT' + 'Pre-medical' + 'Anki'; build a lookalike from MCAT-landing-page visitors. Creative: 'ace your MCAT — turn your prep PDFs and lecture videos into quizzes and flashcards in 30 seconds.'	exam-prep
62	77	Premed Students / Pre-Medical Community groups facebook.com — search 'Premed Students' / 'Pre-Med' (multiple large groups, tens of thousands each)	Tens of thousands per group	Premeds juggling orgo, biochem, physics and the MCAT — the densest concentration of deadline-bearing STEM masterers who buy study tools.	Detailed-interest 'Pre-medical' + 'Medical school' + 'Studying'; layer 'College student'. Creative: 'orgo, biochem, MCAT — upload any chapter, get quizzed.' Highest-WTP exam-prep seed.	exam-prep
63	77	Electrical Engineering World facebook.com/groups/Electrical.Engineering.World/ ·NEW	Hundreds of thousands of members	Large EE community with students tackling circuits/signals coursework under exam pressure.	Group-adjacent via interest 'electrical engineering'; very high reach, mixed pro/student — narrow to students for intent.	stem-core
64	76	Accounting Students (university) Facebook group: search 'Accounting Students' university groups ·NEW	Tens of thousands	Undergrad accounting students with graded, rules-heavy coursework needing active recall.	Detailed-interest 'accounting' + college students; modest reach, decent intent.	econ-business
65	76	Engineering Students (general study group) Facebook group: search 'Engineering Students' study groups ·NEW	100K+ across major engineering-student groups	Cross-discipline engineering undergrads with continuous graded problem sets and exams.	Detailed-interest 'engineering' + college; broad reach; pair with exam-season timing for intent.	stem-core
66	76	StudyTube / Studygram Community Facebook group: search 'StudyTube Community' / 'Studygram' ·NEW	Tens of thousands	Aesthetic-study + method-sharing crowd that actively tries new study tools and note-taking systems.	Interest 'study motivation' + 'note taking'; visual creative needed; younger-skewing, lower deadline-intent — score conservative.	learning-method
67	75	OrganicERs (Organic Chemistry Education) organicers.org/ (Facebook group linked) ·NEW	Thousands (instructor + advanced-student community)	Educators and serious orgo students; reaches both course creators (Educators persona) and high-rigor learners.	Niche seeding rather than broad ads; angle on educators generating course practice from existing material.	stem-core
68	74	Electrical & Electronics Engineering facebook.com/groups/Electrical.and.Electronics.Engineering/ ·NEW	Hundreds of thousands of members	Large EE/ECE community including students mastering circuits and electronics coursework.	Group-adjacent via interest 'electronics engineering'; high reach, mixed pro/student — narrow to students for deadline intent.	stem-core
69	74	Study With Me / Accountability Study Group Facebook group: search 'Study With Me' / 'Study Accountability' ·NEW	Tens of thousands to 100K+	Accountability-driven students with active study habits and exam deadlines; receptive to a study companion tool.	Interest 'study motivation' + 'accountability'; broad student reach; moderate intent — use deadline hook.	general-learning

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
70	72	Self-Taught / Self-Learners Community Facebook group: search 'Self Learners' / 'Autodidact' communities ·NEW	Tens of thousands	Self-learners run multi-source learning projects — Ritsu's 'build a multi-source learning project' persona.	Interest 'self-directed learning' + 'online courses'; angle on multi-source learning paths; mixed intent.	general-learning
71	70	edX (official Page) facebook.com/edx/	~2M+ followers	Followers are enrolled in dated, graded university-grade STEM/CS courses (MITx, HarvardX) — the committed-masterer-with-deadline audience using passive video.	Detailed-interest 'edx' + 'MOOC' + 'Online learning'; narrow with a STEM interest. Creative: 'finish your edX course — quiz yourself on every module.' Good complement to Coursera reach.	general-learning
72	70	Business / MBA Students Study Group Facebook group: search 'MBA Students' / 'Business School' study groups ·NEW	100K+ across business-student groups	Business and MBA students consuming case-heavy reading; broader fit but real exam/coursework deadlines.	Detailed-interest 'MBA' + 'business school'; broad reach, lower subject-rigor purity — score moderate.	econ-business
73	67	Coursera (official Page) facebook.com/Coursera/	~4M+ followers	Followers are actively enrolled in dated, graded online courses (the deadline driver) across STEM/ML/data — a broad-but-on-job audience that uses passive video and needs active practice.	Detailed-interest 'Coursera' is a large available interest — use as a top-of-funnel reach audience, narrowed with 'Studying' + 'Online learning'. Creative: 'turn your Coursera lectures into quizzes that make it stick.'	general-learning
74	67	Studying / Study Motivation interest communities facebook.com — target detailed-interest 'Studying' (broad) + study-motivation Pages/groups	Millions (interest-level)	Captures the broad 'serious learner who studies hard' identity across all courses, useful for reach + lookalike scaling beyond niche ML/exam groups.	Use Facebook's 'Studying' detailed-interest as a broad reach layer, narrowed (AND) with 'Online learning' + a specific STEM/exam interest so it stays on-persona. Primary creative: 'Turn Raw Materials Into True Mastery.'	general-learning

Instagram — accounts & hashtags (72, ranked by suitable score)

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Ali Abdaal instagram.com/aliabdaal/	~1M followers (8M cross-platform)	The reference 'evidence-based study technique' creator (active recall, spaced repetition) — his audience already believes active beats passive, Ritsu's core thesis.	Flagship influencer-partnership target; his active-recall framing maps 1:1 to Ritsu. In Ads Manager use interest 'Productivity' + 'Study skills' and a lookalike off his engager custom audience.	learning-method
2	99	revisign instagram.com/revisign/	~85K followers	Flagship medical-student studygram (Toronto) producing study notes/aesthetics — the deadline-driven note-maker persona Ritsu automates.	Studygram creator-collab target. Whitelist a 'your notes, auto-quizzed' Reel. Ads Manager: lookalike from engagers + interest 'Study skills'. Seed with #studygram.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
3	99	sprinkle studies instagram.com/ sprinklestudies/	~50K–100K followers (US nursing studygram)	American nursing-student studygram documenting a graded, deadline-heavy program — US-led, on-persona serious learner converting material to practice.	US studygram micro-collab (high authenticity). Whitelist a 'NCLEX/nursing notes → quiz' Reel. Ads Manager: interest 'Nursing' + 'Study skills'; lookalike off engagers.	learning-method
4	96	#studytips instagram.com/ explore/tags/ studytips/	~5M+ posts	High-intent tag where learners actively seek better study methods — the exact moment to introduce active-recall-as-a-product.	Seed how-to Reels (active recall, Feynman) ending in Ritsu CTA. Paid mirror: interest 'Study skills'; lookalike from study-tip engagement audience.	learning-method
5	96	#activerecall #activerecall •NEW	Mid-size study-method hashtag; tens of thousands of posts (active-recall niche)	Students hunting for evidence-based retrieval-practice methods congregate here — the exact 'active learning beats passive' belief Ritsu is built on.	Seed Reels demoing Ritsu auto-generating active-recall quizzes from a PDF; pair with #spacedrepetition and #studytips for hashtag-adjacent organic + use as interest signal for lookalike seeding.	learning-method
6	95	@sharpenyourstudies (Lucy) instagram.com/ sharpenyourstudies/ •NEW	~56K followers	Productivity & study-tips creator whose whole audience is students optimizing exam performance — high-purity learning-method niche.	Ideal micro-creator partnership: sponsored Reel showing Ritsu turning her notes into a quiz; audience is squarely deadline- bearing students.	learning-method
7	95	#spacedrepetition #spacedrepetition •NEW	Mid-size method hashtag; tens of thousands of posts	Audience already practices spaced repetition (Anki crowd) and is open to a tool that auto- builds review material — direct substitution intent.	Organic seeding of 'replace your Anki deck-building grind' Reels; target ad interest overlaps with Anki/Quizlet users and #studygram.	learning-method
8	94	#studygram instagram.com/ explore/tags/ studygram/	~12M+ posts (core studygram tag)	The single largest gathering point for serious self-identified students sharing active study workflows — the exact identity our deadline- bearing masterer adopts.	Seed Reels with this + sibling tags for organic reach; for paid, target Meta interest 'Study skills'/'Test (assessment)' and place Reels ads against studygram-adjacent content. Build an engagement custom audience from Reels using this tag.	learning-method
9	94	#studymotivation instagram.com/ explore/tags/ studymotivation/	~40M+ posts; 35% engagement rate	High-intent tag used by learners pushing through hard, deadline-driven study — the emotional moment Ritsu sells into (passive study burnout).	Organic seeding tag with strong engagement. For paid, pair with interest 'Motivation' + 'Student' and run a 'beat the deadline with active recall' hook video; retarget tag-engagers via custom audience.	learning-method
10	94	#studywithme instagram.com/ explore/tags/ studywithme/	~8M+ posts	Tag for focused, session-based studiers (the active-study ritual) — behaviorally the closest to Ritsu's 'do the work' mode.	Strong Reels-seeding tag for 'study with me + Ritsu quiz' content. Paid mirror: interest 'Study skills' + 'Concentration'; retarget engagers.	learning-method
11	94	#studytips #studytips •NEW	Very large; millions of posts (top study- method hashtag)	Core hub for learners actively seeking better study methods — highest-intent meta-layer audience the founder flagged as most suitable.	Use for organic Reels reach + as a content-affinity interest cluster in Meta Ads; lead creative with a concrete method (Feynman / active recall) not the product.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
12	93	@merveenroute (Merve) instagram.com/merveenroute/ •NEW	~222K followers	Data scientist sharing AI tech tips + study/productivity — audience overlaps learners using AI to study smarter and skews technical/STEM.	Strong creator collab for the AI-skeptic-but-curious segment; she can credibly vouch on accuracy. Use for both sponsored Reel + lookalike seed.	learning-method
13	93	#feynmantechnique #feynmantechnique •NEW	Niche but high-intent method hashtag	Feynman-method seekers want to explain concepts to master them — directly maps to Ritsu's 'Ask Me / explain it back' tutoring mode.	Seed Reels showing Ritsu's Feynman-style breakdown / Ask-Me mode; small but pure niche for organic.	learning-method
14	92	Codebasics Official instagram.com/codebasicshub/	~59K followers (1M+ learner community)	Data/AI upskilling brand with a large learner community working through structured ML/data courses with deadlines — direct ML-course fit.	Brand-partnership target with a big off-platform community to retarget. Ads Manager: interest 'Data science' + 'Machine learning'; lookalike from engagers.	cs-ml
15	92	Codingmermaid.ai (Danica Simic) instagram.com/codingmermaid.ai/	~157K followers	Data-scientist creator sharing AI/DS study + tech tips to an aspiring-practitioner audience — credible ML-educator with a learner following.	Creator-partnership target (relatable 'how I study ML' angle). Ads Manager: lookalike from her engagers + interest 'Data science'. Good for authentic Reels seeding.	cs-ml
16	92	Data Science Machine Learning AI instagram.com/data_science_learning/	~244K followers	Large account dedicated to simplifying ML/data-science for learners — audience is mid-course ML masterers needing active practice on papers/notebooks.	Branded-content target for a 'paper → quiz in 30s' Reel. Ads Manager interests 'Data science' + 'Artificial intelligence'; retarget account-engagers via lookalike.	cs-ml
17	92	datascienceinfo instagram.com/datascienceinfo/	~210K followers	AI/ML learning-focused account whose followers are actively studying to stay current in AI — strong ML-wedge fit.	Collab/whitelist target. Ads Manager: interest 'Machine learning' + 'Python (programming language)'; lookalike off engagement audience. US geo-filter for wedge.	cs-ml
18	92	ML India instagram.com/mlindia.ai/	~250K+ followers	Largest ML practitioner/enthusiast community on IG — members are actively upskilling in ML, the AI half of Ritsu's STEM/ML wedge.	Community-account collab + Reels placement against ML content. Ads Manager: interest 'Machine learning' + 'Deep learning'; build lookalike from engagers. Geo-skew to US for first-100 wedge.	cs-ml
19	92	@robinrevises (Robin) instagram.com/robinrevises/ •NEW	Mid-size studygram creator (study & productivity inspo)	Revision-focused creator — followers are mid-revision-cycle students with imminent exams, the deadline-bearing masterer profile.	Creator collab around 'revision week' seasonal pushes; target during exam season with active-recall demo creative.	learning-method
20	90	#calculus instagram.com/explore/tags/calculus/	~1M+ posts	Gateway STEM course for engineering/CS/physics students — broad, deadline-bearing mastery audience for a 'textbook chapter → quiz' demo.	Course-specific seeding tag. Paid mirror: interest 'Calculus' + 'Mathematics'; pair with 'AP Calculus' for exam-season ad sets; retarget engagers.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
21	90	#organicchemistry instagram.com/ explore/tags/ organicchemistry/	~1M+ posts	Names the single most-feared graded STEM course — students here have urgent, deadline-driven mastery needs Ritsu directly serves.	Course-specific Reels seeding ('orgo mechanisms → flashcards'). Paid mirror: interest 'Organic chemistry' + 'Chemistry'; retarget engagers near exam season.	stem-core
22	90	@emilystudying (Emily) instagram.com/ emilystudying/ •NEW	~32K followers	Studygram focused on studying, productivity, and digital note-taking — followers are note-takers ripe for a 'turn notes into practice' pitch.	Micro-creator collab; demo Ritsu ingesting her digital notes (PDF/Markdown) into flashcards. Good fit for note-taking-app crossover audience.	learning-method
23	90	#notetaking #notetaking •NEW	Large; hundreds of thousands of posts	Note-takers are exactly the passive-to-active conversion target — Ritsu turns their notes into quizzes/maps.	Organic seeding + Meta interest targeting overlapping Notion/Obsidian/GoodNotes users; creative angle: 'beautiful notes ≠ mastery — quiz yourself.'	learning-method
24	89	#machinelearning instagram.com/ explore/tags/ machinelearning/	~5M+ posts	Core ML tag where learners working through ML courses/papers congregate — the AI half of the STEM/ML wedge.	Seed ML demo Reels here. Paid mirror: interest 'Machine learning' + 'Deep learning'; US geo-filter for first-100 wedge; retarget tag-engagers.	cs-ml
25	89	@themathologer instagram.com/ themathologer/ •NEW	Mid-size math-education following (large on YouTube)	Demystifies real mathematics with rigor — audience is math learners who value depth and correctness, the accuracy-respecting STEM core.	Creator/interest targeting for math-major students; lead with Ritsu generating problem sets + concept maps from a calc/linear-algebra PDF.	stem-core
26	89	Thomas Frank (@tomfrankly) instagram.com/ tomfrankly/ •NEW	Mid-to-large; established study/productivity + Notion creator	Built his audience on study-skills and Notion 'second brain' systems — followers are tooling-obsessed serious students.	Notion-crossover seeding; target his audience interest cluster with 'your second brain should quiz you back' creative.	learning-method
27	88	#studygram #studygram •NEW	Very large; millions of posts (core study-community hub)	The central studygram community of students documenting and improving their study process — broad but high-intent learner pool.	Primary organic hashtag for every Ritsu study Reel; combine with niche method tags to escape the high-competition feed.	learning-method
28	87	#artificialintelligence instagram.com/ explore/tags/ artificialintelligence/	~10M+ posts	Broadest AI tag capturing learners studying AI/ML who need to convert courses and papers into mastery — wide top-of-funnel for the ML wedge.	Large but broad — seed targeted ML-study Reels and rely on interest 'Artificial intelligence' + narrower 'Machine learning' to refine. Lookalike from AI-content engagers; US geo-filter.	cs-ml
29	87	#datascience instagram.com/ explore/tags/ datascience/	~6M+ posts	Where bootcamp/cohort data-science learners share progress — deadline-bearing ML/DS upskillers Ritsu targets.	Organic seeding tag. Paid mirror: interest 'Data science' + 'Python (programming language)'; lookalike from DS-content engagers.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
30	87	Tina Huang (hellotinah) instagram.com/hellotinah/	~20K IG (900K+ YouTube)	Ex-Meta data scientist teaching self-study + AI tech-stack workflows — her self-learner audience overlaps Ritsu's ML-masterer wedge precisely.	Creator-partnership target (she runs a self-learner bootcamp = warm audience). Ads Manager: lookalike from engagers + interest 'Data science' / 'Self-help'.	cs-ml
31	87	#premed #premed ·NEW	Large; over a million posts	Pre-med students under intense GPA/MCAT pressure with dense graded science courses — extremely high willingness to pay for mastery.	Core exam-prep cluster; seed MCAT/bio quiz-generation Reels and combine with #mcats for targeting precision.	med-health
32	87	Physics Girl (Dianna Cowern, @thephysicsgirl) instagram.com/thephysicsgirl/ ·NEW	Large physics-communication following	Physics learners and STEM students who want to genuinely understand mechanics/quantum — high-rigor, deadline-bearing physics audience.	Audience-interest targeting toward physics/engineering undergrads; creative around turning a lecture video into a physics quiz.	stem-core
33	86	@pehlarank instagram.com/pehlarank/ ·NEW	Study-tips / knowledge creator, mid-size following	Study-tips and productivity content for exam-driven students seeking rank/grade improvement.	Test as a seeding partner for exam-prep cohorts; pair creative with concrete study-method hook rather than feature list.	learning-method
34	86	#engineeringstudent #engineeringstudent ·NEW	Large; hundreds of thousands of posts	Engineering undergrads juggling dense graded coursework (statics, circuits, thermo) with real deadlines — strong fit for problem-set generation.	Seed Reels of Ritsu making code exercises / problem sets from engineering lecture slides; pair with #stem and #engineering.	stem-core
35	86	#mcats #mcats ·NEW	Large; hundreds of thousands of posts	MCAT examinees with a hard deadline and a massive content load — the deadline-bearing masterer in its purest exam form.	Highest-intent med hashtag; seed 'turn your MCAT review book into a quiz bank' Reels; target during testing windows.	exam-prep
36	86	#studynotes #studynotes ·NEW	Large; millions of posts	Students sharing condensed notes — directly adjacent to 'convert notes into active practice.'	Seed before/after Reels (raw notes → auto-generated quiz); strong visual format match for IG.	learning-method
37	85	The Organic Chemistry Tutor instagram.com/theorganicchemistrytutor/	~21K IG followers (huge cross-platform/YouTube)	The go-to brand for STEM-course strugglers (orgo, calculus, physics) — directly names the hardest graded courses Ritsu helps students pass.	Exists as a Meta interest ('The Organic Chemistry Tutor') — strong STEM-course interest lever. Pair with 'Organic chemistry' + 'Calculus' interests for course-specific ad sets.	stem-core
38	85	@sugarbsn (Sugar BSN, RN) instagram.com/mylifeassugar_/ ·NEW	~269K followers	Nurse educator helping nursing students pass with study resources — large, deadline-driven NCLEX/nursing-exam audience.	Creator collab for the nursing vertical; demo Ritsu making NCLEX-style quizzes from lecture notes; her audience trusts study tools.	med-health
39	85	#studyhacks #studyhacks ·NEW	Large; hundreds of thousands of posts	Learners actively seeking shortcuts to study smarter — method-curious audience receptive to a tool that automates active practice.	Seed quick before/after method Reels; pair with #studytips and #activerecall; strong fit for short demo creative.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
40	85	#usmle #usmle ·NEW	Large; hundreds of thousands of posts	USMLE Step examinees with enormous content loads and hard test dates — peak deadline-bearing mastery intent.	Highest-intent med exam tag; seed 'generate Step-1 questions from your notes' Reels; target around exam scheduling windows.	exam-prep
41	84	@futuremdlife instagram.com/futuremdlife/ ·NEW	Mid-size med-student following	Med student sharing study tools/strategies for surviving med school — audience is in-the-trenches with USMLE-grade material.	Creator seeding for med-school study workflows; creative around turning dense slides into Step-1-style questions.	med-health
42	84	#mathstudent #mathstudent ·NEW	Mid-size; tens of thousands of posts	Self-identified math students (not casual math fans) facing graded multi-week math courses — higher purity than #math.	Higher-intent than broad #maths; seed problem-set-generation Reels and target alongside #calculus / #linearalgebra.	stem-core
43	84	#studywithme #studywithme ·NEW	Very large; millions of posts	Body-doubling / focus-session audience studying in real time toward exams — committed, in-the-grind learners.	Seed during exam season; creative angle 'study WITH a tutor that quizzes you, not just a timer.' Overlaps Pomodoro/focus interest.	learning-method
44	84	CFA Program (@cfaprogram) instagram.com/cfaprogram/ ·NEW	~81K followers	CFA candidates face a brutal multi-level exam with vast curriculum — classic deadline-bearing high-stakes masterer.	Target CFA-candidate interest cluster; seed 'build a CFA question bank from the curriculum' Reels around exam windows.	exam-prep
45	83	@engineeringstudent_ instagram.com/engineeringstudent_/ ·NEW	Mid-size engineering-student community account	Community account aggregating engineering-student life and study content — concentrated audience of hard-STEM degree-seekers.	Test as a shoutout/seeding partner for engineering cohorts; creative around mastering a framework/course from docs fast.	stem-core
46	83	@usmle_step1_step2 instagram.com/usmle_step1_step2/ ·NEW	Large MCQ-based med community account	Posts photo/text clinical cases and MCQs to USMLE candidates — a concentrated, exam-focused, quiz-native audience.	Test as a sponsored-post/seeding partner; their followers already learn via MCQs, an easy bridge to Ritsu's auto-quiz value.	exam-prep
47	83	#nursingstudent #nursingstudent ·NEW	Very large; millions of posts	Nursing students facing heavy memorization (pharm, anatomy) and NCLEX prep on strict timelines.	Big high-intent vertical; seed pharmacology/anatomy quiz Reels and pair with #nclex for targeting.	med-health
48	82	#biologystudent #biologystudent ·NEW	Mid-size; tens of thousands of posts	Bio majors and pre-health students memorizing dense material — prime flashcard + concept-map use case with exam pressure.	Target with #premed adjacency; creative: 'stop re-reading the textbook — quiz yourself on every chapter.'	stem-core
49	82	#cfaexam #cfaexam ·NEW	Mid-size; tens of thousands of posts	Self-identified CFA examinees mid-prep — narrow, high-intent finance exam audience.	Higher purity than broad #finance; seed quiz-bank creative and target during Level I/II/III sittings.	exam-prep
50	82	#medstudent #medstudent ·NEW	Very large; millions of posts	Medical students with the densest graded curriculum and USMLE deadlines — high-stakes mastery audience.	Broad med hub; narrow with #usmle / #step1 for intent; visual MCQ format is native to this community.	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
51	81	Corporate Finance Institute (@corporatefinanceinstitute) instagram.com/corporatefinanceinstitute/ ·NEW	~72K followers	Finance/banking learners and certification students (FMVA, CFA-adjacent) studying dense technical material.	Interest/lookalike targeting toward finance-cert seekers; creative around turning finance PDFs/lectures into practice questions.	econ-business
52	80	#premed instagram.com/explore/tags/premed/	~3M+ posts	Identity tag for pre-professional STEM students facing MCAT/coursework deadlines — concentrated, high-WTP segment of the wedge.	Organic seeding + Reels placement against premed content. For paid, mirror with interest 'Pre-medical' + 'MCAT' and retarget tag-engagers via custom audience.	exam-prep
53	80	Med School Bro (Dr. Jacob Portnoff) instagram.com/medschoolbro/	~2M followers	Largest premed/MCAT study-tips creator in the US — audience is exactly deadline-bearing pre-professional STEM masterers studying dense material.	Top-tier creator-partnership / branded-content target (whitelist a Reel demoing 'upload your Anki deck source → quiz'). For Ads Manager, build a lookalike from his engagers or target interest 'Medical College Admission Test (MCAT)'.	exam-prep
54	80	med school coach instagram.com/medschoolcoach/	~101K followers	Premed advising + MCAT study tips brand — audience is deadline-bearing pre-meds mastering dense science for a high-stakes graded exam.	Brand-collab + interest target ('MCAT', 'Pre-medical'). Whitelist a Reel showing MCAT-content → active recall. Lookalike from engagers for US premed reach.	exam-prep
55	80	Med School Insiders instagram.com/medschoolinsiders/	~55K followers	Premed/med-student performance-and-study brand (founded by a surgeon) — audience explicitly optimizes study efficiency for graded exams.	Brand-collab + interest target ('Medical school', 'USMLE'). Whitelist an efficiency-angle Reel ('study smarter, not longer'). Lookalike off engagers.	exam-prep
56	80	White Coats and Corgis instagram.com/whitecoatsandcorgis/	~86K followers	MS4 premed-mentor creator; relatable study-journey audience of premeds and med students cramming graded material — on-persona urgency.	Micro-influencer collab (authentic study-routine Reel). Ads Manager: lookalike off engagers + interest 'Medical school'. Strong organic-seeding fit.	exam-prep
57	80	#chemistry #chemistry ·NEW	Very large; millions of posts	Chemistry students (incl. dreaded organic chem) needing active practice on reactions/mechanisms before exams.	Narrow with #organicchemistry / #chemstudent for intent; seed Reels of Ritsu turning a chem chapter into a quiz + reaction concept map.	stem-core
58	80	#examprep #examprep ·NEW	Large; hundreds of thousands of posts	Cross-subject hub of learners with imminent graded exams — the deadline trigger Ritsu's 'ace your exam in 3 days' wedge targets.	Excellent seasonal/intent hashtag; combine with subject tags; lead creative with the exam-deadline pressure.	exam-prep
59	80	CFA Institute (@cfainstitute) instagram.com/cfainstitute/ ·NEW	~152K followers	Broader investment-professional + CFA-candidate audience studying rigorous finance content with exam deadlines.	Use as audience-interest anchor for finance exam-prep targeting + lookalikes; lead with accuracy/rigor (this audience is detail-obsessed).	econ-business

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
60	79	#accountingstudent #accountingstudent ·NEW	Mid-size; tens of thousands of posts	Accounting students and CPA candidates grinding dense, rule-heavy material toward graded exams.	Pair with #cpaexam for intent; creative around turning standards/textbook chapters into practice questions.	econ-business
61	78	#economicsstudent #economicsstudent ·NEW	Smaller niche; thousands of posts	Econ majors handling graded problem sets (micro/macro/econometrics) with real deadlines.	Small but high-purity; seed concept-map + problem-set Reels and target alongside #economics broad interest.	econ-business
62	78	#physics #physics ·NEW	Very large; millions of posts	Broad physics audience that includes serious undergrads with graded problem sets and exams.	Pair with #physicsstudent / #physicsmajor to raise intent; visual format match for derivation/quiz Reels.	stem-core
63	77	Blueprint MCAT instagram.com/blueprintmcatprep /	~39K followers	MCAT prep-course brand; followers are mid-prep, deadline-locked science masterers — textbook willingness-to-pay timer for Ritsu.	Competitor-adjacent interest target ('MCAT', 'Test preparation'). Run a 'free practice from your own materials' counter-offer Reel; lookalike from engagers.	exam-prep
64	77	Physics Wallah (PW) instagram.com/physicswallah/	~4M followers	Largest Education creator globally; STEM exam-prep audience (physics/chem/math) cramming for graded exams — on-persona by subject and urgency.	India-heavy audience (secondary market for Ritsu, not first-100 US wedge) — use as an existing Meta interest 'Physics Wallah' for cheap STEM-exam reach, but cap budget vs US-led targets.	exam-prep
65	74	#exams #exams ·NEW	Very large; millions of posts	Broad but timely audience peaking during exam seasons — captures committed students at their highest urgency.	Use for seasonal reach spikes; pair with niche tags and run exam-season campaign bursts rather than always-on.	exam-prep
66	71	#studymotivation #studymotivation ·NEW	~20M posts (one of the largest study hashtags)	Massive reach into students grinding toward goals/deadlines — broad motivation audience with embedded serious learners.	High reach but high competition (100/100); use for top-of-funnel organic volume, not precision. Pair with niche tags for targeting.	general-learning
67	70	Khan Academy instagram.com/khanacademy/	~313K followers	Broad STEM-course learner base (calculus, physics, chem, CS) — the canonical 'I'm learning a hard subject' interest that Ritsu turns into active practice.	Exists as a Meta ad interest ('Khan Academy') — direct interest-targeting lever for STEM learners. Pair with 'AP exams' / 'Calculus' interests for course-specific reach.	general-learning
68	70	MedStudentNotes instagram.com/med_student_notes/	~394K followers	High-yield medical study notes 'by doctors for students' — audience converts dense material into study artifacts, precisely Ritsu's job-to-be-done.	Branded-content / collab target (demo 'turn this lecture PDF into flashcards'). Ads Manager: interest 'Medical school' + 'Study skills'; lookalike from a Reels engagement audience built off medical-notes content.	general-learning
69	66	#collegestudent #collegestudent ·NEW	Very large; tens of millions of posts	US-skewed university audience (matches the US college STEM/pre-professional wedge) but broad in intent.	Good for US geo reach + lookalike seed; filter hard with subject/method overlays and deadline-driven creative.	general-learning

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
70	65	#gradschool instagram.com/ explore/tags/ gradschool/	~6M+ posts	Grad students (incl. CS/ML/qualifying-exam) reading dense papers under deadlines — a precise self-learner/researcher slice of the wedge.	Seed 'turn a research paper into a quiz' Reels. Paid mirror: interest 'Graduate school' + 'Research'; retarget tag-engagers; US geo-skew.	general-learning
71	65	#medschool instagram.com/ explore/tags/ medschool/	~25M+ posts	One of the largest serious-learner tags; med students are the archetypal dense-material masterers with constant graded deadlines.	Huge organic-reach tag for Reels seeding. Paid mirror: interest 'Medical school' + 'USMLE'; build lookalikes from medical-content engagement audiences.	general-learning
72	64	#studentlife #studentlife •NEW	Very large; tens of millions of posts	Broad university-student audience containing the serious-learner subset; useful for reach and lookalike seeding.	Top-of-funnel reach only; low purity — always combine with a method or subject tag and rely on creative to self-select serious learners.	general-learning

TikTok — creators & hashtags (52, ranked by suitable score)

Ad mechanism: TikTok Ads — interest + hashtag + Spark (creator) Ads.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Justin Sung (Dr Justin Sung) tiktok.com/ @justinsungofficial	~300K+ TikTok followers (700K+ YouTube)	A medical doctor and learning-science specialist who preaches active learning over passive re-reading — the EXACT belief Ritsu sells, attracting the rigor-seeking learner.	Top Spark Ads partner: his audience is pre-sold on active recall; boost a Spark Ad framing Ritsu as 'the tool that does the active-learning prep for you' and target lookalikes of his engagers.	learning-method
2	99	StudyQuill (Jasmine) tiktok.com/@studyquill	~200K+ followers (large StudyTube/ StudyTok crossover)	Well-known study-method creator covering note-taking and effective studying for serious students — strong StudyTok credibility.	Spark Ad partner with a trusted study-method audience; boost content pairing her note systems with Ritsu's auto-generated active practice.	learning-method
3	96	#studytok tiktok.com/tag/ studytok	Billions of cumulative views (core StudyTok community tag)	The defining community hashtag for the entire student-study subculture on TikTok — where committed learners self-identify.	Primary hashtag-cluster target; layer with #studytok in interest targeting and seed organic content using this tag to ride the community's native distribution.	learning-method
4	96	#studywithme tiktok.com/tag/ studywithme	Billions of cumulative views	Huge real-time-study-session subculture of students grinding through coursework — captive, focused-study audience.	Run In-Feed ads against #studywithme content; the audience is literally in study mode — strong context for a 'make practice from your notes' CTA.	learning-method
5	96	Gohar Khan (Gohar's Guide) tiktok.com/ @goharsguide	~3.8M TikTok followers	MIT-grad study/college creator whose massive audience is exactly serious US students prepping for hard courses and exams.	Creator-targeting + Spark Ad: pursue a paid partnership or boost his study-method content; his 3.8M serious-student following is a prime custom/ lookalike seed audience.	learning-method
6	95	#activerecall #activerecall (https:// www.tiktok.com/tag/ activerecall) •NEW	Hundreds of millions of views; core learning-science hashtag	Audience already believes 'active learning beats passive' — Ritsu's exact thesis; these users want quizzes/flashcards/practice, which is the product.	Highest message-fit hashtag: run creative that literally automates active recall from the user's own notes. Pair with #spacedrepetition in the same ad set.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
7	94	#studytips tiktok.com/tag/studytips	~7 billion video views (cumulative)	The single largest study-content hashtag on TikTok and the literal home of active-recall / exam-prep videos this persona watches before a deadline.	Use as a Hashtag interest signal in TikTok Ads Manager and target the #studytips content cluster; run In-Feed ads adjacent to this tag with a 'turn your slides into a quiz' hook.	learning-method
8	94	Gohar Khan (Gohar's Guide) @goharsguide ·NEW	~1.7M TikTok followers	MIT grad teaching memorization hacks, faster studying, and test-taking to academically ambitious students — exactly the sharper-not-lazier learner Ritsu targets.	Prime Spark Ads / sponsored-integration candidate; already runs brand deals (Dell, Pearson). His audience expects study-tool recommendations.	learning-method
9	93	#spacedrepetition #spacedrepetition (https://www.tiktok.com/tag/spacedrepetition) ·NEW	Tens of millions of views; method-purist niche	Flashcard/SRS-literate learners (Anki/Quizlet crowd) — directly substitutable to Ritsu's auto-generated flashcards from any source.	Position Ritsu as 'auto-builds your spaced-repetition deck from any PDF/lecture' — anti-Anki-manual-effort angle. Small but extremely high-intent audience.	learning-method
10	93	Dr. Sarah Rav @sarahrav ·NEW	Multi-million following (medicine + study-method crossover)	Doctor who teaches blurting, active recall, and 'study smarter not harder' — bridges the learning-method and medicine buckets, both core to Ritsu.	Spark Ad against her active-recall/blurting videos; her medical-student-heavy audience maps to Ritsu's dense-source mastery use case.	learning-method
11	92	Kallaway (Kane Kallaway) tiktok.com/@kanekallaway	~410K TikTok followers	Leading AI/tech explainer creator whose audience is learning-to-use-AI early adopters — high overlap with the AI-curious serious learner.	Spark Ad partnership; target his follower lookalikes with the accuracy/trust angle ('an AI tutor that cites your own source, not hallucinations').	cs-ml
12	92	Riley Brown tiktok.com/@rileybrown.ai	~636K TikTok followers	One of TikTok's top AI educators ('number one AI Educator'); his followers are actively learning AI tools and concepts — Ritsu's ML-masterer wedge.	Spark Ads + creator lookalike: target engagers of his AI-education content with a 'master your ML course from the lecture PDFs' angle.	cs-ml
13	92	Tina Huang tiktok.com/@hellotinah	~1M across platforms (large TikTok presence; founder of Lonely Octopus)	Ex-Meta data scientist turned educator focused on self-study and data-science skill-building — speaks directly to the self-driven ML/DS masterer.	Spark Ad + lookalike of her self-learner audience; pursue creator collab framing Ritsu as the active-study layer on top of any DS course.	cs-ml
14	91	#studytips #studytips (https://www.tiktok.com/tag/studytips) ·NEW	Billions of views; one of the largest study hashtags	Pure method-seeking intent — students explicitly hunting for better ways to learn, the highest-fit psychographic for Ritsu's active-learning pitch.	Interest/hashtag targeting + Spark Ads on top #studytips creators; A/B test creative that demonstrates Ritsu turning a PDF into a quiz vs. generic study advice.	learning-method
15	90	Alexis Loveraz tiktok.com/@alexisloveraz	~650K+ followers	Viral STEM tutor teaching algebra, geometry, chemistry, and physics — directly reaches the calculus/chem/physics course-taker segment.	Creator-adjacency + Spark Ad on his STEM tutorial videos; target his audience with subject-specific creatives ('drop your chem chapter, get a quiz in 30s').	stem-core
16	90	Deidre Kelly (mathematics teacher) tiktok.com/@iamthatmathteacher	~1.5M followers	Massive math-focused following (tips and tricks across math topics) covering the calculus/linear-algebra course-taker base.	Creator lookalike + adjacency targeting; her 1.5M math audience is a large seed for math-course creatives ('drop your problem set, get drilled').	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
17	90	#studytok #studytok (https://www.tiktok.com/tag/studytok) •NEW	Billions of views; the central StudyTok hashtag (top study-content hub on TikTok)	The umbrella hashtag where deadline-bearing students gather to find study methods, exam strategies, and 'how to study harder material' content — Ritsu's exact audience.	Use as a Spark Ads hashtag/interest layer and place creative against #studytok-trending sounds; also seed Ritsu demo clips natively tagged #studytok to ride organic discovery.	learning-method
18	90	Phillip Cook (Chem Teacher Phil) @chemteacherphil •NEW	~3.8M TikTok followers	The biggest chemistry-teaching creator; his audience is chemistry students who must master hard, graded material — Ritsu's beachhead-adjacent STEM core.	High-reach Spark Ads / sponsored-segment candidate; pair creative with 'turn your chem slides into a quiz' demo. Strong format match (explainer video).	stem-core
19	89	#datascience tiktok.com/tag/datascience	Hundreds of millions of views	Core hashtag for data-science learners and bootcamp cohorts (DataCamp, Zero To Mastery) who must master dense quantitative material on deadline.	Layer #datascience + 'Technology'/'Education' interests; creative angle = converting bootcamp lecture notes and notebooks into active practice.	cs-ml
20	89	#machinelearning tiktok.com/tag/machinelearning	Hundreds of millions of views	Direct topical hashtag for the ML-course masterer (cs231n/CS229/DeepLearning.AI cohort) who needs to drill dense ML material.	Hashtag + interest targeting on #machinelearning and 'Science & Education' / 'Technology' interests; creative should show a research paper or lecture slide turning into a quiz.	cs-ml
21	89	rajistics (Raj) tiktok.com/@rajistics	~31K followers	Explains data science and AI/ML concepts clearly — small but precisely-on-persona audience of technical learners who value accuracy.	Micro-creator Spark Ad with high-intent ML audience; ideal for the trust/accuracy creative ('grounded in your source, not made up').	cs-ml
22	88	Cary (Your Bummy Math Tutor) @your.bummy.math.tutor •NEW	~4.1M TikTok followers	Massive math-tutoring creator (SAT/algebra/calculus) — students grinding graded math problem sets and exams.	Top-tier reach for math-exam audience; Spark Ad against problem-walkthrough videos. Frame Ritsu as auto-generating practice problems from their textbook.	stem-core
23	88	Cheehee Seng @cheeheeseng •NEW	Mid-tier creator; viral study-method videos (100K+ likes per post)	Explicitly preaches active recall, spaced repetition, and interleaving as the path to mastering hard subjects — Ritsu's belief stated verbatim.	Affordable creator-seeding candidate; high message-purity. Good for testing whitelisted/Spark creative before scaling spend.	learning-method
24	88	Kimberly Hilton (Chemical Kim) @chemicalkim •NEW	~1.5M TikTok followers	Chemistry professor with a student-heavy audience studying for chem exams — a hard, deadline-driven subject Ritsu serves well.	Sponsored-integration candidate; audience trusts an academic voice, which aligns with Ritsu's accuracy/rigor positioning (anti-hallucination message lands here).	stem-core
25	88	Kristine Tuttle (Nurse In The Making) @kristine_nurseintheking •NEW	~1.6M TikTok followers	Nursing-school creator who already sells a study bundle to 300K+ nursing students — a deadline-bearing, exam-driven (NCLEX) audience that pays for study tools.	Top sponsored-integration candidate: her audience demonstrably buys study products. Pitch Ritsu as auto-generating NCLEX practice from her notes/PDFs.	med-health
26	87	Kelly & Steven (Mathically) @mathicallytutors •NEW	~992K TikTok followers	Dedicated math-tutoring duo serving students working through hard, graded math courses — direct deadline-bearing-masterer overlap.	Sweet-spot audience size (~1M); strong sponsored-integration or whitelisting candidate. Demo Ritsu turning a problem set into self-quizzing practice.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
27	86	Mariana Vieira (Study Corner) @marianavieira (study-with-me / productivity creator) •NEW	Established study/productivity creator across TikTok + YouTube	Study-with-me and learning-productivity content for self-disciplined serious learners; openly takes sponsorships.	Sponsored-integration candidate; her productivity-system audience overlaps Ritsu's self-learner persona. Verify current TikTok handle/reach before booking.	learning-method
28	85	@studyw.tok (A+ Student Tips) @studyw.tok •NEW	Growing StudyTok account; videos hit 130K+ likes	Pure study-method content (active recall, Feynman, exam-season memorization) for students gripping graded material.	Niche seeding partner; tag-team with #studymethods. Lower reach but exact-audience for early creative validation.	learning-method
29	84	#mcat #mcat (https://www.tiktok.com/tag/mcat) •NEW	Hundreds of millions of views (intense exam-prep niche)	One of the highest-stakes, longest-prep exams in education — students actively seek any tool that turns content review into active practice.	Extremely high purchase-intent niche; run conversion-optimized ads framing Ritsu as an MCAT content-to-quiz engine. Smaller reach, premium intent.	exam-prep
30	84	#medschool / MedTok #medschool (https://www.tiktok.com/tag/medschool) •NEW	Billions of views; the MedTok hub	Med students face the densest graded material (anatomy, USMLE) under hard deadlines — high willingness to adopt rigorous study tools.	Hashtag/interest targeting; emphasize accuracy/citations (med audience is the most hallucination-skeptical — Ritsu's trust-first POD lands hardest here).	med-health
31	84	#studywithme #studywithme (https://www.tiktok.com/tag/studywithme) •NEW	Billions of views; massive live + VOD study-session format	Long-session focused-study culture — deadline-grinding students who already commit hours; receptive to a tool that makes those hours more effective.	Run in-feed ads against study-with-me lives and VODs; creative should fit the calm 'study session' aesthetic, not a hype sell.	learning-method
32	84	Alexis Loveraz @alexis.loveraz (algebra/geometry/chemistry tutor) •NEW	~650K+ followers	Teaches algebra, geometry, and chemistry to students — multi-subject hard-STEM tutoring audience that needs exam mastery.	Mid-tier seeding candidate covering multiple STEM subjects in one audience; good reach-efficiency. Verify exact current handle in ad manager.	stem-core
33	84	Caleb Bonyun (Physics Is Fun) @physicsisfun_official •NEW	~380K TikTok followers	MIT physicist making physics approachable for students tackling a notoriously hard, graded subject.	Niche-but-pure physics-student audience; Spark Ad on concept-explainer videos. Smaller reach — use for subject-specific creative testing.	stem-core
34	83	#premed #premed (https://www.tiktok.com/tag/premed) •NEW	Hundreds of millions of views	Pre-meds grinding MCAT and weed-out science courses — deadline-driven, accuracy-obsessed masterers, an ideal Ritsu segment.	Layer with #mcat and #studytips; creative should hit the 'master dense bio/chem/orgo for the MCAT' job-to-be-done.	med-health
35	82	@madeittomedicine @madeittomedicine •NEW	Mid-tier MedTok creator	Nontraditional med student sharing ADHD study strategies and med-school study systems — method-focused content for deadline-bearing learners.	Sponsored-integration candidate blending method + medicine; her study-strategy framing pairs naturally with a study-tool plug. Verify reach in ad manager.	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
36	81	#cfa / #cfaexam #cfaexam (https://www.tiktok.com/tag/cfaexam) ·NEW	Tens of millions of views (focused professional-exam niche)	CFA candidates face a brutal multi-level graded exam over dense curriculum — exactly the deadline-bearing-masterer profile in finance.	High-intent professional-exam niche; conversion-focused ads framing Ritsu as a CFA-curriculum-to-practice-questions engine. Small but motivated audience.	exam-prep
37	81	#mathtok #mathtok (https://www.tiktok.com/tag/mathtok) ·NEW	Hundreds of millions of views	Math-learning community spanning algebra→calculus students who must master graded problem sets before exams.	Combine with #studytips for higher intent; serve creative showing Ritsu auto-generating practice problems from a math textbook chapter.	stem-core
38	80	MCATAdvice tiktok.com/ @mcatadvice	~67K followers	Dedicated MCAT-prep creator whose entire audience is mid-prep premeds needing active recall over passive content review.	Niche Spark Ad partner with extremely on-persona followers; target engagers with an MCAT-specific 'practice from your own materials' offer.	exam-prep
39	80	#chemistry #chemistry (https://www.tiktok.com/tag/chemistry) ·NEW	Billions of views; largest single-subject STEM hashtag on TikTok	Chemistry attracts the biggest STEM audience on TikTok — a dense, exam-heavy subject Ritsu converts into practice well.	Interest/hashtag targeting layered with #studytok to filter for study-intent vs. entertainment viewers. Large reach, moderate purity.	stem-core
40	80	#engineerdtok / #engineeringstudent #engineeringstudent (https://www.tiktok.com/tag/engineeringstudent) ·NEW	Hundreds of millions of views (engineering-student community)	Engineering students juggle multiple hard, graded technical courses with brutal deadlines — strong fit for converting dense lecture material to practice.	Hashtag/interest targeting for the engineering-major segment; emphasize multi-source learning projects (one of Ritsu's homepage workflows).	stem-core
41	80	Institute of Human Anatomy @instituteofhumananatomy ·NEW	~8.8-10.6M TikTok followers	Massive anatomy-education account followed heavily by pre-health, nursing, and bio students who must master anatomy for graded exams.	High-reach in-feed ads; audience is bio/anatomy-learning but mixed with casual viewers — layer with #studytok or pre-health interests to tighten intent.	med-health
42	79	#biologytok / #biology #biology (https://www.tiktok.com/tag/biology) ·NEW	Billions of views; biology is the #2 STEM subject on TikTok	Biology students (pre-med, life-sci majors) memorizing dense, graded material — strong fit for Ritsu's flashcard/concept-map generation.	Large reach; filter with #studytips or #premed for exam-intent. Demo concept-map + quiz generation from a bio chapter.	stem-core
43	78	#examseason / #exams #examseason (https://www.tiktok.com/tag/examseason) ·NEW	Hundreds of millions of views (spikes seasonally)	Pure deadline-urgency signal — students posting during exam crunch, the exact moment Ritsu's 'ace your exam in 3 days' workflow converts.	Time campaigns to midterm/finals windows; run the 'exam in 3 days' creative against this hashtag for peak willingness-to-pay timing.	exam-prep
44	77	#examprep tiktok.com/tag/examprep	Tens of millions of views	The literal deadline-trigger hashtag — students searching it are days from a graded exam, exactly Ritsu's 'ace your exam in 3 days' wedge.	High-intent hashtag target; pair with countdown/urgency creative ('exam in 3 days? turn your notes into a quiz now') for bottom-funnel conversion.	exam-prep

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
45	77	#gradschool tiktok.com/tag/gradschool	Hundreds of millions of views	Hashtag for grad students and qualifying-exam takers breaking down research papers and dense material — a core Ritsu use case.	Target #gradschool + #phdlife clusters with a 'break down a research paper into testable knowledge' creative; high deadline pressure = high intent.	exam-prep
46	77	#premed tiktok.com/tag/premed	Hundreds of millions of views	Hashtag home of the premed/MCAT crowd — among the most deadline-driven, accuracy-obsessed exam-preppers (the sharpest willingness-to-pay timer).	Target #premed + #mcats hashtag clusters; creative = 'turn First Aid / lecture PDFs into MCAT practice'; this audience pays for any edge before test day.	exam-prep
47	76	#accountingstudent #accountingstudent (https://www.tiktok.com/tag/accountingstudent) •NEW	Tens of millions of views	Accounting/CPA students working through dense, rules-heavy graded material with exam deadlines — solid econ-business fit.	Pair with #cpaexam and #studytok; serve creative on turning accounting textbooks/standards into self-testing practice.	econ-business
48	74	#fintok #fintok (https://www.tiktok.com/tag/fintok) •NEW	~4.7B+ views	Finance-learning community including CFA/finance/accounting students; high learning intent though mixed with general investing content.	Layer with #cfa or #accountingstudent to isolate exam-prep learners from casual investing viewers; emphasize accuracy (FinTok has a misinformation problem Ritsu can contrast against).	econ-business
49	73	#economics / #econtok #economics (https://www.tiktok.com/tag/economics) •NEW	Hundreds of millions of views	Economics students (micro/macro, exam-driven) plus econ-curious learners — moderate purity, decent reach for the business bucket.	Filter with #studytips/#exams for student-intent vs. commentary viewers; emphasize concept explanation + quizzing from lecture slides.	econ-business
50	68	#learnontiktok #learnontiktok (https://www.tiktok.com/tag/learnontiktok) •NEW	Tens of billions of views; TikTok's official education-content hashtag	The broadest education-intent signal on the platform — high reach across all learning subjects, lower per-impression purity.	Use as a top-of-funnel reach layer; always combine with a subject or method hashtag (#studytok, #premed) to avoid wasting spend on casual viewers.	general-learning
51	67	#learnontiktok tiktok.com/tag/learnontiktok	Tens of billions of views (TikTok's flagship education tag)	TikTok's official education umbrella hashtag — broadest reach for any learning-intent audience including STEM and AI explainers.	Use the 'Education' interest category plus #learnontiktok adjacency for top-of-funnel reach; pair with a STEM-specific creative to filter for the persona.	general-learning
52	65	#unistudent tiktok.com/tag/unistudent	~77M+ views	University-student lifestyle/study hashtag reaching the broad college STEM/pre-professional base that forms Ritsu's first-100 wedge.	Mid-funnel hashtag for college-age targeting; combine with 18-24 age + 'Education' interest and a STEM creative to filter to the persona.	general-learning

Discord — servers (52, ranked by suitable score)

Ad mechanism: Organic seeding (Collision-install) — not paid placements.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	94	Clarity Learning discordhome.com/ (search 'Clarity Learning'; ~1,400+ member coursework-help server)	~1,400+ members	Small, high-intent server dedicated to helping students excel in coursework — concentrated deadline-bearing learners ideal for a tight Collison-install pilot.	ORGANIC seeding; ideal first-pilot server (small enough to onboard members by name per SOP-CUSTOMER-006). Founder-led personal onboarding + free Ritsu codes; measure activation before scaling to larger servers. No paid ads.	learning-method
2	94	Optimal Learning discord.me/ optimallearning	~5,000–15,000 members	Free tutoring server for math (algebra→linear algebra, diff eq) and science (bio, chem, CS, physics) — students actively seeking help to master coursework.	ORGANIC seeding; small enough that a tutor/mod partnership is achievable fast. Offer Ritsu as a self-serve practice layer between tutoring sessions; high intent-to-learn audience. No ad units — relationship-driven.	learning-method
3	94	STEM Solutions discordhome.com/server/ stemsolutions	~5,000–10,000 members	Tutoring-focused STEM server (math, CS, engineering, sciences) staffed by tutors and professors — students paying attention specifically to mastering hard graded material.	ORGANIC seeding plus a possible tutor-partnership (tutors could recommend Ritsu for between-session practice). High purchase intent (already engaging paid-ish help). No native targeting — partner with the tutor team.	learning-method
4	92	DeepLearning.AI (Andrew Ng community) community.deeplearning.ai/ (Discord groups linked per-specialization)	Large (per-specialization Discord groups + a 100k+ member forum community)	Learners enrolled in Andrew Ng / Coursera ML specializations — paying, deadline-bearing course-takers who are the definitional Ritsu wedge.	ORGANIC seeding within specialization Discord groups (each course spins its own). Coordinate with course community managers; offer Ritsu to convert lecture slides into quizzes. Primarily a forum-linked Discord, so seed via the official community hub.	cs-ml
5	91	Anki / Spaced Repetition Community disboard.org/servers/tag/anki (Anki Users — discord.gg/anki) •NEW	Tens of thousands across Anki/spaced-repetition servers (med/lang heavy)	Hardcore spaced-repetition + active-recall practitioners (heavy med/MCAT/language overlap) — they already believe active learning beats passive, Ritsu's exact thesis.	Top-tier organic seed: pitch Ritsu as auto-generating active-recall decks from any PDF/lecture, saving the painful card-making step. Highest cultural fit for the active-learning belief.	learning-method
6	90	PKM Community (Obsidian/Notion/Roam tool-agnostic) disboard.org/servers/tag/note-taking (PKM / 'Tools for Thought' — discord.gg/pkm) •NEW	Tens of thousands across PKM/second-brain servers	Note-taking and 'second brain' obsessives — precisely the learn-how-to-learn meta-layer who'd adopt turning notes into active quizzes/flashcards.	Premium organic seed for the learning-method bucket: pitch Ritsu as the active-recall layer on top of their notes/PKM. Discord interest targeting on 'note-taking'/'productivity software' tags.	learning-method
7	89	fast.ai (official Discord) forums.fast.ai/t/fast-ai-discord/122405	Tens of thousands (official server for the fast.ai 'Practical Deep Learning' course community)	Cohort of learners actively working through the fast.ai course — the canonical 'committed ML masterer on a multi-week course' archetype.	ORGANIC seeding only; small, tight, high-trust community — relationship-first. Help in study channels and offer Ritsu to turn lecture videos/notebooks into recall practice. No link-spam; earn an admin mention. Invite link is gated via the fast.ai forums thread.	cs-ml
8	88	Learn AI Together discord.com/invite/learnaitogether (discord.gg/learnaitogether) •NEW	~96.6K members	Beginner-to-intermediate AI learners running study sessions and bootcamps — directly the ML/AI beachhead persona mastering dense ML material.	Core-beachhead organic seed: founder shares Ritsu for turning ML papers/courses into active practice; partner on a study session. Highest-relevance ML community, study-oriented.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
9	88	Studio (Productivity / Deep Work) thehiveindex.com/topics/productivity/platform/discord/ (Studio — discord.gg/studio) •NEW	Active productivity server (Hive Index Productivity top-7)	Members explicitly value deep work, co-working, and accountability check-ins — the learning-method/productivity audience already hunting better systems.	Highest-fit organic seed: this crowd loves trying focus/learning tools. Founder shares Ritsu as an 'active-recall from your own notes' workflow in tools/accountability channels.	learning-method
10	87	Data Science (Chip Huyen community) discord.gg/datascience (community started by Chip Huyen)	~20,000+ members	Data scientists and ML learners with regular events, career advice, and study discussion — deadline-bearing learners working through DS/ML curricula.	ORGANIC seeding in learning-resources channels. Demo Ritsu converting DS course material / textbook chapters into quizzes and concept maps; coordinate with organizers for an events/AMA slot. No native ad targeting.	cs-ml
11	87	Hugging Face discord.com/invite/hugging-face-879548962464493619	~221,000 members	Largest hands-on ML/AI practitioner hub (papers, courses, NLP/agents tracks) — learners working through dense ML material who value accuracy and rigor.	ORGANIC seeding via the learning/course channels (agents-course, deep-RL-course cohorts). Position Ritsu as a paper-and-lecture-to-active-practice tool; an AI-literate audience that will judge accuracy harshly, so lead with grounded/cited-quiz messaging.	cs-ml
12	87	Kaggle (community-run ML Discord) discord.gg/kaggle (community server; channels for competitions, notebooks, learning)	~15,000+ members (community-run, not official Kaggle)	Competitive ML learners sharing notebooks and learning resources — self-driven masterers working through datasets and ML technique on competition deadlines.	ORGANIC seeding in learning-resources/notebook channels. Frame Ritsu for turning ML course content and competition write-ups into recall practice; deadline framing works (competition end dates). Earn mod trust before linking.	cs-ml
13	87	Learn AI Together (Towards AI) discord.gg/learnaitogether	~80,000+ members	Largest AI-learning-focused community (weekly reading group, course discussion, job board) — exactly the 'committed ML masterer working through courses/papers' persona.	ORGANIC seeding; highest persona precision on the platform. Sponsor or contribute to the weekly paper-reading group; offer Ritsu free codes to members prepping for ML coursework. Coordinate with Towards AI team for a partnership/AMA.	cs-ml
14	87	MLOps Community discord.gg/mlopscommunity	~20,000+ members (Discord/Slack; community founded by Demetrios Brinkmann)	ML engineers and data scientists upskilling via courses, papers, and certs — the professional end of the committed-ML-masterer persona.	ORGANIC seeding via learning/career channels; sponsor or join a reading-group/event. Position Ritsu for cert/course prep (e.g., cloud-ML certs). Practitioner audience — credibility and accuracy framing essential.	cs-ml
15	87	MCAT / Premed discord.com/invite/premed (discord.gg/premed) •NEW	~29.6K members	Pre-meds grinding the MCAT with section-by-section channels and AAMC full-length discussion — extreme deadline pressure and dense-material mastery.	High-intent organic seed: Ritsu turns MCAT content books and AAMC review into quizzes/flashcards. Section channels are precise seeding spots; MCAT crowd loves active recall.	med-health
16	86	Mathematics disboard.org/servers/tag/math (Mathematics — discord.gg/math) •NEW	Tens of thousands (large dedicated math community)	Active math community with leveled channels for homework help and concept teaching — university students working through calculus/linear-algebra/proofs before exams.	On-persona organic seed: Ritsu turns a dense math chapter/ problem set into practice + concept maps. Seed in homework/ concept channels; Discord interest targeting on 'mathematics/ education'.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
17	86	r/ LearnMachineLearning Discord disboard.org/servers/tag/machine-learning (LearnMachineLearning — discord.gg/learnmachinelearning) -NEW	Tens of thousands (subreddit-linked learner community)	Self-selected ML learners explicitly there to learn the subject from courses/papers — the deadline-bearing ML masterer in their natural habitat.	High-fit ML organic seed: pitch Ritsu as auto-generating active recall from ML lecture PDFs/papers. Learner-pure audience (vs general dev servers).	cs-ml
18	85	Biggest Physics disboard.org/servers/tag/physics (top-ranked 'Biggest Physics' server)	~20,000–40,000 members (largest physics-specific help server)	Physics students prepping school/college coursework and exams (JEE, NEET, A-levels, AP, SAT) — dated-deadline STEM-course masterers.	ORGANIC seeding in homework/exam-prep channels. Demo turning a physics chapter or lecture into problem sets; lead with accuracy (physics answers are verifiable). Mod partnership for a resource pin; no paid units.	stem-core
19	85	Mathematics discord.com/invite/math	~332,000 members	Huge population learning linear algebra, calculus, and proof-based math — the STEM foundation courses with hard graded deadlines that Ritsu turns into quizzes/flashcards.	ORGANIC seeding. Be genuinely helpful in homework/help channels, then demo Ritsu turning a lecture PDF into a quiz; pursue a mod partnership for a study-resources pin. No paid placement available — earn trust first.	stem-core
20	85	Science and Technology discord.com/invite/science	~57,000 members	Broad STEM community (physics, chem, CS, bio) where students bring coursework and competition prep — multi-subject dated-deadline learners.	ORGANIC seeding across subject help channels. Lead with accuracy/no-hallucinated-quizzes messaging (science crowd is skeptical of AI); seek a mod-pinned resource. No paid targeting available.	stem-core
21	85	STEM Students (Science, Technology, Engineering & Maths) discord.do/stem-students-science-technology-engineering-maths/	~15,000–30,000 members	Cross-disciplinary STEM help community (math, physics, chem, bio, CS, programming) where students bring graded coursework — broad multi-subject wedge.	ORGANIC seeding across the per-subject help channels. Be the helpful expert, then show Ritsu auto-generating practice from a chapter; mod-pinned tool mention. Seeding only — no paid placement.	stem-core
22	85	The Coding Den discord.com/invite/code	~176,000 members	Largest general programming-help community; engineers and CS students learning new languages/frameworks from docs — Ritsu's 'learn a framework fast' workflow.	ORGANIC seeding in help/resources channels. Demo Ritsu turning framework docs or a CS course PDF into code exercises + flashcards; mod relationship needed before any link-drop (strict anti-spam culture).	stem-core
23	85	The Programmer's Hangout discord.com/invite/programming	~170,000+ members	Massive CS/dev community spanning beginners to seniors learning DS&A, web, mobile — the engineer archetype mastering technical material on a deadline.	ORGANIC seeding. Contribute in #resources and study-group channels; partner with staff for a curated-tools mention. Treat as awareness/seeding, not direct-response — no native ad units.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
24	85	Cosmos Domain (STEM hub) disboard.org/servers/tag/physics (Cosmos Domain — discord.gg/cosmos) •NEW	Mid-to-large multi-STEM community (physics/math/astro/chem/bio)	Cross-STEM learners diving into physics, math, chemistry and biology — serious-subject masterers spanning Ritsu's whole STEM beachhead.	Multi-subject organic seed covering several quota buckets at once; pitch Ritsu as 'any STEM PDF/lecture to active practice'. Founder-led seeding in subject channels.	stem-core
25	85	Pre-Med / Med Cafe disboard.org/server/928013817420603452 •NEW	Mid-size, supportive premed/med community	Pre-med and med students studying MCAT/USMLE and applications — committed masterers of anatomy/physiology/biochem under real deadlines.	Organic seed in MCAT/USMLE study channels; warm, non-toxic culture good for founder-led seeding of Ritsu as a study-from-your-own-materials tool.	med-health
26	84	Anatomy & Physiology Classes (Felt's Hive) discord.me/anatomyclasses (discord.gg/anatomy) •NEW	Mid-size A&P-focused teaching community	A structured A&P class server with curriculum, office hours and live review — students mastering a notoriously dense, deadline-driven course.	High-fit organic seed: Ritsu generates A&P practice from lecture slides/PDFs. Course-structured server = clear pain point and warm seeding context.	med-health
27	84	Biomedical Library disboard.org/servers/tag/medicine (Biomedical Library — discord.gg/biomedical) •NEW	Large biomedical education/research community (Discord's largest biomed)	Largest Discord biomedical education community — medicine, biology, chemistry experts and students mastering dense health-science material.	High-fit med/health organic seed: Ritsu converts biomed textbooks/papers into active practice. Rigor-heavy audience responds to accuracy/citations message.	med-health
28	84	ChemistryHelp discord.me/chemistryhelp (discord.gg/chemistry) •NEW	Mid-size chemistry/science help community	Free help on chemistry/physics at all levels — students grinding organic/general chemistry, a notoriously deadline-heavy course.	On-persona organic seed: Ritsu generates practice + mechanism explanations from a chem chapter. Seed in help channels; smaller = warmer founder seeding.	stem-core
29	84	Data Science / ML / AI (Data Share) discord.com/invite/v3zeSgb •NEW	Large, very active data-science community	One of the most active DS/ML communities with learning + career channels — students and self-learners mastering statistics, ML, and DS coursework.	ML-beachhead organic seed in learning/resource channels: Ritsu converts DS/ML textbooks + papers into quizzes and concept maps. Strong relevance, broad intent.	cs-ml
30	83	CA Study Hub (CA/CS/CMA/CFA) disboard.org/servers/tag/chartered-accountants (CA Study Hub — discord.gg/castudyhub) •NEW	~5.8K+ students	Accounting/finance certification students (CA, CMA, CFA) using 24/7 cam rooms and Pomodoro — deadline-bearing masterers of dense exam syllabi.	High-intent organic seed: Ritsu turns CFA/accounting study guides into quizzes. Small + focused = ideal founder-led Collision-install seeding.	econ-business

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
31	83	Science Hub thehiveindex.com/topics/biology/platform/discord/ (Science Hub — discord.gg/sciencehub) ·NEW	Large multi-science community (HS to PhD)	Physics, chemistry, astronomy and biology learners from high school to PhD — broad serious-science audience with strong rigor culture.	Organic seed across science channels; rigor-respecting crowd responds well to Ritsu's accuracy/grounded-citations message. Good STEM reach.	stem-core
32	83	The Nursing Journey disboard.org/servers/tag/anatomy (The Nursing Journey — discord.gg/nursing) ·NEW	Mid-size nursing/A&P community	Nursing students mastering anatomy, physiology and NCLEX-style content — heavy memorization + deadlines, ideal for auto-generated active recall.	On-persona organic seed: pitch Ritsu for turning A&P/nursing PDFs into flashcards + quizzes. Founder-led seeding in anatomy/study channels.	med-health
33	82	Biocord discord.com/invite/biology (discord.gg/biology) ·NEW	~37.3K members	Biology enthusiasts from high-schoolers to PhDs — university bio students working through genetics/cell-bio/ecology coursework before exams.	Organic seed in study/help channels: Ritsu turns a bio chapter into quizzes + concept maps. Solid biology reach with serious-learner core.	stem-core
34	82	Economics (academic economists & practitioners) disboard.org/servers/tag/economics?sort=-member_count (Economics — discord.gg/economics) ·NEW	Large economics community (academics + students)	Run by economists for serious discussion of econ research, econometrics and stats — university econ students mastering rigorous, dense material.	Rigor-respecting organic seed: pitch Ritsu for turning econ textbooks/problem sets and papers into active practice. Accuracy/citations message lands with this crowd.	econ-business
35	82	Notion (Official Community) discord.com/invite/notion (discord.gg/notion) ·NEW	~100K+ members (largest note-taking community)	Students and self-learners who organize all their study material in Notion — a warm crowd for converting passive notes into active mastery practice.	Organic seeding + Ritsu-Notion workflow content; Discord ad targeting reaches the 'note-taking / productivity software' interest cluster. Notion explicitly replaced by Ritsu per positioning — frame as complement, not attack.	learning-method
36	81	ACCA (Unofficial) Community disboard.org/servers/tag/accounting (ACCA Unofficial — discord.gg/acca) ·NEW	Mid-size ACCA student/member community	ACCA accounting students preparing for staged professional exams — committed masterers of dense, high-stakes finance/accounting syllabi.	Targeted organic seed: Ritsu converts ACCA study texts into quizzes/flashcards. Focused niche = strong founder-led seeding fit.	econ-business
37	81	StudyForge disboard.org/servers/tag/students (StudyForge — discord.gg/studyforge) ·NEW	Growing student community (homework + concept help)	Explicitly 'built for learning, not shortcuts' across math/science/ELA — committed students wanting concept mastery, anti-cheat culture matches Ritsu's 'AI can't learn for you' belief.	Strong values-aligned organic seed: founder offers Ritsu as a master-it-yourself tool (not an answer machine) in concept-explanation channels.	general-learning

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
38	80	Study And Chill discord.com/servers/ study-and- chill-1354888286014799 902 ·NEW	Mid-size study server (tens of thousands; cam/deep-work rooms)	Quiet deep-work voice rooms for solo and group study with an explicit habit/ accountability culture — receptive to active-learning tools.	Organic Collison-install: co-work in their deep-work rooms, then offer Ritsu in the study-tips/resources channel. Smaller = warmer founder-led seeding.	learning-method
39	79	Acely SAT, PSAT, ACT & AP Test Prep discord.com/invite/ 6XWN2uk6bC ·NEW	~7.2K members	Students prepping SAT/ACT/AP with resources, timed practice and tutoring — deadline-driven exam masterers (AP overlaps college-level subjects).	High-intent exam-prep organic seed: Ritsu turns prep books/ notes into practice tests. Founder-led seeding in subject/practice channels; warm and on-intent.	exam-prep
40	79	Cramd (AI flashcards / spaced repetition) disboard.org/servers/tag/ studying (Cramd — discord.gg/cramd) ·NEW	Smaller, fast-growing study-tool community	Members chose a spaced-repetition + active-recall flashcard tool — self- selected active learners, though a direct adjacent-tool community.	Adjacent-product community: organic seeding is sensitive (competitive), better as audience signal for Discord interest targeting on 'flashcards/spaced repetition'. Treat with care.	learning-method
41	78	Study Together discord.com/invite/study- together (discord.gg/ study-together) ·NEW	~517K members (Hive Index #1 Students & #1 Productivity)	The largest deadline-driven study community on Discord — students grinding course material in 24/7 cam/ focus rooms, exactly the committed- masterer persona.	Flagship organic Collison-install seed: founder joins, runs a study sprint, shares Ritsu in resource/tools channels and partners with mods on a study-with-me event. Discord Quest/ad targeting can also reach this server's 'students' + 'productivity' interest cluster.	general-learning
42	78	The Programmer's Hangout (TPH) discord.com/invite/ programming (discord.gg/ programming) ·NEW	~170K members	Massive CS/dev community where students and learners pick up new frameworks and CS fundamentals from docs — Ritsu's 'learn a new framework fast' and code-exercise use case.	Organic seed in learning/beginner channels: Ritsu turns docs into code exercises and quizzes. Large reach but broader intent (many pros, not all deadline-graded).	cs-ml
43	77	Revision Servers (GCSE & A-Level) disboard.org/servers/tag/ sat (Revision Servers — discord.gg/revision) ·NEW	Large UK exam- revision community (past papers + notes)	A-Level (and GCSE) students revising rigorous science/math subjects from past papers and notes before high- stakes exams — strong active-practice intent.	Exam-prep organic seed: Ritsu converts past papers/revision notes into quizzes. A-Level audience skews to college-feeder serious subjects; seed in subject channels.	exam-prep
44	76	Study With Me disboard.org/servers/tag/ studying (Study With Me — discord.gg/ studywithme) ·NEW	Mid-size study server with practice-exam/ resource channels	Dozens of productivity channels plus practice-exam questions, books and videos — deadline-bearing students assembling their own study stack.	Organic seed in their resources/practice-exam channels: Ritsu turns those PDFs/videos into quizzes. Moderate size = founder- led seeding feasible.	general-learning
45	76	The Coding Den disboard.org/servers/tag/ computer-science (The Coding Den — discord.gg/code) ·NEW	~148K members	One of the largest newbie-friendly dev communities — CS students learning from documentation and coursework, matching the engineer/CS-student persona.	Organic seed for the CS-learning sub-audience; pitch the 'docs/ code to active practice' workflow. High reach, mixed graded- deadline intent.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
46	75	AP Students discord.com/invite/apstudents	~55,000 members	Affiliated with r/APStudents; students with a hard, DATED College Board exam (AP Calc, Physics, Chem, CS-A) — the sharpest 'ace the exam in N days' willingness-to-pay timer.	ORGANIC seeding, peaks Mar-May (AP season). Offer free Ritsu during the exam crunch; partner with mods for a study-resource pin. Tightest deadline-driven wedge — message the 3-day-cram job-to-be-done directly.	exam-prep
47	75	MCAT / Premed discord.com/invite/premed	~30,000 members	Pre-med students grinding the MCAT — a high-stakes, dated, content-dense exam where active recall on dense material is the core job Ritsu serves.	ORGANIC seeding in content-review and AAMC-FL channels. Demo turning dense bio/biochem/physics review PDFs into Anki-style decks + quizzes; high willingness-to-pay (already buy UWorld/Anki). Partner with mods for a tools pin.	exam-prep
48	75	Python Discord discord.com/invite/python (discord.gg/python) ·NEW	~370K members (one of the largest single-language servers)	Enormous Python-learning community with help/learning channels — university CS/data students and self-learners working through coursework.	Organic seed in #help/#beginners: Ritsu turns Python course material/docs into quizzes + code exercises. Huge reach; intent varies. Respect strict server rules on self-promo (seed organically only).	cs-ml
49	75	StudyStream (incl. merged StudyTogether.com) discord.com/invite/studystream ·NEW	~290K members (some trackers show ~200K)	Focus/accountability rooms full of serious students studying with strangers before deadlines — high study-intent, broad subject mix.	Organic seeding via study-room presence + a 'study tools' share; large enough to A/B a Ritsu link in their resources channel. Good top-of-funnel reach, moderate purity.	general-learning
50	74	Homework Help (HWH) discord.com/invite/homework (discord.gg/homework) ·NEW	~150K members (one of the largest academic servers)	Discord's premier peer-to-peer academic community spanning math, science, English and social studies — huge volume of deadline-pressured students.	High-reach organic seed: founder/volunteers help in subject channels and surface Ritsu for self-study. Frame as mastery, not answers, to respect anti-cheating norms. Big top-of-funnel.	general-learning
51	65	Study Together discord.com/invite/study	~1,050,000 members (largest study/productivity server on Discord)	The single biggest concentration of committed self-studiers who run live camera/pomodoro study sessions — the exact passive-to-active-study crowd Ritsu converts.	ORGANIC Collison-install seeding (no Discord self-serve ad targeting of servers). Partner with admins/mods for a sponsored 'study tool' channel or pinned resource; run a free-Ritsu giveaway tied to an exam push; seed share-links in resource/tool-recommendation channels where rules allow.	general-learning
52	65	StudyStream discord.gg/studystream	~100,000+ members (large live-study community; flagship is the web app + Discord)	Committed students running live focus/study-room sessions worldwide — passive-study-burned learners who would adopt an active-recall tool.	ORGANIC seeding plus potential brand partnership (StudyStream runs sponsorships with study brands). Pitch a co-branded study challenge or resource integration; seed share-links in tool/resource channels with admin buy-in.	general-learning

LinkedIn — groups & influencers (46, ranked by suitable score)

Ad mechanism: LinkedIn Ads — group + skill + field-of-study + job-title(Student).

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Barbara Oakley, PhD (Learning How to Learn) linkedin.com/in/barbaraoakley/	~50K+ followers (course: 4M+ learners on Coursera)	Creator of 'Learning How to Learn' — owns the exact learning-science angle (active beats passive recall) that resonates with a learner burned by re-reading and re-watching.	Highest message-fit for Ritsu's 'active mastery beats passive study' hook; seed organically and build an interest audience around 'Learning How to Learn' / spaced-repetition / retrieval-practice plus Job Title = Student to reach study-method-minded learners.	learning-method
2	99	Ken Jee linkedin.com/in/kenjee/	~200K+ followers (#66DaysOfData community)	Runs the #66DaysOfData challenge and data-science learning content — directly mobilizes deadline/streak-driven self-learners, mirroring Ritsu's streak and active-practice loop.	Seed organically around #66DaysOfData; build engagement/interest audiences from that hashtag + member-skill 'Data Science'. His streak-challenge framing aligns with Ritsu's emotional-hook + heatmap.	learning-method
3	93	Ali Abdaal linkedin.com/in/ali-abdaal/ ·NEW	~8M cross-platform; growing LinkedIn presence (tens of K)	Doctor-turned-productivity-creator whose original audience was students passing entrance/medical exams seeking evidence-based study strategies — Ritsu's exact persona.	His LinkedIn is smaller than YouTube/IG, so use as a seeding/collab target and build interest audiences around 'study tips', 'spaced repetition', 'active recall'. Best ROI is organic collaboration; paid reach is thinner on LinkedIn specifically.	learning-method
4	92	Ai Mindshare - AI, Machine Learning, ML, Data Science (LinkedIn Group) linkedin.com/groups/60878/	~1.23M members	Active AI/ML + GenAI/LLM community — captures learners studying current LLM coursework and bootcamp content.	Group facet + member-skill 'Generative AI' / 'Large Language Models'; combine with field-of-study = Data Science / Computer Science to bias toward enrolled learners over working pros.	cs-ml
5	92	Andrew Ng linkedin.com/in/andrewyng/	~2.35M followers	Founder of DeepLearning.AI / Coursera ML courses and fast.ai-adjacent education — the single most likely person whose graded course this persona is actively studying for a deadline.	Cannot target his followers directly on LinkedIn Ads; seed organically (comment/native posts), build an engagement Matched Audience from any co-posted content, and pair with interest-targeting on 'DeepLearning.AI' / 'Coursera' + member-skill 'Machine Learning'.	cs-ml
6	92	Andriy Burkov ca.linkedin.com/in/andriyburkov	~1.0M followers	Author of 'The Hundred-Page Machine Learning Book' / 'The Hundred-Page Language Models Book' — a canonical exam-prep text this persona reads to master ML fast under deadline.	Organic-seed + build interest/skill lookalike ('Machine Learning' skill, interest in his books); retarget content engagers. Direct follower targeting is not available, so use his book titles as interest signals.	cs-ml
7	92	Artificial Intelligence, Deep Learning, Machine Learning (LinkedIn Group) linkedin.com/groups/1814785/	~2.55M members	Second-largest technical AI/DL group, skewed toward deep-learning research and coursework — strong fit for the cs231n / 6.S191 / DeepLearning.AI cohort.	Add as a Group facet in LinkedIn Campaign Manager; intersect with member-skill 'Deep Learning' + 'Neural Networks' and degree/field-of-study filters to bias toward currently-enrolled DL students.	cs-ml
8	92	Artificial Intelligence, Machine Learning, Data Science & Robotics (LinkedIn Group) linkedin.com/groups/3990648	~3.0M members	The largest AI/ML community on LinkedIn — maximum reach into the broad ML-learner pool the persona sits inside.	LinkedIn Ads supports Group targeting: add this group, then layer member-skill 'Machine Learning' + 'Deep Learning' and Job Title = Student / field-of-study = Computer Science to sharpen toward enrolled learners; also viable for organic seeding posts.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
9	92	Cassie Kozyrkov linkedin.com/in/kozyrkov/	~700K+ followers	Former Google Chief Decision Scientist and prolific explainer of statistics/ML fundamentals — the rigor-and-intuition voice this accuracy-driven masterer follows to actually understand concepts.	Seed organically; build a skill/interest lookalike ('Statistics','Machine Learning','Decision Intelligence'). Her audience over-indexes on 'understand it properly' which matches Ritsu's anti-cheat mastery framing.	cs-ml
10	92	Daniel Bourke (mrdbourke) linkedin.com/in/mrdbourke/	~60K+ followers (large YouTube ML-course audience)	Creator of popular 'learn ML / PyTorch from scratch' courses — his audience is self-learners mid-way through a hard ML curriculum, exactly Ritsu's wedge.	Organic-seed + interest lookalike on 'PyTorch','Machine Learning','TensorFlow' and field-of-study = Computer Science; retarget engagers of any PyTorch-course-themed Ritsu post.	cs-ml
11	92	Data Science Central (LinkedIn Group) linkedin.com/groups/35222/	~330K+ members	Long-running data-science learning hub (articles, webinars, forums) where DS bootcamp and course students gather.	Target the group + member-skills 'Data Science','Python','Statistics'; overlay Job Title = Student and seniority = Entry/Training to reach bootcamp cohorts (Springboard / DataCamp / ZTM type learners).	cs-ml
12	92	KDnuggets — AI, Big Data, Data Science, Machine Learning (LinkedIn Group + Company) linkedin.com/company/kdnuggets	Group ~150K members; company page audience additional	Authoritative DS/ML learning brand whose group is full of people actively studying tutorials and prepping technical skills.	Target the moderated group + KDnuggets company-page followers via interest; member-skill 'Data Mining'/'Machine Learning'. Strong candidate for a sponsored-content placement aimed at active learners.	cs-ml
13	92	Lex Fridman linkedin.com/in/lexfridman/	~1.48M followers	MIT researcher and podcaster whose AI/deep-learning audience includes large numbers of students and self-learners aspiring to master the field.	Top-of-funnel reach via organic seeding + a broad AI/robotics interest audience; tighten with member-skill 'Deep Learning' + field-of-study = Computer Science / EECS to bias toward enrolled learners rather than general podcast fans.	cs-ml
14	92	Machine Learning Community (Moderated) (LinkedIn Group) linkedin.com/groups/961087/	~2.0M members	Large moderated ML community (higher signal-to-noise than open groups), good for reaching serious practitioners and students who self-curate.	Use Group targeting + tighten with member-skill 'Machine Learning' and Job Title contains 'Student' / 'Research Assistant'; moderated nature also makes it a candidate for a well-crafted organic seed post.	cs-ml
15	92	Sebastian Raschka, PhD linkedin.com/in/sebastianraschka/	~194K followers (77K 'Ahead of AI' newsletter subs)	Author of widely-used ML/LLM textbooks and a Wisconsin ML professor — exactly the rigorous, accuracy-first voice this skeptical 'will-it-lie-to-me' masterer trusts when studying from his books.	Seed organically and use a follower-lookalike via member-skills ('Machine Learning','PyTorch','Deep Learning') + interest 'Build a Large Language Model From Scratch'; retarget engagers of any Ritsu post that references his material.	cs-ml
16	92	Steve Nouri linkedin.com/in/stevenouri/	~1.6M followers	One of LinkedIn's largest AI Top Voices; his feed is a daily on-ramp for people learning AI/GenAI, providing broad reach into the ML-curious student pool.	Reach play, not precision: seed organically and build a broad interest audience ('Artificial Intelligence','Generative AI'); intersect with Job Title = Student to filter toward learners vs. executives.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
17	91	Cal Newport linkedin.com/in/cal-newport-2399b8 ·NEW	~100K+ LinkedIn engagement; 8 books, large cross-platform reach	Georgetown CS professor whose 'Deep Work'/focus philosophy attracts disciplined students and self-learners who care about mastering hard material without shortcuts.	Target followers of his content + 'deep work', 'study habits', 'focus' interest keywords on LinkedIn Ads. Strong message-match: Ritsu = the active-work tool for the deep-work crowd. Lower follower-count on LinkedIn specifically vs other channels.	learning-method
18	90	Python Data Science, Machine Learning, Graph, and NLP (LinkedIn Group) linkedin.com/groups/8458811/	~92K members	Niche, Python-first DS/ML/NLP group — precisely the technical-coursework audience (Python + ML + NLP) for the STEM/CS-course slice of the persona.	High-precision group facet; combine with member-skills 'Python', 'Natural Language Processing', 'Machine Learning'. Smaller but on-persona — ideal for a tightly-scoped sponsored test.	stem-core
19	90	DeepLearning.AI (Company Page) linkedin.com/company/deeplearningai ·NEW	~1,352,271 followers	The largest community of people actively enrolled in structured, deadline-paced ML/AI courses — the literal Ritsu beachhead user studying graded coursework.	Target company-page followers (member-interest) + 'machine learning'/'TensorFlow' skills + Student filter. One of the cleanest 'committed-masterer-in-a-course' audiences on LinkedIn. High fit.	cs-ml
20	90	Paul Nowak (Iris Reading / LinkedIn Learning 'Learning Study Skills' instructor) linkedin.com/in/paulnowak/ ·NEW	Instructor of LinkedIn Learning's flagship 'Learning Study Skills' course (broad reach)	Teaches speed-reading, note-taking, memory and test-taking to grad students and serious learners — directly adjacent to Ritsu's 'turn sources into active practice' job.	Target LinkedIn members who consumed 'Learning Study Skills' / 'Improving Your Memory' courses (skill-based audience) + speed-reading/note-taking keywords. Good purity, moderate reach.	learning-method
21	88	Artificial Intelligence, Machine Learning, Data Science & Robotics (LinkedIn Group) LinkedIn Group: 'Artificial Intelligence, Machine Learning, Data Science & Robotics' (~2.99M members) ·NEW	~2,999,992 members	Largest AI/ML community on LinkedIn; saturated with learners and students working through hard, graded ML coursework — Ritsu's beachhead subject at massive scale.	Anchor a sponsored-content campaign with member-overlap interest targeting + 'machine learning', 'deep learning' skills and 'Student' job-title filter to isolate the learners. Audience-size sweet-spot exceeded — layer filters to avoid wasted spend.	cs-ml
22	87	CFA Program (Company Page) linkedin.com/company/cfaprogram ·NEW	Hundreds of thousands of candidate-followers	Official candidate-facing page; followers are actively enrolled CFA candidates with a fixed exam date — peak deadline-bearing intent in finance.	Layer CFA-candidate digital-badge holders + 'Level I/II/III' keyword targeting. Ritsu pitch: turn the CFA curriculum PDFs into spaced-repetition flashcards before exam day. Very high intent-purity.	econ-business
23	86	Artificial Intelligence, Deep Learning, Machine Learning (LinkedIn Group) LinkedIn Group: 'Artificial Intelligence, Deep Learning, Machine Learning' (~2.55M members) ·NEW	~2,545,936 members	Technical AI/DL/ML community founded 2009; rich with people studying dense ML research papers and model theory — exactly the source-to-active-practice job.	Combine with 'research paper', 'neural networks' keyword + student/early-career seniority filters. Position Ritsu around 'break down a research paper into testable knowledge'. Layer filters; raw group is too broad alone.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
24	86	CFA Institute (Company Page) linkedin.com/company/cfainstitute ·NEW	~801,809 followers	Home of CFA candidates grinding through one of the hardest, most deadline-driven professional exams — dense material demanding active practice, exactly Ritsu's job.	Target CFA-Institute-follower interest + 'CFA'/'Chartered Financial Analyst' certification + 'CFA candidate' keywords. One of the highest willingness-to-pay, hardest-deadline audiences on LinkedIn. Strong econ/finance fit.	econ-business
25	85	MedSchoolCoach (Company Page) linkedin.com/company/medschoolcoach/ ·NEW	Tens of thousands; large premed/med-student reach via partnerships	MCAT and USMLE prep provider partnering with premed/med student groups — its audience is the deadline-bearing high-stakes-exam masterer.	Target 'MCAT'/'pre-med'/'USMLE' interest + Student job-title + biology/health field-of-study. Strong exam-prep intent; Ritsu complements (active practice from their study materials). High fit for the med bucket.	med-health
26	85	Professor Dave (Dave Farina) linkedin.com/in/dave-farina-65b8a916a ·NEW	~4M YouTube subscribers; emerging LinkedIn presence	Teaches no-nonsense chemistry, physics, biology and math to students cramming hard STEM courses before exams — broad non-ML STEM coverage.	LinkedIn presence is thin vs YouTube — use as a seeding target and build 'organic chemistry'/'general chemistry'/'physics' keyword + Student audiences. Best as awareness-amplifier; paid reach better via interest proxies.	stem-core
27	84	Med Students Network (LinkedIn Page/Group) linkedin.com/company/med-students-network ·NEW	~770+ followers (niche, high-intent)	Global community of medical students sharing USMLE Step 1/2 prep strategies — dense memorization-heavy material that maps perfectly to Ritsu's flashcards + active recall.	Small but pure. Seed organically and build broader 'USMLE'/'medical student'/'Step 1' keyword + Student-in-medicine audiences around it. Use as the messaging template for the med vertical, not for scale.	med-health
28	83	Sketchy (Company Page) linkedin.com/company/sketchy-medical/ ·NEW	Large premed/med/nursing/pharmacy student base	Visual learning platform for pre-med, med, PA, pharmacy and nursing students — an audience that already pays for active-recall study tools, ideal for Ritsu.	Build 'medical school'/'nursing'/'pharmacy' field-of-study + Student audiences; message Ritsu as the tool that turns their own lecture PDFs/slides into quizzes. Proven willingness-to-pay for study tooling.	med-health
29	82	Student Doctor Network (Company Page) linkedin.com/company/student-doctor-network/ ·NEW	Large premed/med/health-professional student community	Premed and med students discussing board exams, coursework and residency prep — concentrated high-stakes-exam masterers.	Target 'pre-med'/'medical student'/'MCAT'/'USMLE' interest + Student job-title + biology/health field-of-study. High exam intent; strong message-match for flashcards/active recall from their own materials.	med-health
30	80	CFA Society New York (Chapter Page) linkedin.com/company/cfa-society-new-york ·NEW	Tens of thousands of followers (large US chapter)	Regional hub of CFA candidates and finance students concentrated in the US ICP, prepping for the same hard exams.	Use for US-geo + finance-certification targeting; combine chapter-follower interest with 'CFA candidate' + NYC/US location. Tighter geo than the global page — good for the US-led wedge.	econ-business
31	80	Henry Reich (MinutePhysics) linkedin.com/in/henry-reich ·NEW	~6M YouTube subscribers; modest LinkedIn presence	Physics explainer for curious students; audience overlaps with undergrads working through hard physics courses needing active practice.	Use 'physics', 'quantum mechanics', 'relativity' interest keywords + university/student filters. LinkedIn-specific reach is limited; treat as a STEM-credibility seeding partner.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
32	79	Nursing Students & New Grads (LinkedIn Group) LinkedIn Group: 'Nursing Students and New Graduate Nurses' (tens of thousands of members) •NEW	Tens of thousands of members	Nursing students face dense anatomy/ pharmacology coursework and NCLEX prep with hard deadlines — high active-recall need.	Target 'nursing'/'NCLEX'/'registered nurse' field-of-study + Student job-title. Good intent (licensure exam pressure); slightly broader than the med-school core. Filter to current students.	med-health
33	78	Engineering & Technology (LinkedIn Group) LinkedIn Group: 'Engineering & Technology' (large; hundreds of thousands of members) •NEW	Hundreds of thousands of members	Engineering students and early-career engineers learning new frameworks, dense technical specs and exam material — strong STEM coverage.	Target with 'mechanical engineering'/'electrical engineering'/'engineering student' field-of-study + Student job-title filters. Position around 'learn a new framework / master engineering coursework fast'. Broad group — filter to students.	stem-core
34	77	Data Science Central (Company Page / Community) linkedin.com/company/data-science-central •NEW	Hundreds of thousands of followers	Long-running data-science community where students and career-switchers work through rigorous ML/stats coursework — broadened beachhead reach.	Target 'data science'/'statistics'/'machine learning' skills + Student/early-career filters. Position around 'master a stats/ ML course from your lecture notes'. Broad — filter to active learners.	cs-ml
35	76	IEEE (Company Page / Member Network) linkedin.com/company/ieee/ •NEW	~2M+ followers	World's largest technical professional org; huge student-member base studying rigorous engineering/CS material and prepping for exams.	Use 'IEEE'/'electrical engineering'/'computer science' interest + IEEE-member-adjacent + Student filters. Large reach; the student-member slice is the on-persona subset — must filter hard for intent.	stem-core
36	76	Learning and Development (LinkedIn Group) LinkedIn Group: 'Learning and Development' (~200,000+ members) •NEW	~200,000+ members	Largest L&D community; members are professionals obsessed with how learning actually sticks — a warm audience for 'active learning beats passive' messaging.	Use LinkedIn group-membership-adjacent interest targeting + 'instructional design', 'learning science', 'andragogy' keywords. Audience skews corporate/trainer rather than deadline-bearing student — lower intent-purity, high reach.	learning-method
37	74	American Society of Mechanical Engineers (ASME) linkedin.com/company/asme/ •NEW	~600K+ followers	Mechanical-engineering body with a large student-member community working through hard graded engineering coursework.	Target 'mechanical engineering' field-of-study + Student job-title + ASME-follower interest. Solid mid-funnel STEM audience; narrow to undergrad/grad students for deadline intent.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
38	74	Economics & Finance Students / Professionals (LinkedIn Group) LinkedIn Group: 'Economics, Finance and Accounting Professionals' (large; 100K+ members) •NEW	~100K+ members	Econ/finance/accounting students and CPA/CFA candidates handling dense quantitative coursework and certification exams.	Target 'economics'/'accounting'/'finance' field-of-study + 'CPA'/'CFA' certification keywords + Student filter. Broad but on-theme; narrow to students/candidates for deadline intent.	econ-business
39	73	Khan Academy (Company Page) linkedin.com/company/khan-academy/ •NEW	~700K+ followers	Followers are self-learners and students using free structured courses across math, science and test prep — broad serious-general-study audience.	Use Khan-Academy-follower interest + 'SAT'/'MCAT'/'calculus' keyword + Student filters. Big reach, mixed intent (includes casual learners) — layer deadline/exam keywords to sharpen.	exam-prep
40	72	Higher Education Teaching & Learning (LinkedIn Group) LinkedIn Group: 'Higher Education Teaching and Learning' (tens of thousands of members) •NEW	Tens of thousands of members	Faculty and grad students focused on how university learning happens — an amplifier audience and a source of serious-learner grad students.	Target 'higher education'/'pedagogy' interest + grad-student field-of-study filters. Mixed educator/student audience — use the active-learning angle; treat partly as amplifier channel.	general-learning
41	72	Mastering Instructional Design (Connie Malamed community) linkedin.com/in/conniemalamed/ •NEW	International learning-design community; tens of thousands cross-platform	Hub for people who design how others learn; receptive to evidence-based active-learning tools and likely to recommend Ritsu to student-facing networks.	Seed organically + target 'visual learning', 'instructional design', 'eLearning' interest keywords. Indirect persona (influencers of learners, not learners) — treat as amplifier channel.	learning-method
42	70	Brain Expansion Group (LinkedIn Group) linkedin.com/groups/13927028	~2.54M members	Huge learning / personal-growth / emerging-tech community — broad top-of-funnel reach for the 'master tough subjects' message.	Use for scale on the general-learning hook; tighten hard with member-skill + Job Title = Student to avoid generic self-help audiences. Treat as a reach amplifier, not a precision facet.	general-learning
43	70	Learning, Education, and Training Professionals Group (LinkedIn Group) linkedin.com/groups/27003/	~1.35M members	Largest learning/education community — reaches educators (one of Ritsu's six personas) plus serious self-learners interested in study methods.	Group targeting for the educator + lifelong-learner angle; layer interest 'instructional design' / 'study skills'. Best for the 'create a course / master a subject' message rather than the ML-specific one.	general-learning
44	70	Coursera (Company Page) linkedin.com/company/coursera/ •NEW	~3.5M+ followers	Millions of followers enrolled in deadline-paced university and professional courses (incl. ML, data, finance) — a huge pool of in-course committed learners.	Massive reach; must filter hard with 'machine learning'/'data science'/'finance' skills + Student/active-learner + course-completion interest signals. Top-of-funnel scale with on-persona slices when filtered.	general-learning

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
45	68	International E-Learning Association (Company/Group) linkedin.com/company/international-e-learning-association •NEW	Tens of thousands across page+community	Global e-learning community receptive to evidence-based active-learning products and connected to serious online learners.	Target 'e-learning'/'online learning' interest keywords; use as awareness + credibility channel. Indirect persona (e-learning pros) — broader, lower intent than student-direct targets.	general-learning
46	64	Josh Bersin linkedin.com/in/bersin/ •NEW	~1M+ LinkedIn followers (LinkedIn Top Voice)	Most-followed corporate learning analyst; his audience cares about skills-building and learning effectiveness, a soft on-ramp to the active-learning thesis.	Huge reach but corporate-L&D skew (not students). Use only for awareness/credibility plays or B2B-educator angle; build a narrow interest+seniority filter. Lower fit for the deadline-bearing student core.	learning-method

Ad mechanism: Host-read sponsorship slots.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Deep Questions with Cal Newport podcasts.apple.com/us/podcast/deep-questions-with-cal-newport/id1515786216	100K+ newsletter subscribers; large weekly podcast audience	Hosted by a CS professor; the definitive show on deep work, focus, and student productivity — its audience self-selects as serious, deadline-driven learners frustrated by shallow study, the core Ritsu buyer.	Host-read ads land well because Newport vets sponsors and his audience trusts study/productivity tools. Angle: 'deep work needs active practice, not re-reading — Ritsu builds the practice.' Avoid hypey creative; this audience prizes honest/concrete (matches Ritsu brand voice).	learning-method
2	97	The Learning Scientists Podcast learningscientists.org/learning-scientists-podcast/ •NEW	Niche; est. tens of thousands of downloads/episode (cognitive psychologists + educators + serious students)	Hosted by cognitive scientists who teach the exact methods Ritsu automates: retrieval practice, spaced practice, interleaving, dual coding, elaboration.	Highest message-fit host-read sponsorship target; pitch Ritsu as 'auto-generates retrieval-practice + spaced quizzes from your own course PDFs' — speaks the host's vocabulary verbatim. Small but extremely pure audience.	learning-method
3	96	Deep Dive with Ali Abdaal aliabdaal.com/podcast/	Large; built on Ali Abdaal's multi-million-subscriber productivity/study brand (ex-doctor, study-tips creator)	Abdaal's audience came up through his evidence-based study-technique content (active recall, spaced repetition) — students and self-learners optimizing how they study, a direct match for Ritsu's active-mastery pitch.	Host-read endorsement carries heavy weight with the study-optimization audience that already practices active recall; pitch Ritsu as the automation of the techniques he teaches. Strong creator-credibility transfer to the study-method buyer.	learning-method
4	96	The Learning Scientists Podcast learningscientists.org/podcast	Niche but authoritative; strong reach among educators and study-method-serious students	Hosted by cognitive psychologists on the exact science Ritsu operationalizes (retrieval practice, spacing, interleaving) — its listeners already believe active learning beats passive, so they're pre-sold on Ritsu's premise.	Small audience, maximum message-fit; host-read endorsement from learning scientists is the highest-credibility validation possible. Pitch: 'we automate retrieval practice and spacing from any document.' Ideal for an authority-building seed placement.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
5	94	Huberman Lab hubermanlab.com/ podcast	~5.4M+ subscribers; millions of downloads per episode; routinely top-10 global, #1 in Science/Education	The single biggest hub for the persona's exact mindset — Stanford neuroscientist Andrew Huberman has dedicated episodes ('Optimal Protocols for Studying & Learning', 'How to Learn Skills Faster') on test-based active recall, spaced repetition, and gap effects, which is literally Ritsu's product thesis.	Buy host-read mid-roll sponsorship slots specifically on the learning/focus/memory episodes (evergreen, replayed for years); pitch Ritsu as 'the active-recall tool Huberman's science says actually works.' Target via podcast ad networks supporting episode-level placement (e.g., the show's ad sales / dynamic-insertion provider).	learning-method
6	94	Learn and Teach Better with Dr. Justin Sung (iCanStudy / guest appearances) youtube.com/ @JustinSung (40M+ YouTube views; podcast guest + iCanStudy content)	20,000+ trained students in 150+ countries; 40M+ YouTube views on study-method content	Ex-doctor learning coach whose entire audience is students hunting better study methods (encoding, active learning) — the most behaviorally aligned 'how do I actually learn this?' cohort for Ritsu.	Best reached via host-read/sponsored segments on the podcasts he guests on and his own channels; his endorsement of an active-learning tool is gold for the study-method buyer. Pitch the encoding/active-recall automation angle directly.	learning-method
7	92	Latent Space: The AI Engineer Podcast latent.space/ podcast (Apple: id1674008350)	200K+ subs / 10M+ readers+listeners across channels in 2025	The reference show for the engineer-learning-ML archetype (fast.ai/DeepLearning.AI grads building with LLMs) — precisely the 'learning a new framework from docs' persona who'd use Ritsu to master dense technical material fast.	Newsletter+podcast combo from swyx/Alessio; host-read or newsletter-sponsor slots reach AI engineers directly. Angle: 'master a new framework or paper in 30 seconds of upload.' Strong fit for the engineer sub-persona's WTP.	cs-ml
8	90	The Magnetic Memory Method Podcast magneticmemorymethod.com/ category/podcast/ •NEW	Niche; long-running, est. low-tens-of-thousands of downloads/episode (memory + learners)	Entirely about memory techniques, spaced repetition, and retention for exams and language/subject mastery — a self-selected better-learning audience.	Tight niche, high intent. Host-read pitch: Ritsu generates the spaced-repetition flashcards/quizzes this audience builds manually. Smaller reach but very on-belief.	learning-method
9	89	Gradient Dissent (Weights & Biases) wandb.ai/fully-connected/ gradient-dissent (Apple/Spotify: Gradient Dissent)	Established applied-ML practitioner audience (W&B community)	Applied-ML show whose listeners are practitioners and students learning to actually build models — the engineer/data-science masterer converting docs and courses into working skill.	Host-read via the W&B brand reaches ML engineers with high trust; pitch the 'learn a new ML framework/paper fast' angle. Tight thematic alignment makes a credible, low-waste placement.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
10	89	Lex Fridman Podcast lexfridman.com/ podcast/ (Apple: id1434243584)	~3.6M+ subscribers; multi-million plays per episode across YouTube/Spotify/Apple	Massive AI/ML-curious technical audience (MIT background host; episodes with Terence Tao, Andrew Ng, Edward Frenkel on math/physics/AI) that maps directly to the ML/STEM masterer who wants rigor, not chatbot fluff.	Host-read sponsorship is premium and high-trust; if full-show is out of budget, use dynamic ad insertion targeted at the AI/math/physics episodes. Angle: 'turn these dense lectures and papers into active mastery.' Skeptical-of-AI audience responds to the accuracy/citations message.	cs-ml
11	89	Practical AI practicalai.fm (Changelog network)	Long-running weekly show; large Changelog-network developer/ML audience	Makes ML 'practical, productive, accessible' for learners moving from fundamentals to LLMs/MLOps — the self-learner and engineer building ML competence who'd use Ritsu to master technical material.	Sold through the Changelog network's sponsorship program (developer-trusted, host-read). Angle: 'from fundamentals to mastery — upload the course, get active practice.' Network buy enables cross-show reach to developers/ML learners.	cs-ml
12	89	The Cognitive Revolution (AI Builders & Researchers) podcasts.apple.com/us/podcast/the-cognitive-revolution/ id1669813431	Biweekly; substantial and fast-growing AI audience (Turpentine network)	Reaches AI-curious learners and builders going deep on how AI works — adjacent to the ML-masterer who wants to genuinely understand the field rather than skim it.	Part of the Turpentine network, so host-read inventory is professionally sold and can be bundled across the network's AI shows. Angle: 'understand AI by actively mastering the papers, not just listening.' Good scaled reach to AI enthusiasts.	cs-ml
13	87	Data Skeptic podcasts.apple.com/ (millionpodcasts: data-science-podcasts) / dataskeptic.com	200+ episodes, weekly; one of the best-known long-running data-science shows	Audience is literally self-selected skeptics in data science/stats/ML — the 'will the AI lie to me?' learner who must be convinced Ritsu is accurate before trusting it with exam prep.	The skeptic framing is an asset: a candid host-read about citations + on-document grounding converts the doubters. Pitch the accuracy/reliability SERVQUAL message head-on. Weekly cadence keeps slot pricing reasonable.	cs-ml
14	87	Machine Learning Street Talk (MLST) podcasts.apple.com/us/podcast/machine-learning-street-talk (rephonic: machine-learning-street-talk)	249+ episodes; respected, sizeable deep-ML/theory audience	Deep, theory-heavy ML discussions for the rigor-seeking learner (the cs231n/CS229 crowd who distrusts surface-level explanations) — an audience that values accuracy, Ritsu's #1 service-quality promise.	Smaller but extremely on-persona and intellectually demanding; host-read works only with an honest, technical pitch. Angle: 'grounded, cited mastery — not a hallucinating chatbot.' Great for credibility-building reads that this skeptical cohort respects.	cs-ml
15	87	My Favorite Theorem podcasts.apple.com/us/podcast/my-favorite-theorem/ id1262231136	Niche; audience is mostly math-interested undergraduates and math grad students/faculty	Audience is explicitly math undergrads and grad students — the linear-algebra/calculus/proof-heavy STEM-course persona who needs to turn dense theorems and lecture notes into testable practice.	Small but laser-targeted at the math-course learner; host-read works with a numerate, non-hypey pitch. Angle: 'turn your problem sets and lecture PDFs into quizzes and concept maps.' Cheap, precise placement for the math sub-segment.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
16	87	Super Data Science: ML & AI Podcast superdatascience.com/podcast (Apple: id1163599059)	987+ episodes, semiweekly (Tue/Fri); one of the largest data-science learning shows	Explicitly a learning-and-career show for data science / ML students and bootcampers (host Jon Krohn teaches), matching the paid-bootcamp-cohort archetype with a dated curriculum and graded outcomes.	High episode cadence = frequent, affordable host-read slots; audience is actively upskilling (perfect intent). Pitch Ritsu as the study layer on top of their DS/ML coursework. Two episodes/week means cheap A/B testing of ad creatives.	cs-ml
17	87	The TWIML AI Podcast (This Week in Machine Learning & AI) twimlai.com (Apple: id1116303051)	7M+ downloads lifetime; large, sustained ML-practitioner community	The most on-persona large ML show — serious practitioners and students learning ML deeply from research interviews, exactly the cohort taking cs231n/CS229/DeepLearning.AI who need to convert papers into practice.	Host-read sponsorship with Sam Charrington carries strong credibility with ML learners; pitch the 'research-paper → quiz/flashcards/concept-map' workflow. Bundle with the show's newsletter for cross-channel reach.	cs-ml
18	87	The Learning Science Podcast podcasts.apple.com/us/podcast/the-learning-science-podcast/id1821776128 •NEW	Small/newer; growing learning-science audience	Dedicated to the science of how people learn and retain — listeners are educators and serious learners hunting for better methods.	Early-stage show = cheap, on-message host-read. Pair with The Learning Scientists for a learning-science cluster buy. Verify current download numbers before committing budget.	learning-method
19	86	Divine Intervention Podcasts divineinterventionpodcasts.com/ •NEW	Large within med-ed; near-universal among US med students prepping USMLE Step 1-3 + shelf exams	The most-used free USMLE board-prep audio; listeners are med students under intense graded-deadline pressure mastering dense pathophysiology.	Best med-school host-read target; pitch Ritsu turning First Aid/lecture PDFs into high-yield quizzes + concept maps. Emphasizes understanding-over-memorization (on-belief). High intent, exam-timed WTP.	med-health
20	83	MCAT Basics (MedSchoolCoach) open.spotify.com/show/01k1ICEBLfnu7EFZp5OqoR •NEW	Mid-large within pre-med; top-ranked MCAT podcast	Pre-med students drilling AAMC MCAT content — a high-stakes, dense, deadline-driven mastery audience.	Pre-med host-read; pitch Ritsu generating MCAT-style practice + flashcards from review books. Strong exam-timer WTP; audience is squarely the target persona.	med-health
21	82	Mindscape with Sean Carroll preposterousuniverse.com/podcast/ •NEW	Large; est. several hundred thousand downloads/episode (physics + ideas audience)	Caltech physicist's audience is heavily STEM university students and grad students engaging dense physics, math, and philosophy.	Premium, rigor-respecting host-read; target physics/STEM students. Lead with accuracy + concept-mastery framing. Broad ideas audience slightly dilutes course-deadline intent.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
22	81	CFA Institute — Take 15 Podcast goodpods.com/ leaderboard/ top-100-shows-by- category/other/cfa •NEW	Niche; CFA candidates and charterholders worldwide	Listeners are CFA candidates grinding through one of the densest professional exams — textbook deadline-bearing masterer with clear WTP.	Finance-exam host-read/category target; pitch Ritsu converting CFA curriculum PDFs into practice questions + spaced review. High WTP, exam-timed; modest reach.	exam-prep
23	81	ChemTalk geniuslabgear.com/ blogs/for- scientists/best- chemistry-podcasts •NEW	Niche; chemistry students and enthusiasts	Chemistry-focused show (interviews Nobel laureates/professors) for students working through hard chemistry coursework.	Subject-pure chemistry host-read; pitch org-chem/gen-chem quiz + flashcard generation from lecture slides. Confirm current download volume; reach is modest.	stem-core
24	80	Adventures into Organic Chemistry podcast.feedspot.com/ chemistry_podcast/ s/ •NEW	Niche; org-chem students and chem enthusiasts	Organic chemistry is a notorious weed-out course with high deadline stress — a perfect graded-mastery context for Ritsu.	Highly specific org-chem host-read; org-chem is one of Ritsu's strongest use cases (dense, memorization-heavy, exam-driven). Small but high-intent. Verify activity.	stem-core
25	80	The Premed Years' sister — MCAT Podcast (Medical School HQ) medicalschoollhq.net/mcat-podcast/ •NEW	Mid; dedicated MCAT-prep listenership	Dr. Ryan Gray's dedicated MCAT show walks AAMC content and score strategy for pre-med students on a hard exam deadline.	Pure MCAT host-read; pitch Ritsu's MCAT practice-question + flashcard generation. High exam-intent; pair with MCAT Basics for full pre-med exam coverage. Smaller reach.	exam-prep
26	79	Relatively Prime: Stories from the Mathematical Domain player.fm/series/ relatively-prime- stories-from-the- mathematical- domain •NEW	Niche; dedicated math-enthusiast and student audience	Math-storytelling show whose listeners are math majors and serious enthusiasts engaged with hard quantitative content.	Indie math host-read, inexpensive. Bundle with My Favorite Theorem for a math-cluster campaign. Verify it's still in active production before buying.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
27	78	The Premed Years (Medical School HQ) podcasts.apple.com/us/podcast/the-premed-years/id583254241 •NEW	Large within pre-med; long-running, thousands of students reached	Covers the full premed journey including MCAT study strategy for committed pre-med students.	Established pre-med host-read; broader (admissions + journey) than pure exam-prep, so pair the ad with the MCAT-study angle. Good reach within the niche.	med-health
28	77	MCAT Basics (from MedSchoolCoach) podcasts.apple.com/us/podcast/mcat-basics-from-medschoolcoach/id1448973714	Leading MCAT-prep podcast; large pre-med listener base in the US	Pre-med students prepping a dated, high-stakes standardized exam — the 'committed, deadline-bearing' persona at peak study intensity, currently leaning on Anki/Quizlet that Ritsu replaces.	Host-read endorsement from a known prep brand transfers trust; target as a sponsor of section-review episodes. Angle: 'turn AAMC content and your prep books into adaptive practice.' Seasonal spend around MCAT test dates maximizes ROI.	exam-prep
29	76	EconTalk rephonic.com/podcasts/econtalk •NEW	Large; 1,000+ episodes over 20 years, est. several hundred thousand downloads/episode	Russ Roberts' rigorous econ conversations are assigned/recommended in many university economics courses; audience is econ students and curious analytical minds.	Premium econ host-read; pitch Ritsu for mastering dense econ readings + problem sets. Audience is intellectually serious; broad (not all students), so reach over purity.	econ-business
30	75	Divine Intervention Podcasts (USMLE) divineinterventionpodcasts.com/ (Apple: id1483304964)	Very large within US med-student niche; one of the most-listened USMLE Step 1-3 / shelf prep shows	Pure exam-prep persona with a hard dated licensing exam — med students with the sharpest 'pass-this-graded-deadline' willingness-to-pay, exactly the wedge Ritsu's 'ace your exam' workflow targets.	Niche but extremely high-intent; host-read or pre-roll reaches students mid-grind. Pitch: 'upload your First Aid / lecture PDFs → instant high-yield quizzes.' Cost-efficient because audience is concentrated and purchase-ready before Step exams.	exam-prep
31	75	The Changelog changelog.com/podcast •NEW	Large; one of the top developer podcasts, est. hundreds of thousands/episode	CS students and engineers learning new frameworks from docs — maps to Ritsu's 'learn a new framework fast' engineer persona.	Established dev host-read inventory; pitch Ritsu's code-exercise generation + 'learn a framework from its docs' angle. Audience skews working devs over deadline-students (lowers purity).	cs-ml
32	74	FoundMyFitness (Rhonda Patrick) foundmyfitness.com/episodes •NEW	Large; est. several hundred thousand downloads/episode (science-rigor health audience)	Deeply science-literate audience that values citations and rigor — overlaps the accuracy-skeptical learner who fears AI 'lying.'	Host-read to an evidence-obsessed crowd; lead hard with Ritsu's on-document accuracy + transparent citations to neutralize AI-skepticism. Health-skewed so subject-intent is indirect.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
33	73	The Curbsiders Internal Medicine Podcast thecurbsiders.com/ ·NEW	Large within med-ed; popular among residents + senior med students	Clinical knowledge show used by med students/residents to master dense internal-medicine content (and has done explicit 'science of learning' episodes).	Med-ed host-read; audience trends resident/clinician but includes serious med students. Position Ritsu for turning clinical references into active recall. Slightly past the core student deadline window.	med-health
34	72	CoRecursive: Software Engineering Stories corecursive.com/ ·NEW	Mid; dedicated software-engineering audience	Narrative software-engineering show for developers and CS learners who go deep on the 'why' behind hard technical concepts.	Story-driven dev host-read; position Ritsu for CS students mastering dense technical material. Smaller, loyal audience; more career-dev than student.	cs-ml
35	72	The Anatomy of Self-Care / Study Skills shows (Study With Me cluster) podcast.feedspot.com/study_skills_podcasts/ ·NEW	Aggregate niche; multiple small study-skills shows for students	A cluster of student-study-skills podcasts whose listeners are actively seeking better study/revision methods before exams.	Use Feedspot's study-skills leaderboard to identify 3-5 small on-message shows for cheap host-read tests; ideal A/B inventory for the 'auto active-recall' message. Verify each show's size/activity individually.	general-learning
36	71	Lex Fridman Podcast lexfridman.com/podcast/ ·NEW	Very large; multi-million downloads/episode; top global podcast	Massive STEM/CS/AI student-and-engineer audience that consumes long-form deep-dives on hard technical subjects.	Premium high-reach host-read; CS/AI/STEM-student slice is the target. Lead with accuracy + 'master your course material' for engineers/students. Very broad — purity is moderate, reach is enormous.	cs-ml
37	68	Soft Skills Engineering softskills.audio/ ·NEW	Large; popular weekly dev advice show, est. 100K+/episode	Big audience of CS students and early-career engineers actively leveling up their skills.	Light/funny dev host-read with strong reach; CS-student slice is the target. Content is non-technical advice so subject-intent is indirect — lean on reach, not purity.	cs-ml
38	67	The Knowledge Project (Shane Parrish / Farnam Street) fs.blog/knowledge-project/	Large general-learning audience; one of the biggest mental-models/learning shows	Big audience of self-improvement-driven learners obsessed with thinking and mastery — the 'serious self-learner' persona running multi-source learning projects that Ritsu is built for.	Host-read sponsorship reaches a broad, affluent, learning-motivated audience; pitch Ritsu as the tool that turns any source into mastery. Good top-of-funnel scale for the self-learner segment beyond the narrow exam crowd.	general-learning
39	67	Planet Money npr.org/podcasts/510289/planet-money ·NEW	Very large; NPR flagship, millions of downloads/episode; used in undergrad econ courses	Explicitly incorporated into undergraduate micro/macro courses; large student listenership learning economics.	Big NPR-style sponsor read; huge reach but general audience — target the student/econ slice. Strong for awareness; lower intent-purity than exam-prep shows.	econ-business

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
40	66	Crash Course Pods (Complexly) podcast.feedspot.com/education_podcasts/ •NEW	Large; tied to Crash Course's massive student-education brand	Crash Course's audience is high-school and university students studying core academic subjects — broad but squarely students.	Education-brand sponsor read with big student reach; general-study, so target with a broad 'turn any class material into practice' message. Awareness/reach play, moderate intent.	general-learning
41	65	The Indicator from Planet Money rephonic.com/podcasts/the-indicator-from-planet-money •NEW	Large; daily NPR econ show, est. high-hundreds-of-thousands/episode	Short daily economics explainers popular with econ/business students building intuition for coursework.	High-frequency NPR sponsor inventory; cheap repeated impressions on an econ-curious audience. General-interest, so pair with an exam/coursework hook. Reach play.	econ-business
42	64	Animal Spirits (The Compound) thecompoundnews.com/animal-spirits •NEW	Large within finance; popular markets/finance show	Finance and business students/early professionals engaging applied finance content adjacent to CFA/coursework.	Finance host-read with good reach; audience skews practitioner/investor over exam-student, so target the student/CFA-candidate slice. Reach over purity.	econ-business
43	63	StarTalk Radio (Neil deGrasse Tyson) startalkmedia.com/shows/ •NEW	Very large; one of the biggest science podcasts, millions of downloads/episode	Huge science-curious audience including many STEM students who enjoy physics/astronomy explainers.	Big science-brand sponsor read; great for awareness among science students. General-interest entertainment angle lowers course-deadline intent — use for top-of-funnel reach.	general-learning
44	60	The Daily Stoic / Study-Discipline crossover (student focus episodes) dailystoic.com/podcast/ •NEW	Very large; millions of downloads/month	A large discipline-and-focus audience that overlaps students seeking the self-control to study consistently before deadlines.	High-reach host-read; only loosely on-theme (discipline, not subject mastery). Use the 'consistent study habit / beat procrastination' angle. Low purity, large reach — bottom of the priority list.	general-learning

Newsletters / Substack — newsletters (46, ranked by suitable score)

Ad mechanism: Newsletter sponsorship / classified slots.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	Ali Abdaal's Newsletter (LifeNotes / Sunday Snippets) aliabdaal.com/ newsletter/ (also Substack: aliabdaal.substack.com)	~250K+ subscribers	The definitive study-skills/evidence-based-learning audience (Abdaal built his brand on active recall + spaced repetition for med/exam study) — the exact psychographic of the serious learner burned by passive study.	Premium creator sponsorship via his team/media kit (single sends reportedly out-earn a month of doctor salary). Highest-intent fit in the list: pitch Ritsu as the tool that automates the active-recall material his audience already believes in.	learning-method
2	96	Justin Sung / iCanStudy Newsletter (Learning Drops) icanstudy.com/ (newsletter signup; Justin Sung)	Tens of thousands (learning-science newsletter tied to a large YouTube/learning-method following)	Pure learning-science audience: Sung teaches higher-order learning, mind-mapping, and spaced-interleaved-retrieval to students prepping hard exams — the persona's exact study philosophy.	Direct sponsorship / partnership inquiry (he openly evaluates EdTech tools). High strategic fit — a credibility co-sign from a learning-science authority strongly counters the 'AI can't teach real mastery' objection. Pitch Ritsu's concept-map + Feynman/active-recall modes.	learning-method
3	96	Scott H. Young Newsletter (Ultralearning) scotthyong.com/ blog/newsletter-ss/ (Substack)	Tens of thousands (long-running ultralearning audience; author of 'Ultralearning')	The ultralearning / learn-hard-things-fast audience — self-identified serious learners who deliberately attack hard STEM material on a deadline, exactly Ritsu's psychographic.	Substack sponsorship / Recommendations cross-promo. Smaller list but unusually high mastery-intent; pitch Ritsu as the logistics engine for the spaced-repetition + active practice his readers already practice (he's even written about AI helping with spacing).	learning-method
4	96	LifeNotes (Ali Abdaal) aliabdaal.com/ newsletter/ •NEW	~800K-1M+ subscribers (Ali's combined newsletter list; flagship productivity/learning audience)	Ali Abdaal's audience is the canonical evidence-based-study / 'study less, learn more' crowd — students and self-learners actively seeking active-recall and spaced-repetition methods.	Inquire via aliabdaal.com/contact for newsletter sponsorship; a dedicated classified/primary slot in LifeNotes reaches the highest-intent study-method readers. Pair the ad with a 'turn your lecture notes into active recall' angle.	learning-method
5	95	Eva Keiffenheim — Learn Letter evakeiffenheim.substack.com/ •NEW	~40K-60K subscribers (learning-science niche)	Written by a self-described 'learning science nerd' for fellow learners and medical students; covers spaced repetition, retention, and how-to-learn directly.	Substack sponsorship slot; audience already sold on spaced-repetition science, so an accuracy-first AI-tutor pitch lands. Note the med-student readership overlap.	learning-method
6	95	The Effortless Academic (Ilya Shabanov) ilyashabanov.substack.com/ •NEW	Tens of thousands (PhD-researcher-led academic productivity niche)	Explicitly about tools/methods to manage knowledge in academia — note-taking, reference management, visual thinking — read by grad students and serious self-learners mastering dense material.	Substack sponsorship / classified within long-form tutorial issues; extremely on-persona (knowledge-management + study-systems). Lead with PDF/paper -> structured practice.	learning-method

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
7	94	Scott H. Young (Ultralearning) scotthyoud.com/ blog/ (newsletter signup on site) •NEW	~150K-200K subscribers (Ultralearning author list)	Scott's whole brand is mastering hard skills fast through aggressive active practice — the exact 'be sharper, master it' psychographic, friends with Cal Newport/James Clear.	Direct newsletter sponsorship inquiry via scotthyoud.com; audience self-selects for ultralearning/hard-skill mastery. Pitch the active-practice-generation angle.	learning-method
8	92	Ahead of AI (Sebastian Raschka) magazine.sebastianraschka.com/ (Substack @rasbt)	~190K-193K subscribers (ranked #56 in Technology on Substack)	The single most on-persona newsletter: Raschka teaches LLM/ML from-scratch, read by ML students and self-learners working through exactly the cs231n/CS229/fast.ai material Ritsu turns into practice.	Substack-native: pursue a recommendation/cross-promotion or a sponsored classified in the issue body; Raschka curates a 'Substacks recommended' list — getting listed there is a high-trust organic seed to a skeptical, accuracy-valuing audience. Pitch the 'turn this paper/lecture into a quiz' angle.	cs-ml
9	92	AlphaSignal alphasignal.ai/ (Lior Sinclair)	~200K+ AI developers/ researchers	Research-to-practice newsletter for engineers building AI systems — the skeptical, rigor-first reader who wants to genuinely master papers, not skim them.	Direct sponsorship inquiry via the site; weekly tech-heavy send means one placement reaches a concentrated ML-practitioner base. Emphasize Ritsu's grounded-in-your-source citations (this audience punishes hallucination).	cs-ml
10	92	Import AI (Jack Clark) importai.substack.com/ (Substack @importai)	~100K+ subscribers	Deep, research-literate readership (Anthropic co-founder's analysis of papers/policy) — the rigor-obsessed researcher persona who breaks down dense papers into testable knowledge.	Substack-native: sponsored mention in-issue or Substack Recommendations cross-promo. Smaller but extremely high-quality/credible audience; ideal for the 'researcher breaking down a paper' use case. Keep copy substantive — this audience distrusts hype.	cs-ml
11	92	KDNuggets Newsletter kdnuggets.com/ news/ subscribe.html	~60K+ subscribers	Veteran data-science/ML education hub; audience includes students, course-takers, and practitioners studying ML fundamentals on a timeline.	Direct ad/sponsorship sales via KDNuggets (display + newsletter slots); established education-focused publisher. Good for credible reach into the broad DS/ML-learner base.	cs-ml
12	92	The Rundown AI therundown.ai/ (Rowan Cheung)	~2M+ subscribers	Largest AI newsletter overall with strong student/early-career-learner readership; broad reach to people actively trying to skill up in AI on a timeline.	Sponsorship via therundown.ai advertise page (high open rate 50%+). Highest raw reach — use for top-of-funnel awareness; request the most AI-education-relevant segment and A/B the 'master, don't just chat' hook against the cheating objection.	cs-ml
13	92	TLDR AI tldr.tech/ai	~1.25M+ subscribers (daily; engineers + technical professionals)	Largest technically-skewed AI list; its engineer/student readers are precisely those learning new frameworks from docs and dense papers — Ritsu's 'learn a framework fast' and 'break down a research paper' jobs.	Self-serve-ish sponsorship via tldr.tech/advertise; classified + primary slots, CPM-priced (\$1K-\$20K+ range). Ask for the AI-vertical-only send to keep spend on-persona. Lead with the technical-accuracy / cited-from-your-source proof point.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
14	92	Thomas Frank — College Info Geek newsletter collegeinfo geek.com/ (newsletter) / @TomFrankly •NEW	Hundreds of thousands across brand (College Info Geek)	College Info Geek is literally about studying smarter in college — flashcards, focus, Notion study systems — the core deadline-bearing university masterer.	Sponsorship via Thomas Frank's College Info Geek / Notion audience; high student purity. Strong fit for an 'ace your exam' flashcard/quiz creative.	learning-method
15	90	Cal Newport (Deep Work / Life of Focus) calnewport.com/ (newsletter) / https:// www.thedeeplife.com •NEW	Hundreds of thousands (Deep Work / focus audience)	Cal's readers are focus-obsessed students and knowledge workers who value rigor and deep, durable mastery over shallow shortcuts — aligned with active-learning belief.	Newsletter sponsorship via his site; audience is rigor-respecting and AI-skeptical (good fit for an accuracy-first message). Avoid 'AI does it for you' framing — emphasize deep focus + mastery.	learning-method
16	90	Kwik Brain (Jim Kwik) kwikbrain.substack.com/ •NEW	Tens of thousands on Substack (Jim Kwik's broader brand ~ millions)	Dedicated to memory techniques, active recall and spaced repetition — readers are explicitly optimizing how they learn and retain.	Substack sponsor placement; high method-affinity but slightly more general self-improvement than graded-deadline. Frame Ritsu as the 'do the active work' tool.	learning-method
17	89	Data Elixir dataelixir.com/	Tens of thousands (long-established weekly data-science curation)	Curated data-science/ML articles, tools, and tutorials for practitioners and students learning the field — overlaps the data-science-bootcamp segment of the persona.	Self-serve sponsor slots via dataelixir.com (classified + featured). Reliable, on-topic data-science reach at modest cost; good for the DataCamp/bootcamp-cohort variant of the wedge.	cs-ml
18	89	Data Science Weekly datascienceweekly.substack.com/	Tens of thousands of subscribers	Long-running curated DS newsletter read by learners and career-changers entering data science — Ritsu's 'multi-source learning project' and bootcamp learners.	Substack-native sponsored placement; affordable and precisely on the data-science learning niche. Pair with the 'turn course slides + textbook into one study plan' CTA.	cs-ml
19	89	Deep Learning Weekly deeplearningweekly.com/	~30K subscribers	Curated research papers + tutorials for ML practitioners — a small but laser-targeted list of people consuming exactly the dense ML material Ritsu converts to active practice.	Direct sponsorship via site; low-cost, high-precision placement. Best efficiency-per-dollar for the core ML-masterer wedge. Lead with 'turn this week's paper into flashcards + a concept map.'	cs-ml
20	89	Last Week in AI lastweekin.ai/ (newsletter + podcast)	~30K subscribers	Research-recap newsletter/podcast for AI-literate learners; small but engaged audience of people actively tracking and studying ML developments.	Direct sponsorship (newsletter slot + podcast read). Niche, high-engagement; cost-efficient supplement to the larger placements. Frame around staying current AND mastering the underlying material via active practice.	cs-ml
21	89	The Batch (DeepLearning.AI / Andrew Ng) deeplearning.ai/the-batch	Hundreds of thousands (DeepLearning.AI's flagship weekly; audience overlaps the millions of Ng/DeepLearning.AI course-takers)	Directly reaches the DeepLearning.AI / Coursera / Andrew Ng course-takers who ARE the deadline-bearing ML-course persona; brand authority neutralizes the 'will AI lie to me?' objection.	Not a self-serve Substack — request the DeepLearning.AI media kit / partnership slot. Premium, high-credibility placement; frame Ritsu as the active-practice companion to their courses (Andrew Ng audience is mastery-motivated, not novelty-seeking).	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
22	89	The Gradient thegradient.pub/ (also Substack)	Tens of thousands (volunteer-run ML research publication + newsletter/ podcast)	In-depth ML research analysis read by grad students and serious researchers — the audience facing qualifying exams and dense- paper mastery.	Substack-native sponsored placement or podcast read; academically credible context. Niche but precisely on the grad-school/research segment of the persona. Frame around exam/quals prep from papers.	cs-ml
23	89	Ness Labs (Anne-Laure Le Cunff) nesslabs.com/ newsletter (Maker Mind) •NEW	~100K+ subscribers	Neuroscience-grounded 'mindful productivity' and learning; read by students and researchers optimizing how they learn and retain.	Ness Labs runs newsletter sponsorships; learning-science + metacognition audience. Pitch evidence-based active-learning + retention.	learning-method
24	88	ByteByteGo Newsletter (Alex Xu) blog.bytebytego.c om/ •NEW	1,000,000+ subscribers	CS/engineering learners studying system design and prepping for hard technical interviews — committed masterers of dense CS material.	Has a formal sponsorship form (blog.bytebytego.com/p/ newsletter-sponsorships); huge engineer/CS-student reach. Pitch 'turn docs/courses into code exercises & quizzes.'	cs-ml
25	88	Med School Insiders Newsletter medschoolinsider s.com/ newsletter/ •NEW	Hundreds of thousands (pre-med + med-student brand; ~1.5M YouTube)	Weekly newsletter on study apps, efficiency, USMLE/Anki decks for pre-meds and med students — the MCAT/USMLE deadline- bearing masterer.	Reach out via Med School Insiders for sponsorship; massive pre-med/med audience with explicit Anki/spaced-repetition habits. Lead with USMLE/MCAT active-recall angle.	med-health
26	87	Med Brain Media (Anatomy & Physiology for Students) medbrainmedia.s ubstack.com/ •NEW	Low tens of thousands (med/health-science students)	Medical quizzes and anatomy/physiology content for students — exactly the dense, high-stakes, exam-graded med-school masterer.	Substack sponsorship/classified; small but extremely on- persona (active quizzing for med students). Pitch flashcards/ quizzes from lecture slides & textbooks.	med-health
27	86	Spacetime Beat (Nirmalya Kajuri, IIT physicist) substack.com/ (search 'The Spacetime Beat')) •NEW	Low tens of thousands (fundamental-physics niche)	Physics-major and physics-serious readers who engage with rigorous fundamental- physics content — the hard-STEM masterer audience.	Substack classified/sponsorship; niche but pure physics- student audience. Pitch 'turn your physics lecture PDFs/ problem sets into active practice.'	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
28	85	Musings on Quantum Mechanics (Prof. Vlatko Vedral, Oxford) substack.com/ (search 'Musings on Quantum Mechanics')) •NEW	Low tens of thousands (quantum/physics niche)	Oxford quantum-information theorist writing rigorous physics — read by physics students mastering hard, exam-graded material.	Substack sponsorship; small but high-rigor physics audience that respects accuracy. Strong fit for a physics-course wedge ad.	stem-core
29	85	Quastor quastor.org/ (Substack) •NEW	~250K-400K subscribers	Highly technical software-engineering case studies; readers are CS students and engineers actively upskilling on hard engineering material.	Newsletter sponsorship available; technical engineer/student audience. Frame Ritsu around learning a new framework/system from docs fast.	cs-ml
30	84	Brain Food (Farnam Street / Shane Parrish) fs.blog/ newsletter/ •NEW	~1M+ subscribers	Mental-models and 'learn better, think better' audience — self-learners and students who prize rigorous understanding over memorization.	Large reach; Farnam Street runs sponsorships. Lower purity (broad thinking/decision-making) but strong learning-curious culture. Target with a 'understand, don't memorize' message.	learning-method
31	83	Quanta Magazine quantamagazine.org/ (newsletter signup) / @QuantaMagazine •NEW	Hundreds of thousands (math + physics + bio + CS readership)	Premier rigorous math/physics/CS explainer; read heavily by STEM undergrads, grad students, and serious self-learners.	Sponsorship via Simons Foundation / Quanta; large, rigor-respecting STEM audience but broad (not deadline-driven). Good for brand + STEM-mastery message.	stem-core
32	82	Net Interest (Marc Rubinstein) netinterest.co/ (Substack) •NEW	~150K+ subscribers	Deep financial-sector economics read by finance students, CFA candidates and analysts who study dense financial material.	Substack sponsorship; high-quality finance/econ audience. Frame around CFA / finance-course mastery and breaking down dense readings.	econ-business
33	81	Money & Macro (Joeri Schasfoort) moneymacro.rock.s/ (Substack) •NEW	Tens of thousands of subscribers	Academically-grounded macroeconomics explainers; read by economics students and self-learners mastering econ theory.	Substack sponsorship; econ-student-leaning, rigor-respecting audience. Pitch 'turn econ lectures/textbook chapters into quizzes & concept maps.'	econ-business
34	80	Asimov Press asimov.press/ •NEW	Tens of thousands of subscribers	Rigorous biology/biotech long-reads read by bio students, researchers and serious self-learners of the life sciences.	Substack sponsorship; biology-serious audience. Slightly editorial/research-leaning, so target with a 'master your biology/biochem course' creative.	med-health

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
35	80	Ground Truths (Dr. Eric Topol) erictopol.substack.com/ ·NEW	Hundreds of thousands of subscribers	Data-driven biomedical analysis read by med students, bio/health-science learners and researchers who parse dense studies.	Substack sponsorship; large rigorous biomedical audience but more practitioner/research than exam-prep. Pitch 'break down dense research papers into testable knowledge.'	med-health
36	80	Kit Yates — Maths and the real world (Prof. Kit Yates, Bath) substack.com/ (search 'Kit Yates Math')) ·NEW	Low tens of thousands	Accessible-but-rigorous mathematics from a university professor; reaches math-interested students and self-learners.	Substack sponsorship; math-curious audience. Slightly more pop-math than graded-course, so pitch the 'master your calculus/stats course' angle.	stem-core
37	78	The Curiosity Chronicle (Sahil Bloom) sahilbloom.substack.com/ ·NEW	~800K+ subscribers	Frequently covers learning, retention and spaced repetition; large audience of self-improvers and students wanting to learn more effectively.	Substack sponsorship available; big reach but broad self-improvement (lower intent purity than dedicated study newsletters). Use a study/retention-specific creative.	learning-method
38	76	Superorganizers / Every (Dan Shipper) every.to/ (newsletter) ·NEW	~100K+ subscribers	Knowledge-work tools, note-taking, and 'how smart people learn/organize' content read by self-learners and students building study systems.	Every offers sponsorships; tools-for-thinking audience overlaps with note-taking/learning-method. Mixed (more knowledge-worker than student). Use a study-systems creative.	learning-method
39	75	The Overshoot (Matthew C. Klein) theovershoot.co/ (Substack) ·NEW	Tens of thousands of subscribers	Rigorous economics/markets analysis read by serious econ and finance students and analysts.	Substack sponsorship; econ-rigorous but somewhat professional audience (lower student purity). Use an econ-course/CFA-prep creative.	econ-business
40	74	TSOH Investment Research (Alex Morris, CFA) thescienceofhitting.com/ (Substack) ·NEW	Tens of thousands of subscribers	CFA-charterholder-authored equity research; reaches finance students and CFA candidates studying valuation rigorously.	Substack sponsorship; finance/CFA-aligned audience. Niche but high-intent for the CFA exam-prep angle.	econ-business

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
41	72	The Spacetime / Sidestack Science directory sponsorships (Sidestack) sidestack.io/ directory/ category/science •NEW	Aggregate (directory across many STEM Substacks)	A discovery surface listing rigorous science Substacks (physics, math, bio) read by STEM students — useful for bulk seeding/sponsor outreach.	Use as a sourcing list to negotiate cross-newsletter sponsorships across rigorous STEM titles; not a single ad slot but a targeting map.	stem-core
42	70	Mindstream mindstream.news /	~150K-200K+ subscribers (acquired by HubSpot)	Large daily AI newsletter with a learn-to-use-AI bent; broad reach to upskilling students and professionals for top-of-funnel awareness.	Sponsorship via Mindstream/HubSpot ad sales (mature inventory post-acquisition). Use for scaled awareness; gate to the most education-relevant segment and lead with the free-tier activation hook.	general-learning
43	70	Superhuman AI (Zain Kahn) superhuman.ai/	~1.5M+ subscribers	Massive learn-to-use-AI audience of professionals and students upskilling; reaches career-changers and self-learners (two of Ritsu's six personas) at scale.	Self-serve sponsorship marketplace (superhuman.ai); classifieds + dedicated slots. Strong for volume; pair the ad with a free-tier 'upload your course PDF, get a quiz in 30s' CTA to convert the curious into activation.	general-learning
44	70	The Neuron theneurondaily.com/	~700K+ subscribers	Large daily AI newsletter whose readers are actively learning to apply AI; broad learner/professional overlap with Ritsu's self-learner and professional personas.	Sponsorship via The Neuron / TechnologyAdvice (acquired Jan 2025 — now has formal ad sales). Proven paid-acquisition channel themselves (they bought Meta ads to grow), so sponsorship inventory is mature. Good mid-funnel reach.	general-learning
45	70	Refind — Math / Physics topic digests refind.com/ topics/math (and /topics/ physics) •NEW	Large aggregate (curated topic email digests)	Curated math/physics article digests reaching STEM-curious students and self-learners across many sources.	Refind offers sponsored placements in topic digests; target the math + physics topics for STEM students. Broader reach, mixed intent.	stem-core
46	68	The Finance Newsletter (Andrew Lokenauth) thefinancenewsletter.com/ •NEW	Hundreds of thousands of subscribers	Broad finance/career-finance audience including students and early-career learners building finance fundamentals.	Substack sponsorship; large reach but broad/general finance (lower mastery-intent purity). Target with a finance-fundamentals study creative.	econ-business

Forums & communities — forums & communities (40, ranked by suitable score)

Ad mechanism: Organic seeding + community participation.

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
1	99	r/GetStudying reddit.com/r/GetStudying/	~1.5M members	The largest study-method community — learners burned by passive re-reading/re-watching looking for active-recall systems, the exact pain Ritsu solves.	Reddit Ads (self-serve): run a Conversation/Image ad targeted by community (interest = r/GetStudying + lookalike study subs). Angle: 'Drop your textbook PDF → get an active-recall quiz in 30s' vs Anki/Quizlet. Reddit supports community-level interest targeting; pair with active-recall keyword targeting.	learning-method
2	96	r/Anki reddit.com/r/Anki/ ·NEW	~194K members	Hardcore spaced-repetition users (heavily med/STEM) who already believe in active recall and constantly seek faster ways to generate cards from source material.	Reddit Ads: target r/Anki; angle Ritsu as the auto-generator that creates active-recall decks from any PDF/slide deck — speaks directly to their card-creation pain.	learning-method
3	92	Learn AI Together (Discord) discord.com/invite/learnaitogether	~96K members	Largest beginner-friendly AI-learning Discord — active learners asking 'how do I actually learn this?', a warm audience for an active-mastery tool.	Discord has no platform-wide ad network — seed via server partnership/announcement (negotiate with admins) or run an AMA/study-tool demo in #resources. For paid scale, mirror the messaging into a Discord-ads-style creator sponsorship rather than a server CPC.	cs-ml
4	92	r/learnmachinelearning reddit.com/r/learnmachinelearning/	~276K+ members (beginner/learner-focused ML sub)	Learners self-studying ML courses (Andrew Ng, fast.ai, cs231n) who explicitly want to MASTER, not cheat — the persona's core identity.	Reddit Ads: community-target r/learnmachinelearning + r/MachineLearning. Angle: 'Studying CS229/cs231n? Turn the lecture PDF into quizzes + flashcards + a concept map.' Use the course names verbatim in creative; A/B against NotebookLM/ChatGPT comparison.	cs-ml
5	90	r/chemhelp reddit.com/r/chemhelp/	~100K+ members	Gen-chem and organic-chemistry students (a notorious weed-out course) facing dated exams — high pain, high substitution intent.	Reddit Ads: community-target r/chemhelp + r/OrganicChemistry. Angle: 'Orgo mechanisms not sticking? Upload the chapter → get drag-and-drop + quiz practice.' Highlight the diagram/mechanism activity types specific to chem.	stem-core
6	90	r/learnmath reddit.com/r/learnmath/	~500K+ members (large math-learning help community)	Students grinding calculus, linear algebra and proof-based courses with graded problem sets — the STEM-course core of the wedge.	Reddit Ads: community-target r/learnmath + r/calculus + r/linearalgebra. Angle: 'Linear algebra midterm? Turn the lecture PDF into a quiz + concept map.' Use the specific course in creative; pair with 'active practice beats re-reading' learning-science hook.	stem-core
7	89	Cross Validated (Stats & ML Stack Exchange) stats.stackexchange.com/	Hundreds of thousands of users (largest Q&A site for statistics, ML, data analysis)	Rigor-demanding stats/ML learners verifying course concepts — accuracy-first skeptics who are the hardest-but-most-valuable to convert.	Stack Exchange offers limited display/sponsorship inventory, not granular self-serve community targeting — pursue a Stack Overflow/Stack Exchange network sponsored placement or, more cheaply, organic accurate answers that build credibility. Position on rigor + citations.	cs-ml

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
8	89	DeepLearning.AI Community (Discourse) community.deeplearning.ai/	Large Discourse forum tied to Andrew Ng's courses (hundreds of thousands of DeepLearning.AI learners feed it; active AI Discussions + per-course categories)	Course-takers mid-way through dated, graded DeepLearning.AI specializations needing to convert long lectures into active practice before assessments.	Discourse, no native ads — ORGANIC: answer in per-course help categories and post a 'study companion' workflow for the specialization. Partnership angle = DeepLearning.AI 'The Batch' newsletter sponsorship to reach the same audience with a real ad unit.	cs-ml
9	89	fast.ai Course Forums forums.fast.ai/	Tens of thousands of practical-deep-learning students (long-running, high-engagement course forum)	Practitioners working lesson-by-lesson through fast.ai's multi-week course — precisely the deadline-paced, hands-on ML masterer.	Course forum, organic only — be helpful in lesson threads, share a notebook that turns the lesson video into a quiz. No paid unit; treat as credibility-seeding to fuel word-of-mouth into Discord/Reddit where paid scaling lives.	cs-ml
10	89	Hugging Face Forums discuss.huggingface.co/	~5M HF platform users; Discourse forum has tens of thousands of active threads (Beginners, Course, Research categories)	Home of self-taught ML masterers working through the HF course and deep-learning material — exactly the 'turn dense ML content into active practice' job.	Discourse forum, no ad system — ORGANIC: be genuinely useful in the 'Beginners' and 'Course' categories, share a Space that converts a lecture/paper to a quiz, and link in profile. Sponsorship route = HF blog/community spotlight, not paid ads.	cs-ml
11	87	Kaggle (Discussions + Competitions forums) kaggle.com/discussions	~31M registered members (largest data-science/ML community; expected ~30M registered by Q2 2026)	The single largest gathering of ML/data-science learners working through dated competitions and graded coursework who need to turn papers/notebooks/lectures into mastery fast.	No native self-serve ad manager — ORGANIC seeding only: post a high-value notebook/dataset (e.g. 'turn the cs231n PDF into a quiz deck'), answer in Getting Started + course-competition discussion threads, and sponsor/seed via Kaggle Grandmaster creators. Treat as community-partnership, not paid CPC.	cs-ml
12	87	Stack Overflow (+ Collectives/ Discussions) stackoverflow.com/	Tens of millions of registered developers (largest programming Q&A community)	Engineers learning a new framework/language from docs under project deadlines — the 'engineer learning from docs, wants code exercises' archetype.	Stack Overflow Ads / Collectives sponsorship offers developer-audience targeting by tag/topic (e.g. python, pytorch, machine-learning). Angle: 'Learning PyTorch from the docs? Generate code exercises + a concept map from any doc page.' Tag-targeted display is the real paid unit here.	stem-core
13	87	r/EngineeringStudents reddit.com/r/EngineeringStudents/ •NEW	~400K members	Engineering undergrads under constant graded-deadline pressure across math-heavy, multi-week courses — the deadline-bearing masterer archetype.	Reddit Ads: target r/EngineeringStudents; lead with 'ace your exam in 3 days' from your own course PDFs/slides — exam-timer intent is high.	stem-core
14	85	Art of Problem Solving (AoPS Community) artofproblemsolving.com/community	300,000+ members; 3.2M+ posts (used by most IMO winners as primary training resource)	The most rigor-obsessed, accuracy-demanding STEM learners (competition math, hard graded courses) — skeptics who will only adopt a tool that never lies to them.	No public ad manager — ORGANIC + partnership: seed in subject forums (Calculus, Olympiad), and pursue an AoPS-adjacent creator/instructor sponsorship. Lead with the accuracy/citations proof point (grounded in your own source) to win this skeptical crowd.	stem-core

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
15	85	Physics Forums physicsforums.com/	Large established forum (operating since 2001; 'largest online physics/science community', grade-school through graduate level)	Physics and engineering students using the homework-help and coursework sections for dated graded problem sets — squarely on-persona for STEM courses.	Independent vBulletin/XenForo-style forum — direct banner/ sponsorship deal with the forum owner is possible (no programmatic targeting). Cheaper path: organic helpfulness in homework-help subforums + signature link. Lead with 'active practice from your own lecture PDF'.	stem-core
16	85	r/medicalschoo l reddit.com/r/medicalschoo/ •NEW	~300K+ members	Med students grinding boards (Step 1/2) and dense coursework — heavy Anki users who live the active-mastery-by-deadline job.	Reddit Ads: target r/medicalschoo; lead with Anki-deck-from-PDF generation and concept maps; accuracy and citations are the trust unlock.	med-health
17	85	r/Zettelkasten reddit.com/r/Zettelkasten/ •NEW	~75K members	Serious learners obsessed with note-linking and durable understanding — the active-learning philosophy is native to this group.	Reddit Ads: target r/Zettelkasten; small but extremely high-intent — seed organically with concept-map/Feynman content rather than hard ads.	learning-method
18	84	r/GetDisciplined d reddit.com/r/GetDisciplined/ •NEW	~2.5M members	Self-improvers and students hunting for focus and study-discipline systems to get through demanding coursework.	Reddit Ads: target r/GetDisciplined; pair the discipline angle with deadline framing ('master the course, not just the to-do list').	learning-method
19	83	AnalystForum (CFA/CAIA/FRM) analystforum.com/ •NEW	Large dedicated CFA/FRM exam community (tens of thousands active)	Working professionals and students grinding the notoriously hard, deadline-locked CFA/FRM exams — pure deadline-bearing masterer.	Organic seeding + display: angle on auto-generated practice questions and flashcards from the CFA curriculum; exam-date urgency is intense.	econ-business
20	83	r/NoteTaking reddit.com/r/NoteTaking/ •NEW	~57K members	Students and self-learners actively comparing methods/tools to retain what they read — primed for an active-practice alternative.	Reddit Ads: target r/NoteTaking; frame Ritsu as the step after notes — turning captured material into quizzes and recall.	learning-method
21	82	r/AskPhysics reddit.com/r/AskPhysics/ •NEW	~133K members	Students bringing concrete physics coursework questions — high intent to understand, not just get answers.	Reddit Ads: target r/AskPhysics; angle on Feynman-style deep-explain and concept maps from lecture slides/PDFs.	stem-core
22	82	r/CFA reddit.com/r/CFA/ •NEW	~190K members	CFA candidates with fixed exam dates mastering thousands of pages — exactly the deadline-driven, dense-source job.	Reddit Ads: target r/CFA; lead with 'turn the curriculum into active practice' and the exam-date countdown.	econ-business

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
23	82	r/ ObsidianMD reddit.com/r/ ObsidianMD/ •NEW	~190K members	Knowledge-management power users (many students/researchers) building Zettelkasten and study vaults who value rigor and connections between ideas.	Reddit Ads: target r/ObsidianMD; angle on concept maps / knowledge graphs that turn linked notes into testable mastery.	learning-method
24	81	Mathematics Stack Exchange math.stackexchange.com/ •NEW	Millions of users; ~1.5M+ questions	Huge base of math students and self-learners actively working problems and seeking rigorous understanding.	Stack Exchange / Stack Overflow Ads: target by site (math.stackexchange) and tags; rigor-respecting audience — emphasize accuracy and grounded explanations.	stem-core
25	81	r/ StudentNurse reddit.com/r/ StudentNurse/ •NEW	~180K members	Nursing students facing dense pharmacology/anatomy content and NCLEX prep — high active-recall need under deadlines.	Reddit Ads: target r/StudentNurse; angle on turning lecture slides/textbook into NCLEX-style practice questions.	med-health
26	80	r/MCAT reddit.com/r/ MCAT/	~170K+ members	The most deadline-bearing, accuracy-obsessed exam-prep crowd; heavy Anki users actively seeking better active-recall tooling for a single high-stakes dated exam.	Reddit Ads: community-target r/MCAT. Angle: 'Turn your lecture notes / textbook into MCAT-style practice + flashcards.' Emphasize accuracy (no hallucinated questions) — this crowd will reject any tool that gets science wrong; that proof point is the whole ad.	exam-prep
27	80	r/premed reddit.com/r/ premed/	~200K+ members	Pre-meds in hard graded science courses (orgo, biochem, physics) with constant dated exams — high willingness-to-pay to replace passive study with active recall.	Reddit Ads: community-target r/premed. Angle: 'Orgo final in 3 days? Upload the chapter, get a quiz + concept map.' Lead with the exam-deadline timer; this audience already pays for UWorld/Anki, so position as a faster from-your-own-materials replacement.	exam-prep
28	80	Physics Stack Exchange physics.stackexchange.com/ •NEW	Hundreds of thousands of users	University physics learners who value precision and depth — naturally skeptical of AI but persuadable on accuracy.	Stack Exchange Ads: target physics.stackexchange; counter the 'AI lies' objection head-on with cited, on-source explanations.	stem-core
29	80	r/Notion reddit.com/r/ Notion/ •NEW	~346K members	Note-takers and students who build study systems; a natural switch-target since Ritsu replaces passive note storage with active practice.	Reddit Ads: target r/Notion; positioning angle 'stop storing notes, start mastering them' — directly addresses passive-vs-active learning.	learning-method
30	80	Wall Street Oasis wallstreetoasis.com/forum •NEW	~1M+ members	Finance students and analysts mastering technical material (modeling, CFA, interviews) where accuracy and depth matter.	Organic seeding + direct-site sponsorship: angle on mastering dense finance/accounting concepts from course PDFs; finance audience is rigor-driven.	econ-business

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
31	78	r/AskEconomics reddit.com/r/AskEconomics/ •NEW	~200K members	Economics students and serious learners seeking rigorous understanding of dense models — accuracy-respecting culture.	Reddit Ads: target r/AskEconomics; angle on deep-explain and concept maps from econ textbooks/lecture notes.	econ-business
32	78	r/productivity reddit.com/r/productivity/ •NEW	~2.4M members	Large audience that includes students optimizing study workflows and tool stacks for learning efficiency.	Reddit Ads: target r/productivity; lead with the study-workflow use case (PDF to quiz in 30s) to filter for the learner segment within a broad audience.	learning-method
33	77	Student Doctor Network (SDN) Forums forums.studentdoctor.net/	Large long-running pre-health forum (hundreds of thousands of pre-med/med/grad-health members)	Pre-health students in brutal graded science sequences with dated board/course exams — overlaps the highest-WTP exam-prep slice of the wedge.	Independent XenForo forum — negotiate a direct banner/sponsored-thread placement with SDN (no programmatic targeting). Angle: 'Biochem/orgo exam in 3 days → quiz from your own notes.' Pair with the accuracy guarantee, which this clinical audience demands.	exam-prep
34	76	r/Accounting reddit.com/r/Accounting/ •NEW	~600K members	Accounting students and CPA candidates mastering technical, exam-heavy material under deadlines.	Reddit Ads: target r/Accounting; angle on CPA/exam practice questions generated from study materials.	econ-business
35	76	r/biology reddit.com/r/biology/ •NEW	~2.6M members	Students and pre-health learners working through dense biology coursework that rewards active recall and concept mapping.	Reddit Ads: target r/biology; filter to the student segment with exam-prep and flashcard-from-textbook angles.	stem-core
36	74	College Confidential Forums talk.collegeconfidential.com/ •NEW	Large long-running student/parent community (millions of posts)	Students and families deep in academics, AP/exam prep, and college coursework — broad but high study-intent.	Organic seeding + display: focus posts in academic/AP-prep subforums; broader audience so lead with concrete exam-prep use cases.	exam-prep
37	72	r/college reddit.com/r/college/ •NEW	~1.2M members	Broad undergrad community facing graded multi-week courses and exam crunches across all subjects.	Reddit Ads: target r/college; lead with 'ace your exam in 3 days from your own materials' to surface the deadline-bearing segment.	general-learning
38	70	r/GradSchool reddit.com/r/GradSchool/	~1M+ members	Grad students breaking down dense research papers and prepping for qualifying exams — the 'researcher/qualifying-exam' archetype of the wedge.	Reddit Ads: community-target r/GradSchool + r/AskAcademia. Angle: 'Qualifying exams? Turn a stack of papers into testable practice.' Emphasize the research-paper → quiz workflow and cross-session memory for long study horizons.	general-learning

#	Score	Entity	Audience	Why this persona is here	How to target (ad / seed)	Cat
39	70	r/ IWantToLearn reddit.com/r/ IWantToLearn/ -NEW	~2.5M members	Large self-learner community actively seeking how to learn subjects and skills effectively.	Reddit Ads: target r/IWantToLearn; broad reach — qualify with the active-learning method angle (quiz yourself from any source).	general-learning
40	67	edX / MITx & Coursera course Discussion Forums edx.org/ (in- course discussion boards; e.g. MIT 6.x, Coursera ML)	Millions of enrolled learners across MITx/Coursera STEM MOOCs (per-course cohort forums, dated assignment deadlines)	Learners enrolled in graded, dated MOOC sessions (MIT 6.S191, Andrew Ng's Coursera ML) who need to convert long video lectures into active practice before deadlines.	In-platform forums are closed (no ads, no scraping) — reach this cohort via Google Search ads on course-name + 'study notes/quiz' queries and via the course's external creator channels (YouTube/newsletter). Treat the forum as the intent signal, not the ad surface.	general-learning

S10 · Pains, Triggers & Objections

(Ritsu icp-summary + JTBD · 20 attrs · 12★)

#	Attribute	Core Question	Answer	Conf	Source
★1	Top pain #1	<i>What hurts the most?</i>	Re-reads dense PDFs/slides for hours but it doesn't stick — passes nothing back, fails the midterm despite "studying"	Inf · 64%	icp-summary (passive method)
★2	Top pain #2	<i>What is the next-worst pain?</i>	Building own active-recall materials (Anki, practice problems) from a 200-page reader is hours of grunt work before any learning	Obs · 82%	analytics (PDF 63%) + icp
3	Top pain #3	<i>What else genuinely frustrates them?</i>	No structured PATH through a hard multi-week course — doesn't know what to master in what order before the deadline	Hyp · 50%	locked wedge (path = NotebookLM-gap POD)
★4	Pain intensity	<i>Is this hair-on-fire or mild annoyance?</i>	Hair-on-fire the 1–2 weeks before a graded midterm/final/qual; mild between deadlines (the WTP on/off cycle)	Inf · 64%	locked wedge (deadline-bearing)
5	Pain frequency	<i>How often do they feel this pain?</i>	Recurring on the course calendar — midterm + final + weekly problem sets; cohort = weekly graded modules (durable, not one-shot)	Inf · 64%	locked wedge
★6	Trigger event	<i>What event makes them act today?</i>	"Midterm in 5 days and I'm 3 lectures behind on cs231n / 6.S191" — or first failed problem set; uploads reader + lecture video that night	Obs · 80%	analytics (PDF+YT, sustained) + "ace exam in 3 days"
★7	Urgency level	<i>How urgent is it?</i>	Very high at trigger — fixed external deadline + real grade/credential stakes; not browsable "someday" learning	Inf · 64%	locked wedge (real stakes)

#	Attribute	Core Question	Answer	Conf	Source
★8	Objection: trust/accuracy	<i>Do they doubt it will be accurate?</i>	"If it hallucinates one wrong quiz answer, it teaches me the wrong thing before my exam — I can't verify 50 cards" — the #1 kill risk	Inf · 66%	icp-summary + SERVQUAL
★9	Objection: price	<i>Do they think it's worth the money?</i>	"\$29/mo when NotebookLM is free and ChatGPT Plus is \$20 / Quizlet \$3 / Anki \$0" — must justify a premium over a free clone of the spine	Inf · 64%	NotebookLM scan; deep-research stack prices
10	Objection: time	<i>Do they fear it takes too long to adopt?</i>	"I'm already behind — I don't have an afternoon to learn 17 activity types; I need value in the first session"	Hyp · 48%	JTBD (magic-moment <60s is the counter)
11	Objection: skepticism	<i>Do they dismiss it as hype?</i>	"Crosswords and emotional-AI personalities sound like edu-tainment fluff, not real mastery" — fears style over rigor	Inf · 60%	icp-summary (respects rigor)
12	Switching cost	<i>What does switching cost them?</i>	Low for net-new material; but already has Anki decks / Notion notes per course — re-uploading feels like redundant setup	Obs · 78%	analytics (32 projects, re-upload pattern)
★13	Status-quo bias	<i>Why is staying put easier?</i>	"Re-reading + highlighting got me through high school" — the failed passive method feels safe; mastery-tracking unproven to them	Inf · 60%	icp-summary (the FALSE belief)
★14	Cost of inaction	<i>What happens if they do nothing?</i>	A failed midterm/qual or a wasted \$2k bootcamp seat — real money + GPA/credential + the "I'm not smart enough" narrative hardens	Inf · 64%	locked wedge (real stakes)
★15	Deal-breakers	<i>What would instantly disqualify us?</i>	(a) any visible hallucinated quiz vs the source; (b) generation that breaks on dense PDFs/long lecture video; (c) no per-course mastery memory across sessions	Inf · 64%	SERVQUAL + analytics (PDF/long-video core)
★16	Must-haves	<i>What must be true for them to say yes?</i>	Source-grounded accurate quizzes; a structured multi-week path; cross-session mastery-tracking; flawless dense-PDF + long-YouTube ingest	Obs · 80%	analytics + locked wedge PODs
17	Objection: freemium-trap	<i>Do they suspect "free" is a bait-and-switch?</i>	"Is free real, or a paywall before any value?" — burned before; Free must deliver a full mastery loop on one real chapter before any wall	Inf · 56%	charter no-dark-patterns (VI-added)
★18	Evidence threshold	<i>How much proof before they trust it for a real exam?</i>	~2–3 accurate, source-cited quizzes on their OWN material before trusting it for a graded exam; one visible hallucination resets the counter	Hyp · 48%	SERVQUAL; icp (VI-added)
19	IP / copyright upload worry	<i>Are they nervous uploading their material?</i>	Real — they upload copyrighted textbooks + paid-bootcamp/proprietary slides; need an explicit "your material stays private, never trains public models" guarantee	Obs · 76%	analytics (pptx+PDF) + transparency.md (VI-added)
★20	Why-never-pay objection	<i>What makes them stay free forever?</i>	"NotebookLM + ChatGPT-free + Anki already cover me" — the soft-WTP reach layer rationalizes staying free; only a live graded deadline + a hard limit mid-path breaks it (this IS R1)	Hyp · 44%	R1 (WTP unproven) (VI-added)

| S11 · Value, Pricing & WTP

(Kotler 4P-Price + customer-perceived-value + Ritsu substitution stack · 19 attrs · 9★)

#	Attribute	Core Question	Answer	Conf	Source
★1	WTP anchor	<i>What's the most they'd pay monthly?</i>	~\$15–25/mo ceiling for the committed masterer; Ritsu Plus \$29 sits just above anchor, so the deadline-window spike must justify the gap	Inf · 58%	icp-summary US anchor; product.md §10
★2	Price sensitivity	<i>How much does price move their decision?</i>	High but deadline-elastic: normally resists, but a graded midterm in 7 days collapses sensitivity to near-zero for that window	Hyp · 50%	JTBD "exam in 3 days" timer
★3	Value drivers	<i>What specifically justifies paying?</i>	Time-to-mastery on dense PDF+lecture, accuracy (no hallucinated quizzes), the multi-week PATH, and cross-session progress they trust	Inf · 66%	analytics; SERVQUAL #1
4	Perceived value	<i>Does it feel worth it to them?</i>	"It turns my 600-page reader into a path I can actually finish" — values the active-mastery loop over passive tools	Hyp · 48%	icp-summary; "AI can't learn for you"
★5	Reference price	<i>What do they compare our price to?</i>	Anchors vs ChatGPT Plus / NotebookLM Pro ~\$20 and Google AI Pro student \$9.99/mo — that \$9.99 SKU is the hostile anchor	Inf · 64%	deep-research: NotebookLM Pro \$19.99, Google AI Pro student \$9.99
6	Substitution stack	<i>What are they paying for today, in total?</i>	ChatGPT Plus \$20 + Quizlet Plus \$7.99 + occasional Chegg \$14.95 ≈ \$25–43/mo; many run all-free (NotebookLM \$0 + ChatGPT free + Anki)	Inf · 62%	deep-research 2026 prices
7	Budget owner	<i>Who decides the spend?</i>	The learner personally (self-funded student/bootcamper); a minority parents/ employer-reimbursement, but the decision is self-driven	Hyp · 50%	icp-summary
8	Payment method	<i>How would they actually pay?</i>	Personal debit/credit or PayPal; student-tier expectations (Spotify, Google AI Pro \$9.99) frame "fair student price"	Hyp · 50%	deep-research student-SKU norms
9	Billing preference	<i>What billing shape do they prefer?</i>	Monthly first — buys for the course window, wary of annual lock-in pre-trust; annual –17% converts only after one full course delivers value	Inf · 60%	product.md annual –17%; episodic need
10	Discount sensitivity	<i>Does a discount change their decision?</i>	Responsive to a student/.edu discount or first-month-cheap, NOT manufactured urgency; \$9.99 Google AI Pro student is the bar	Inf · 60%	deep-research; charter no-dark-patterns
★11	Free-tier behavior	<i>How do they behave on free?</i>	Heavy free use until a real limit bites: multiple dense sources, many sessions, revisits (42 sources/36 sessions)	Obs · 82%	analytics live.sources/sessions
★12	Upgrade trigger	<i>What pushes them to pay?</i>	Hits the Free 40-page / 30-min-video / 5-session wall mid-course on a real graded deadline — the unproven R1 moment N=10 must test	Hyp · 42%	product.md Free limits; R1
★13	Cancel trigger	<i>What makes them stop paying?</i>	Course ends and no next deadline (cram-churn), OR a hallucinated quiz breaks trust, OR NotebookLM-free covers their need	Inf · 60%	R1 (cram-churn) + R2
14	Price-quality inference	<i>Does a higher price signal better to them?</i>	\$29 Plus reads "serious tool, not a toy" vs free clones — but ONLY if the <60s magic moment + accuracy deliver on first dense upload	Hyp · 48%	product.md "more for more"
15	ROI framing	<i>How do they rationalize the cost?</i>	"\$29 vs a failed midterm / a \$40–80/hr tutor / re-taking the course" — frames against grade-stakes + tutoring cost, not other apps	Inf · 62%	product.md replaces tutoring
16	Willingness to refer for value	<i>Would great value make them refer?</i>	High intent inside cohorts/Discords IF mastery lands; mechanism works but 100% founder-seeded — organic stranger referral unproven	Hyp · 46%	analytics shares=15 all founder

#	Attribute	Core Question	Answer	Conf	Source
★17	Value-justification moment	<i>At what moment do they decide it's worth it?</i>	The instant a practice quiz on their own dense PDF exposes a real gap they'd re-read past — "it caught something I missed" — that's when \$29 stops feeling expensive	Hyp · 46%	JTBD; SERVQUAL (VI-added)
18	Spend seasonality	<i>Do they only pay around exam season?</i>	Likely pays around graded windows (midterm/final/qual), at churn-risk between — the recurring-deadline cadence is what could make it durable vs one-shot cram	Inf · 56%	locked wedge (recurring) (VI-added)
★19	Pricing-pull-test status	<i>Is the \$29 WTP verified or still hypothesis?</i>	HYPOTHESIS — unverified at true-zero (0 real paying); SOP-PRODUCT-010 pricing-pull-test + the N=10 watch must verify the number before trusting it (this IS R1)	Hyp · 40%	R1; SOP-PRODUCT-010 (VI-added)

S12 · Competition & Substitution

(Kotler competitive frame + Ritsu · 12 attrs · 4★)

#	Attribute	Core Question	Answer	Conf	Source
★1	Current solution	<i>What's their current solution?</i>	Self-assembled stack: re-reading PDFs/slides + rewatching lecture YouTube + Anki + ChatGPT paste — passive, manual, no path	Inf · 64%	icp-summary; analytics (PDF 63% +YT 16%)
★2	Direct competitors	<i>Which direct rivals do they weigh?</i>	Google NotebookLM (free; doc→quiz/flashcard/Learning-Guide/track-mastery, Apr-2026) ; Quizlet; RemNote; smaller doc-to-quiz AI study apps	Inf · 66%	NotebookLM scan; deep-research
3	Indirect substitutes	<i>What non-obvious alternatives exist?</i>	Do-nothing (cram week-of); free ChatGPT/Gemini paste; the course's own problem sets + TA office hours + paid 1:1 tutoring	Hyp · 52%	JTBD; substitution stack
★4	Why current fails	<i>Why doesn't their current fix fully work?</i>	Passive re-reading feels productive but doesn't stick; ChatGPT/NotebookLM give answers/cards, not a graded multi-week mastery PATH with tracking	Inf · 66%	icp-summary; NotebookLM scan
5	Switching trigger	<i>What would make them switch to us?</i>	First failed/near-failed graded checkpoint on a hard ML/STEM course — proof that re-reading isn't working	Hyp · 50%	JTBD; deadline-bearing def
★6	Competitive dissatisfaction	<i>What annoys them about what they use?</i>	NotebookLM/ChatGPT are flat Q&A — no difficulty-ordered path, no 17 activity types, no 7 modes, no concept-map mastery progression over weeks	Inf · 64%	NotebookLM scan; feature delta
7	Brand awareness of Ritsu	<i>Do they even know we exist?</i>	Near-zero — true-zero launch, 0 organic stranger shares (all 15 founder-only); no Reddit/YouTube/#studytwit footprint yet	Obs · 86%	analytics live.shares
8	Brand perception	<i>What do they think of us today?</i>	Unformed; risk = bucketed as "another AI study gimmick" unless accuracy + learning-science lead the pitch	Hyp · 48%	icp-summary; SERVQUAL
9	Comparison criteria	<i>What do they compare tools on?</i>	Accuracy (no hallucinated quizzes) #1; then depth/path structure, activity variety, mastery-tracking, free-tier ceiling vs NotebookLM-free	Inf · 64%	SERVQUAL #1; NotebookLM-free benchmark
10	Displacement target	<i>Whose spend are we replacing?</i>	The \$25–100/mo study stack: Anki/Quizlet subs + ChatGPT Plus \$20 + occasional \$30–60/hr tutoring — consolidated into Plus \$29	Inf · 62%	product.md; deep-research

#	Attribute	Core Question	Answer	Conf	Source
11	Share of wallet	<i>How much of their spend can we get?</i>	Targets near-100% of study-tool spend by replacing the stack; realistically first wins the ChatGPT-Plus \$20 + Quizlet slot	Hyp · 48%	JTBD; pricing
★12	Category maturity	<i>Is the category new or familiar to them?</i>	Early-growth, fast-consolidating: NotebookLM (free, Sept-2025) commoditized the doc→quiz spine — table-stakes now, differentiation moving upstream to mastery-path	Inf · 66%	NotebookLM scan; deep-research

S13 · Trust, Risk & Service Quality (SERVQUAL)

(Kotler SERVQUAL + product.md §6.7 · 14 attrs · 5★)

#	Attribute	Core Question	Answer	Conf	Source
★1	Reliability expectation	<i>How accurate must it be to trust it?</i>	Zero tolerance for hallucinated quiz/answer keys on graded cs231n/6.S191 material — a wrong key is worse than no quiz before a midterm	Inf · 66%	icp-summary + §6.7
★2	Error tolerance	<i>How forgiving are they of mistakes?</i>	Very low but recoverable: 1 bad item forgivable IF flagged + source-cited; 2–3 silent errors = uninstall, never paid	Hyp · 48%	Kotler SERVQUAL + JTBD
3	Responsiveness expectation	<i>How fast must it be?</i>	<30s to first activity from a 60-page PDF or long lecture video is table-stakes; dense PDF (63%) sets the latency bar	Obs · 80%	analytics live.sources
★4	Assurance needs	<i>What gives them confidence it's legit?</i>	Every explanation must cite the exact slide/page/timestamp from their own upload — "grounded, not guessed" vs ChatGPT	Inf · 64%	§6.7 + NotebookLM scan
5	Empathy needs	<i>Do they want it to feel encouraging?</i>	Counter "I'm not a math-science person" with an encouraging-but-rigorous tone (Supportive/Nerdy), not cutesy gimmicks	Inf · 60%	icp-summary
6	Tangibles	<i>Does the look-and-feel matter to them?</i>	Clean fast UI matters least of the five, but the <60s magic moment + heatmap must feel "serious tool," not consumer-cute	Hyp · 48%	§6.7 (tangibles lowest)
★7	Trust signals	<i>What proof makes them trust us?</i>	Visible source-grounding (page/timestamp citations), accuracy-first messaging, "AI can't learn for you" framing	Inf · 64%	positioning belief
8	Social proof type	<i>Whose endorsement moves them?</i>	Expert > peer > numbers: study-science creators (Sung, Abdaal, Frank) carry more weight than testimonials with a method-distrusting audience	Inf · 62%	channels; deep-research
9	Privacy concern	<i>Do they worry about data privacy?</i>	Moderate: cohort/bootcamp learners wary of accounts tied to graded coursework; want assurance data isn't sold or used to train public models	Hyp · 48%	JTBD + GDPR/CCPA
10	Data-safety concern	<i>Are they nervous uploading their material?</i>	Real: uploads copyrighted textbooks + paid-bootcamp/proprietary slides (pptx in mix) — need a clear "your material stays private" guarantee	Obs · 76%	analytics (pptx+PDF) + transparency.md
★11	Risk reversal needed	<i>What removes the risk of trying?</i>	Free \$0 must deliver a full mastery loop on one real chapter pre-paywall; the N=10 watch tests pay-at-first-limit	Inf · 62%	pricing + R1
12	Authority signals	<i>What authority cue earns belief?</i>	Name the method — active recall, spaced repetition, Feynman, concept maps — the preemptive moat NotebookLM lacks	Inf · 64%	positioning (learning-science)

#	Attribute	Core Question	Answer	Conf	Source
13	Minor-safety (under-18)	<i>If some are under 18, what age-safety applies?</i>	A real edge: some HS-AP / younger learners exist; adult-default + age-gate + COPPA/age-handling (medical students are adults; high-schoolers are not)	Inf · 54%	product.md §12 (VI-added)
★14	Error-recovery expectation	<i>When it gets one wrong, how must it handle it?</i>	They want a wrong item FLAGGED + source-cited + correctable, not silently confident — a graceful "here's the source, verify" beats false certainty	Hyp · 46%	SERVQUAL (VI-added)

S14 · Customer Equity & Lifecycle

(Kotler CLV/equity + 5-Star Module 11 · 15 attrs · 8★)

#	Attribute	Core Question	Answer	Conf	Source
1	Expected CLV	<i>What is one customer worth over time?</i>	~\$200–350 over a 7–10mo lifespan: Plus \$29/mo retained ~5–7 academic-cycle months, minus ~10% fees; pre-PMF, unproven	Hyp · 40%	Kotler CLV + pricing; WTP unproven
★2	Retention likelihood	<i>How likely are they to retain?</i>	Moderate-to-high WHILE a graded deadline is live (recurring midterms re-trigger value); drops sharply between terms	Inf · 58%	icp-summary (recurring deadline)
★3	Churn risk factors	<i>What signals they'll churn?</i>	Course ends/term break; one hard limit before value proven; NotebookLM-free "good enough"; a hallucinated quiz breaks accuracy trust	Inf · 62%	NotebookLM scan + SERVQUAL + R2
4	Expansion potential	<i>Can they grow into a higher tier?</i>	Real: dense ML PDFs + 6h lecture videos blow Free's 40pg/30min + Plus's 100pg/2h, pulling Plus→Pro (\$59, unlimited, export)	Obs · 80%	analytics (PDF 63% +YT 16%) + tiers
★5	Referral propensity	<i>How likely are they to refer?</i>	Mechanism works (15 shares) but ZERO organic stranger referral yet — all founder; cohort context favors latent virality	Obs · 86%	analytics live.shares
6	Advocacy archetype	<i>What kind of champion would they become?</i>	"The cohort study-buddy evangelist" — shares the Knowledge-Map link inside their class Discord; proof-by-grade, not hype	Hyp · 46%	Kotler 5A + cohort JTBD
7	NPS expectation	<i>Would they score us a promoter?</i>	High among masterers who hit the aha (heavy-revisit users) — target ≥40 for PMF; suppressed by accuracy slips	Inf · 56%	icp-summary PMF gate
★8	Loyalty driver	<i>What would keep them with us?</i>	Cross-session mastery-tracking + structured multi-week PATH (the NotebookLM-proof moat) — switching means losing accumulated progress	Inf · 64%	locked moat
★9	Engagement depth	<i>How deep does their usage go?</i>	Deep for the committed core: 42 sources/36 sessions, 4 sources/10 sessions (heavy revisit); 3329 units from uploads; small-N	Obs · 84%	analytics live.sessions
10	Habit-formation likelihood	<i>Will it become a habit for them?</i>	High during a term (daily/weekly graded cadence + heatmap + streaks form a ritual); fragile across the inter-term gap	Inf · 58%	Ritsu heatmap + deadline-cadence
★11	Lifecycle stage	<i>Where are they in the lifecycle?</i>	Acquisition/activation — true-zero, 0 real paying; the core is unvalidated on PAYMENT, only on engagement	Obs · 86%	analytics (0 real paying)
12	Reactivation potential	<i>Could we win them back if they leave?</i>	High + predictable: next term's hard course/qual is a natural re-entry; lapses are seasonal, not abandonment	Inf · 60%	recurring-deadline WTP

#	Attribute	Core Question	Answer	Conf	Source
13	Win-back trigger	<i>What reactivation offer would work?</i>	"New semester, new dense course" email + a fresh syllabus-PDF→PATH demo; or "your Knowledge Map is waiting" cross-session pull	Hyp · 48%	Module 11 + cross-session memory
★14	Equity quadrant	<i>Which value × loyalty quadrant are they in?</i>	TRUE-FRIENDS aspiration (high-fit, recurring need + loyalty); currently STRANGERS in reality (0 paid, engagement-only); N=10 must convert	Inf · 60%	Kotler equity matrix + true-zero
★15	Sean-Ellis fit	<i>Would ≥40% be "very disappointed" without Ritsu?</i>	The PMF gate — UNMEASURED at true-zero; the segment is <i>designed</i> to clear ≥40% (durable need + 1:1 fit) but it's the central PMF test (SOP-GTM-016)	Hyp · 44%	SOP-GTM-016 (VI-added)

S15 · Ritsu-Specific Product Fit (deep)

(Ritsu product.md + icp-summary · 26 attrs · 11★)

#	Attribute	Core Question	Answer	Conf	Source
1	Source-material type	<i>What raw material do they bring?</i>	Dense PDF course-packs/textbook chapters (63% of uploads) + long lecture videos (YouTube 16%) + lecture slides (pptx) + code	Obs · 86%	analytics live.sources
★2	Primary activity fit	<i>Which of 17+ activities is their hook?</i>	Quiz + Flashcard (spaced recall) anchor; Code-exercise for ML; Diagram/Mindmap/Concept-map for cross-chapter linking	Inf · 64%	17-activity set + STEM JTBD
3	Tutoring-mode fit	<i>Which of 7 modes fits them?</i>	"Ask Me" (explain-back = Feynman test of mastery) primary; "Exercise"/"Solve" for problem-sets; "Adaptive" across the path	Inf · 60%	icp + 7 modes
4	Subject / domain	<i>What subject do they bring?</i>	ML/AI courses (cs231n, 6.S191, Andrew Ng, fast.ai) = beachhead; broader STEM (calc/orgo/physics/bio, pre-prof) = expansion	Inf · 68%	locked wedge
5	Use-case workflow	<i>Which situational job is theirs?</i>	"Master a textbook chapter" + "Learn from a YouTube lecture" + "Learn a new framework fast" stitched across a graded multi-week course	Inf · 64%	homepage jobs + wedge
6	Mastery goal	<i>What does mastery look like for them?</i>	True understanding to pass graded midterm/final/qual — mastery non-optional because the deadline has real stakes	Inf · 64%	wedge def
★7	Magic-moment definition	<i>What is their precise first-win moment?</i>	Upload one cs231n lecture PDF → in <60s a structured path + a first quiz that exposes a real gap they re-read past	Inf · 64%	magic-moment <60s + icp
★8	Activation definition	<i>What counts as activated for them?</i>	Reaches first-quiz aha AND returns for a 2nd session on the same source within 7 days (revisit = mastery intent)	Obs · 80%	analytics heavy-revisit users
★9	Wedge-fit hypothesis	<i>Does the wedge actually pull this segment?</i>	1:1 fit — recurring graded deadlines = durable WTP trigger (vs one-shot cram churn); risk: PAYMENT unproven	Hyp · 44%	MASDA rationale + R1
10	Personality-mode pref	<i>Which tutor personality do they want?</i>	"Nerdy" + "Supportive" (rigor-respecting, anti-gimmick); "Funny/Sarcastic" repel this distrust-gimmicks learner	Hyp · 46%	icp + 10 styles
11	Device pattern	<i>Phone-first or laptop-deep?</i>	Laptop-deep for the multi-week mastery work; phone only for flashcard micro-review between classes	Inf · 62%	session depth + STEM workflow

#	Attribute	Core Question	Answer	Conf	Source
12	Persona mapping	<i>Which of the 6 personas is this?</i>	Primary = Students (graded STEM); secondary = Self-Learners + Engineers (framework-from-docs); Researchers on the expansion edge	Inf · 64%	6 marketing personas + wedge
13	Tier fit	<i>Which pricing tier fits them?</i>	Plus \$29/mo (most-popular; 100pg/2h-video/20-session fit a dense multi-week course); Pro \$59 only if cross-course sharing/export	Inf · 62%	pricing tiers + material density
14	Credit-usage pattern	<i>How heavily would they burn credits?</i>	Spiky-then-sustained: heavy burst at each new chapter/lecture upload, steady recall draws between — first hard limit hits mid-course at deadline	Hyp · 46%	credit model + 3329 units/756 sources
★15	Share-link behavior	<i>Would they share a Ritsu link?</i>	Shares a generated quiz/Knowledge-Map to study-group; mechanism works but unproven on strangers (15 shares, all founder)	Obs · 82%	analytics (15 shares, 0 organic)
★16	Counter-positioning	<i>Why Ritsu over their current stack?</i>	vs ChatGPT: persistent structured PATH not one-off chat; vs Anki/Quizlet: auto-built from source; vs NotebookLM: the multi-week path + 17 activities + cross-session mastery-tracking it LACKS	Inf · 64%	R2 NotebookLM scan + differentiators
★17	Quiz fit	<i>Is auto active-recall quizzing their core need?</i>	Core — auto active-recall quizzing from their own dense source is the primary hook (the #1 adopted activity); active recall is the named learning-science	Inf · 64%	product §6.2 (VI-added)
18	Flashcard fit	<i>Does auto-flashcard replace their manual Anki?</i>	Strong — auto-flashcards remove hours of manual Anki card-making (their #2 pain); spaced repetition is already familiar + trusted	Inf · 62%	icp stack (VI-added)
19	Mindmap / Knowledge-Map fit	<i>Do they value the concept-map of gaps?</i>	High for a multi-week course — the concept-map surfaces cross-chapter gaps (a NotebookLM-gap POD); Basic at Plus, Full (share+export) at Pro	Inf · 60%	product §6.4 (VI-added)
20	Code-exercise fit	<i>Do ML/engineers need code-exercise from docs?</i>	Relevant for the ML/engineer slice — code-exercise from framework docs (fast.ai, PyTorch) is a distinct hook generic study tools lack	Inf · 58%	product §6.2 (VI-added)
21	Diagram / Timeline fit	<i>Do diagram/timeline suit their material?</i>	Situational — diagram suits systems/architectures, timeline suits process/history; secondary to quiz/flashcard for math-heavy ML	Hyp · 44%	product §6.2 (VI-added)
★22	Ask-Me (Feynman) mode fit	<i>Does explain-back mastery-test them?</i>	High — "explain it back" IS the mastery test this persona respects; the Feynman framing signals the learning-science rigor they trust	Inf · 60%	product §6.3 (VI-added)
23	Adaptive mode fit	<i>Do they want difficulty that adapts to results?</i>	Strong — they want difficulty that adapts to where they're actually weak across the multi-week path, not fixed drills	Inf · 58%	product §6.3 (VI-added)
★24	Multi-week PATH fit	<i>Is the ordered path the core differentiator?</i>	THE load-bearing POD — the difficulty-ordered, tracked, multi-week PATH is exactly what free doc-Q&A tools (NotebookLM) lack; it carries the wedge	Inf · 66%	locked moat (VI-added)
★25	Per-source-limit fit	<i>Do dense sources blow the Free/Plus page-limit?</i>	Yes — 200-pg readers + 6h lecture series blow Free's 40pg/30min and pressure Plus's 100pg/2h → the natural Plus→Pro expansion + the upgrade trigger	Obs · 78%	analytics + pricing limits (VI-added)
★26	Counter-positioning vs NotebookLM	<i>Why Ritsu over free NotebookLM specifically?</i>	Ritsu wins ONLY on the structured multi-week PATH + 17 activity types + concept-level Knowledge Map + named learning-science — NEVER on "we also make quizzes" (NotebookLM does that free); R2 = this residual moat may not be enough	Inf · 60%	R2 NotebookLM scan (VI-added)

S16 · Measurement & Validation (MASDA)

(Kotler Ch7 MASDA + Ritsu observable proxies · 17 attrs · 10★)

#	Attribute	Core Question	Answer	Conf	Source
★1	Measurable	<i>Can we actually measure this segment?</i>	Sizeable + countable: enrolled US/English STEM-ML learners in a graded course — proxy via enrollments (cs231n ~600/yr, fast.ai, Coursera ML)	Inf · 62%	deep-research; icp-summary
★2	Accessible	<i>Can we reach them at reasonable cost?</i>	Pre-assembled on r/learnmachinelearning, r/MachineLearning, fast.ai forums, #studytwit, Sung/Abdaal audiences — reachable today, zero net-new channel build (S9-A = 262 mapped placements)	Inf · 64%	icp-summary channels; S9-A
★3	Substantial	<i>Is it large enough to be worth it?</i>	Worth pursuing: the 100-paying north-star needs only a thin slice; replaces a \$25–100/mo stack, so per-user economics clear \$29 easily	Inf · 62%	north-star + pricing
★4	Differentiable	<i>Do they behave distinctly enough to target?</i>	Distinct from exam-crammer (churns post-exam) and soft-WTP open self-learner: recurring graded deadlines = durable repeat-pay trigger, behaviorally separable	Inf · 62%	locked wedge + JTBD
★5	Actionable	<i>Can a solo + AI team actually serve them?</i>	One coherent offer fits 1:1 (doc→path→17 activities→mastery-tracking); single ICP message, single channel set	Inf · 64%	locked wedge + capability fit
★6	Observable proxy	<i>What signal predicts a high-value member?</i>	Heavy revisit on dense material: ≥10 sessions across ≥1 PDF/long-video over multiple weeks (top users: 42src/36sess and 4src/10sess)	Obs · 82%	analytics sources × sessions
★7	Predictive signal	<i>Which action predicts they'll pay?</i>	Hitting the Free hard limit (600 credits / 40pp / 30min / 5 sessions) while mid-course-path — the "blocked at the first hard limit" moment	Hyp · 44%	Free-tier limits + JTBD
8	Data source	<i>Where does the data come from?</i>	supabase-analytics pseudonymized <code>live.*</code> (sources, learning_sessions, learning_units, session_shares, payments, credit_transactions) on user_hash	Obs · 88%	analytics live schema (30 views)
9	Confidence level	<i>How sure are we — guess or observed?</i>	Engagement/material/mastery-pattern = observed at small-N (25 users); PAYMENT + stranger-referral = unproven (0 real paying, 15 founder shares)	Obs · 86%	analytics
★10	Validation method	<i>How will we validate this?</i>	N=10 stranger watch (SOP-PRODUCT-002) testing pay-at-first-limit + 1:1 interviews; later activation→paid telemetry + pricing-pull A/B (SOP-PRODUCT-010)	Inf · 62%	SOP-PRODUCT-002/010
★11	N observed	<i>How many real ones have we watched?</i>	25 pseudonymized profiles; ~24 ex-founder; only 2–3 sustained-use (42/36, 17/13, 4/10 sess); 0 paying strangers — true-zero, tiny-N	Obs · 88%	analytics live.profiles (25)
12	Last validated	<i>When did we last verify this?</i>	2026-06-04 (analytics sync v0.17.2, 30 synced views incl. payments); behavioral pattern re-queried live 2026-06-06	Obs · 88%	manifest + this session
★13	Falsifiability	<i>What would prove this segment false?</i>	N=10 don't pay at the first hard limit, OR NotebookLM's free doc→quiz spine satisfies the JTBD so deadline-bearers won't pay the Plus premium	Inf · 60%	R1 (WTP) + R2 (NotebookLM)
14	Stability	<i>How quickly does this segment change?</i>	Core JTBD (master-hard-course-by-deadline) is durable for years; the ML-beachhead surface drifts fast (courses rotate yearly) — re-pin named courses quarterly	Inf · 62%	JTBD + beachhead/expansion split

#	Attribute	Core Question	Answer	Conf	Source
★15	KPI — aha < 60s	<i>Do they hit the <60s magic moment?</i>	Target ≥X% of new signups reach the first-quiz aha in <60s on their OWN dense material; 30s path generation works, but the stranger aha-RATE is unmeasured — the N=10 watch's 1st leading metric	Hyp · 46%	magic-moment + SOP-PRODUCT-002 (VI-added)
★16	KPI — free→paid > 5%	<i>Does free→paid clear 5%?</i>	Target >5% free→paid for this segment; observed 0% (0 real paying) — the single most important unproven number (R1)	Hyp · 40%	R1; north-star (VI-added)
★17	Predictive pay-signal	<i>Which single action best predicts paying?</i>	Hitting the first hard credit/page limit WHILE mid-path with a live deadline (the "blocked mid-momentum" moment); the N=10 watch instruments exactly this	Hyp · 44%	R1; JTBD (VI-added)

S17 · Business / Firmographic (B2B educator expansion — DEFERRED, not first-100)

(Kotler Ch6 business markets — expansion only · 12 attrs · 0★ for the wedge)

Read this section as the EXPANSION ladder, not the wedge. The first-100 is pure B2C (buyer = user = payer). The B2B educator/institution path is a post-PMF land-and-expand that the B2C product seeds bottom-up (PLG). Every row here is honestly low-confidence — it is a *future* motion, not an observed one.

#	Attribute	Core Question	Answer	Conf	Source
1	Organization type	<i>What kind of org buys for them?</i>	Universities (depts/professors), ML/data bootcamps (fast.ai-style), corporate L&D, test-prep centers — the educator persona creating courses for students	Hyp · 42%	product.md §8 (Educators)
2	Org size	<i>How big is the buying organization?</i>	Wide — a single professor/TA (1 seat) → a department (10s) → a bootcamp cohort (100s); land tiny, expand by course	Hyp · 40%	Kotler Ch6
3	Industry / vertical	<i>What vertical is the org in?</i>	Higher-ed STEM/CS departments, ML/data bootcamps, corporate engineering upskilling	Hyp · 40%	beachhead → expansion
4	Buying-center roles	<i>Who plays each buying role?</i>	Initiator/user = instructor; influencers = students; decider/budget = dept head or L&D lead; gatekeeper = procurement/IT	Hyp · 38%	Kotler Ch6 buying center
5	Decision process	<i>How many steps to a signed deal?</i>	Long + multi-approval for institutions (Kotler Ch6) — BUT PLG bottom-up: a single instructor self-serves first, then advocates up	Hyp · 40%	Kotler Ch6 + PLG
6	Decision timeline	<i>How long is their buying cycle?</i>	Months for institutional procurement; a single educator can adopt in days (self-serve) then champion internally	Hyp · 40%	Kotler Ch6
7	Budget cycle	<i>When does their budget free up?</i>	Academic-year + semester budget cycles; corporate L&D annual	Hyp · 40%	Kotler Ch6
8	Procurement constraints	<i>What procurement hoops exist?</i>	Data-privacy / FERPA (student data), security review, accessibility (ADA), maybe SSO — real institutional hurdles	Inf · 48%	Kotler Ch6 + 07-trust-safety
9	Derived demand	<i>What downstream need pulls their purchase?</i>	Student outcomes (pass rates, engagement) + instructor time saved making materials	Hyp · 42%	product.md §8

#	Attribute	Core Question	Answer	Conf	Source
10	Seat / license model	<i>How would they license it?</i>	Per-seat (student) or site license; a Business plan already exists on the pricing page	Inf · 48%	product.md §10 (Business plan)
11	Champion profile	<i>Who internally would champion us?</i>	An enthusiastic instructor whose students loved the B2C product — the bottom-up PLG champion	Hyp · 42%	PLG motion
12	Expansion path	<i>How does a first deal expand?</i>	One instructor → their course → the department → the institution (land-and-expand); the B2C wedge seeds the B2B champion	Hyp · 44%	PLG land-and-expand

Confidence ledger + what to do with this

- **observed (the spine of truth at true-zero):** material mix (PDF 63% + YouTube 16%), the sustained-revisit mastery pattern (42 src/36 sess), 3,329 generated units, 15 founder-only shares (⇒ 0 organic stranger-referral), 0 real paying. Everything else is **inferred** (market deep-research / Kotler+BRAVO frameworks) or **hypothesis** (untested). The **Conf %** on every row is an honest P(answer correct): observed ≈ 80–92%, inferred ≈ 55–72%, hypothesis ≈ 30–50%.
- **The two unproven load-bearing claims** the whole persona rests on: **(R1)** that deadline-bearing masterers *pay* at the first hard limit (the N=10 watch's central test — S16 §16/§17, S11 §19, S10 §20 all sit at Conf ≤ 44%), and **(R2)** that Ritsu's PATH + mastery-tracking + learning-science out-hold *free* NotebookLM (which **narrowed the gap further in April 2026** — adding mastery-tracking + a Socratic "Learning Guide"; Ritsu's honest residual moat = the **structured multi-week ordered PATH + 17 distinct activity types + concept-level Knowledge Map + named learning-science** — S15 §24/§26).
- **What changed in v2 (this revision):** added the **Core Question + Confidence(%)** columns to every attribute; expanded to all **17 sections / ~307 attributes** (union of the EN-266 base + the Ritsu-tuned VI-308 template — adding S17 B2B + ~50 Ritsu-specific questions the prior draft lacked); replaced the thin S9 with **S9-A**, a 262-entity, ad-targetable channel & location map (11 platforms, ~30 each for YouTube/Reddit/X/Facebook/Instagram) built by a parallel research workflow — paste it straight into ad managers.
- **How to use S9-A for ads:** the 5 core platforms (YouTube/Reddit/X/Facebook/Instagram) carry ~30 specific placements each, with the exact ad mechanism per row (YouTube managed-placement, Reddit community targeting, X follower-lookalike, Meta interest/group, etc.). Discord/forums = the organic Collision-install recruiting map for the N=10 (SOP-PRODUCT-002), not paid placements. Authority > raw reach for this skeptical audience — lead with learning-science creators (Justin Sung, Ali Abdaal, StatQuest), not mass-blasts.
- **N=10 recruiting profile (for SOP-PRODUCT-002):** recruit **deadline-bearing committed masterers** — students/switchers in a hard, graded, multi-week ML/STEM course (cs231n / 6.S191 / Andrew Ng / fast.ai / a bootcamp cohort / grad quals) with a *dated* graded deadline; from r/learnmachinelearning, r/MachineLearning, fast.ai forums, course Discords, #studytwit (see S9-A → Reddit/Discord/Forums). Watch the one thing that matters: **do they pay at the first hard limit?**
